An exotic, heartbreaking memoir that should finally earn Paula Fox, a distinguished novelist and children's book writer, the audience she has for decades deserved Paula Fox has long been acclaimed as one of America's most brilliant fiction writers. Borrowed Finery, her first book in nearly a decade, is an astonishing memoir of her highly unusual beginnings. Born in the twenties to nomadic, bohemian parents, Fox is left at birth in a Manhattan orphanage, then cared for by a poor yet cultivated minister in upstate New York. Her parents, however, soon resurface. Her handsome father is a hard-drinking screenwriter who is, for young Paula, "part ally, part betrayer." Her mother is given to icy bursts of temper that punctuate a deep indifference. How, Fox wonder, is this woman "enough of an organic being to have carried me in her belly"? Never sharing more than a few moments with his daughter, Fox's father allows her to be shunted from New York City, where she lives with her passive Spanish grandmother, to Cuba, where she roams freely on a relative's sugar-cane plantation, to California, where she finds herself cast upon Hollywood's grubby margins. The thread binding these wanderings is the "borrowed finery" of the title-a few pieces of clothing, almost always lent by kind-hearted strangers, that offer Fox a rare glimpse of permanency. Vivid and poetic, Borrowed Finery is an unforgettable book which will swell the legions of Paula Fox's devoted admirers.

The sea covers to-day what was once the Duchy of Clarides. No trace of the town or the castle remains. But when it is calm there can be seen, it is said, within the circumference of a mile, huge trunks of trees standing on the bottom of the sea. A spot on the banks, which now serves as a station for the customhouse officers, is still called "The Tailor's Booth," and it is quite probable that this name is in memory of a certain Master Jean who is mentioned in this story. The sea, which encroaches year by year, will soon cover this spot so curiously named. Such changes are in the nature of things. The mountains sink in the course of ages, and the depths of the seas, on the contrary, rise until their shells and corals are carried to the regions of clouds and ice. Nothing endures. The face of land and sea is for ever changing. Tradition alone preserves the memory of men and places across the ages and renders real to us what has long ceased to exist. In telling you of Clarides I wish to take you back to times that have long since vanished. Thus I begin: The Countess of Blanchelande having placed on her golden hair a little black hood embroidered with pearls.... But before proceeding I must beg very serious persons not to read this. It is not written for them. It is not written for grave people who despise trifles and who always require to be instructed. I only venture to offer this to those who like to be entertained, and whose minds are both young and gay. Only those who are amused by innocent pleasures will read this to the end. Of these I beg, should they have little children, that they will tell them about my Honey-Bee. I wish this story to please both boys and girls and yet I hardly dare to hope it will. It is too frivolous for them and, really, only suitable for old-fashioned children. I have a pretty little neighbour of nine whose library I examined the other day. I found many books on the microscope and the zoophytes, as well as several scientific story-books. One of these I opened at the following lines: "The cuttle-fish *Sepia Officinalis* is a cephalopodic mollusc whose body includes a spongy organ containing a chylaqueous fluid saturated with carbonate of lime." My pretty little neighbour finds this story very interesting. I beg of her, unless she wishes me to die of mortification, never to read the story of Honey-Bee.
