Book Type - Practice Sets / Solved Papers About Exam: Defense Research & Development Organization releases a recruitment notification for the post of Multi-tasking staff (MTS). There will be no negative marking for the wrong answer. The syllabus of the examinations will be commensurate with the essential qualification required for the post. The medium for examination will be Hindi and English. The Tier-I examination is for screening and Tier-II is for final selection. The provisional selection will be based on the merit obtained in the Tier-I examination depending upon the post/category/sub-category of the candidate. The minimum qualifying marks for Tier-I is 40% for UR/ESM/OBC candidates and 35% for SC/ST candidates. Final Selection: Candidates will be shortlisted for appearing in Tier-II

based on Tier-I examination merit in a ratio of 1:10. However, this ratio may increase or decrease depending upon organizational requirements. The last candidate securing equal marks in Tier-I in the bracket will also be included. Merit and final selection will be made based on the performance of the candidates in Tier-I. Subjects Covered- Quantitative Aptitude & Numerical Ability, General Awareness, Reasoning Ability Exam Patterns - Phase I: CBT (Screening) The total duration is 90 minutes for stage Tier-1. The question paper will be available in the English and Hindi language. For each correct question, the candidate will be awarded a +1 mark. Negative Marking -NO Conducting Body- Defence Research & Development Organisation Centre for Personnel Talent Management Exam Exam Level- National Exam Category and Exam Board -Defence Research & Development Organisation Centre for Personnel Talent Management Exam

The Microsoft Technology Associate certification (MTA) curriculum helps instructors teach and validate fundamental technology concepts with a foundation for students' careers as well as the confidence they need to succeed in advanced studies. Through the use of MOAC MTA titles you can help ensure your students future success in and out of the classroom. This MTA text covers the following Windows Operating System vital fundamental skills: • Understanding Operating

System Configurations • Installing and Upgrading Client Systems • Managing Applications, Managing Files and Folders • Managing Devices • Understanding Operating System Maintenance. Click here to learn more about Microsoft Technology Associate, (MTA) a new and innovative certification track designed to provide a pathway for future success in technology courses and careers.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Benefit from easy, quick, and concise revisions for your Class 10 ICSE Board Examinations (2022) with the help of our 10 Years Solved Papers guidebook including Bengali. Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.
