It was the end of an era; a year of 'outlandish happenings'; a time when everything seemed to change for Charlie Reeve, a daydreaming lad growing up in a small town on the Mornington Peninsula. His teacher and dad are giving him a hard time, his neighbour Squid keeps getting him into trouble, and his best mate Johnno is busy seeing a girl, which leads Charlie to a nasty fight with Big Simmons. First published in 1965, and subsequently made into a popular ABC TV series, *All the Green Year* is the story of a boy's journey towards adulthood: 'not only the humour of it but its drama and pain', as the 96-year-old Don Charlwood writes in his revised afterword. This Text Classics edition of one of Australia's most loved coming-of-age novels comes with a new introduction by Michael McGirr, author of the bestseller *Things You Get for Free*. Don Charlwood was born in Melbourne in 1915. He joined the RAAF in 1940, and his wartime experience and subsequent career in air-traffic control took him throughout Australia, and to New Guinea, the United Kingdom and Canada. Among Don's many books are his acclaimed debut, *No Moon Tonight* (1956), an account of his time with Bomber Command, and a two-volume autobiography. Don was made a Member of the Order of Australia for services to literature in 1992. He died in June 2012, shortly before the Text Classic edition of *All the Green Year* was published. Michael McGirr, the author of *The Lost Art of Sleep* and *Bypass: The Story of a Road*, is the head of faith and mission at St Kevin's College in Melbourne. textclassics.com.au 'Charlwood catches the idiom of his characters, projects them and brings them to glowing life.' For most of us, privacy means an unlisted telephone number. But what about your Social Security number? Your credit card numbers? Your bank account statements? Your personal health data? You may think this information is also secure, but if you've ever ordered anything over the Internet, or if your credit card is on file at the local video store just in case you never return that copy of *Titanic*, or if you throw out bank statements without shredding them, then this information is now in the public domain and can easily be discovered and used against you by a private eye, a computer hacker, or even a vengeful neighbor or former lover. Once people gain control of even a shred of your personal information, they can gain control of your life. They can transform this information into access to your assets, your loved ones, even your identity. And once your privacy is gone, there's very little you can do to get it back. J. J. Luna, a highly trained and

experienced security consultant, can show you how to achieve the privacy you crave, whether you just want to shield yourself from casual scrutiny or take your life savings and disappear without a trace. He reveals the shocking secrets that private detectives use to uncover information, and then shows you how to safeguard against them. Filled with vivid real-life stories drawn from the headlines and from Luna's own consulting experience, *How to Be Invisible* is the essential guide to preserving your personal security. Privacy is commonly lamented as the first casualty of the Information Age-- but that doesn't mean you have to stand for it.

A motley crew of saboteurs wreak outrageous havoc on the corporations destroying America's Western wilderness in this classic, comic extravaganza. When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly

antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, *The Monkey Wrench Gang* is an outrageous romp with ultra-serious undertones that is as relevant today as it was in the early days of the environmental movement. The author who Larry McMurry (Lonesome Dove) once dubbed "The Thoreau of the American West" has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all "praise the earth for Edward Abbey!"

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

You'll be done in no time and the students will be fully prepared to take their tests.

I'm not the same Bebe Grimshaw I was years ago. The woman I was spent years behind the bars of the highest security women's prison in the nation, my punishment for hacking nuclear codes as part of a crime syndicate I'd gotten in way too deep with. The woman I am today doesn't regret what I did, or the fact that I got caught, but I am remorseful for the years I lost with my son, Aaron. Released from my sentence early thanks to Kynan McGrath, I joined his team at

Jameson Force Security and now put my skills to use helping people. I'm just trying to get back a piece of what I lost, focusing solely on raising Aaron and my work at Jameson. As long as I have my son and my career, I'm content. But life has a funny way of letting you know exactly what you need, and when a devastatingly handsome stranger named Griffin befriends Aaron at the park, I have to consider I might be missing something. A part of me that was locked away long ago reawakens, and I find myself looking at Griff in a way I've not looked at a man in more than a decade. Just when I think things are starting to look up, my world is turned upside down. Turns out that meeting wasn't an accident, and things aren't going my way at all. Griffin Moore is the man sent here to kill me.

In many penetration tests, there is a lot of useful information to be gathered from the radios used by organizations. These radios can include two-way radios used by guards, wireless headsets, cordless phones and wireless cameras. *Wireless Reconnaissance in Penetration Testing* describes the many ways that a penetration tester can gather and apply the information available from radio traffic. Stopping attacks means thinking like an attacker, and understanding all the ways that attackers gather information, or in industry terms profile, specific targets. With information from what equipment to use and how to find frequency information, to tips for reducing radio information leakage, to actual case studies describing how this information can be used to attack computer systems, this book is the go-to resource for penetration testing and radio profiling. Author Matthew Neely is a respected and well-known expert and speaker on radio reconnaissance and penetration testing Includes real-world case studies of actual penetration tests using radio profiling Covers data leakage, frequency, attacks, and information gathering
