It's sugarbush spring--time to tap the trees, prepare the bottles, then gather round the cook fire to eat chicken and dumplings, roast marshmallows, and tell stories while the cold sap heats through, thickens, and boils to make syrup. Chall's timeless story and Daly's glowing paintings invite children to share in the pleasure of making maple syrup--a process that's the same today as it was two hundred years ago. How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as \* What makes a difference in reading achievement? \* How much reading time is enough? \* How can teachers use writing to build reading skills? \* How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to

presents Western readers with a time-tested path to achieving absolute well-being: the classical science of yoga. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY SPIRITUALITY & HEALTH The practice of hatha yoga, as we commonly know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means "dispeller of darkness, someone who opens the door for you. . . . As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional

This book is a fascinating and informative research report by a group of teachers who set out to teach children who have failed to acquire a useful degree of literacy; in it they discuss their experiences. The authors are presenting evidence about a central and constant problem in education, an essential kind of evidence which is often ignored, because it is so difficult to collect and present. The report presents enough case-notes and recordings of lessons and discussions to allow readers to make their own interpretations alongside those of the writers. Highly informative about many of the central topics of teaching literacy it discusses children's motivation, the influence of social and cultural background on learning, and different methods of teaching reading.

All new classroom videos, an enhanced assessment application tool available on a new Web Resources site, as well as enhanced word sorts, picture sorts and games offer teachers even more tools that will enhance their word study instruction. Experts know that sometimes the best way to teach a child what something is is to teach him what it isn't. Educator Wendy Ulmer applies that principle in her jaunty, out-of-the-box alphabet *A isn't for Fox: An Isn't Alphabet*. Running through the alphabet, beginning readers are given a letter and then told what the letter topic isn't. A isn't for box; it isn't for fox. A is for ants that crawl over your socks. Laura Knorr's colorful, engaging artwork perfectly captures the wit and whimsy behind the alphabet that isn't what it seems but is so much more!

She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. *I AM MALALA* is the remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. *I AM MALALA* will make you believe in the power of one person's voice to inspire change in the world.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That*
