Written by residents and interns at Washington University, this small pocket book contains all the essentials that every intern needs to know from day 1 on the wards. It presents practical, must-have information, from the front lines of the wards, in an easy-to-use, quick-reference format. The book brings together, in one condensed source, all the most important pearls from other manuals--including ACLS algorithms, useful formulas, patient notes, top ten workups, common calls/complaints, and key points on the most common problems. Content includes vital pointers on what not to miss, when to refer/call for help, triage, cross-covering, and tricks of the trade. The Washington Manual® is a registered mark belonging to Washington University in St. Louis to which international legal protection applies. The mark is used in this publication by LWW under license from Washington University.

Healthcare leaders around the world are facing tough challenges, including the need to deliver better value for patients and payers, which means improving quality while reducing cost. It might seem impossible to do both, but organizations around the world are proving it's possible, through Lean. Health systems are able to enhance all dimensions of patient care, including both safety and service, while creating more engaging and less frustrating workplaces for healthcare professionals and staff all leading to improved long-term financial performance. Building on the success of the first two editions of this Shingo Prize-Winning book, *Lean Hospitals: Improving Quality, Patient Safety, and Employee Engagement*, Third Edition explains how to use the Lean philosophy and management system to improve safety, quality, access, and morale while reducing costs. Lean healthcare expert Mark Graban examines the challenges facing today's health systems, including rising costs, falling reimbursement rates or budget constraints, employee retention, and harm to patients. The new edition of this international bestseller (translated into eight languages) begins with an overview of Lean methods and mindsets. It explains how engaging staff and leaders in Lean practices such as value stream mapping and process observation can help reduce wasted motion for caregivers, prevent delays for patients, and improve the long-term health of your organization. In addition to a new introduction from John Toussaint, this updated edition includes: New and updated material on identifying waste, A3 problem

solving, employee idea management, kanban for materials management, and strategy deployment New case studies and examples—including a new 5S case study (Franciscan St. Francis Health) and other case examples highlighting the challenges and successes of an academic medical center and a small urgent access hospital, featuring quotes and stories from executives New examples and updated data throughout, including revised chapters on patient safety and patient flow challenges and the improvements driven by Lean Detailing the mindsets and methods needed for a successful transition to a Lean culture, the book provides the understanding of Lean practices—including value stream mapping, standardized work, error proofing, root cause problem solving, and daily improvement processes—needed to reduce common hospital errors and improve performance in other dimensions. The balanced approach outlined in this book will guide you through the process of improving the quality of care and service while reducing costs in your hospital. \*The Lean Certification and Oversight Appeals committee has approved Lean Hospitals as recommended reading for those in pursuit of Lean Bronze Certification from SME, AME, Shingo Prize, and ASQ

drugs, intervention rates in childbirth are rising rapidly. Evidence-based Care for Normal Labour and Birth brings to light much of the evidence around what works best for normal birth which has, until now, remained largely hidden and ignored by maternity care professionals. Beginning with the decision about where to have a baby, through all the phases of labour to the immediate post-birth period, it systematically details research and other evidence sources that endorse a low intervention approach. The book: highlights where the evidence is compelling discusses its application where women question its relevance to them and where the practitioner's expertise leads them to challenge it gives background and context before discussing the research to date includes questions for reflection and practice recommendations generated from the evidence. Using research data, Evidence-based Care for Normal Labour and Birth critiques institutionalised, scientifically managed birth and endorses a more humane midwifery-led model. Packed with up-to-date and relevant information, this controversial book will help all students, practising midwives and doulas keep abreast of the evidence surrounding normal birth and ensure their practice takes full advantage of it.

returns to the sun-drenched beaches of Naples, Florida, and the idiosyncratic world of Detective Cab Bolton in this "brilliant" and "chilling" story of political intrigue and murderous revenge that will keep you guessing until the very end. Attractive and popular politician Diane Fairmont is running for the Florida governorship, but a chill is cast over the campaign when she receives an anonymous note announcing the return of the assassin who killed her husband ten years earlier. As Bolton struggles to penetrate the veil of secrecy surrounding the Fairmont campaign, he begins to realize that the death threat is not the only danger faced by the campaign staff. A desperate race against the clock ensues as Bolton tries to unlock the secrets of a poisonous conspiracy before nature provides the perfect cover for a long-dormant killer to strike again.

The beginning of the eighteenth century opened Spain to an influx of people, books and ideas and gave the country its own brief age of Enlightenment. At this time of momentous change, the three authors represented in this volume contributed to the Europe-wide debate over the nature of women and their position in society. Benito Jerónimo Feijoo was an admired scholar and a prolific author. One of his most controversial essays was Defence of Women, which argued that women were men's intellectual equals. This sparked a pamphlet war that continued for twenty-five years. Josefa Amar y Borbón was a writer and translator who submitted her own spirited argument, the Defence of the Talents of Women, to a debate on whether women should be admitted to the new Economic Societies. She also demanded in her Discourse on the Education of Women that women should be given the opportunity to study and learn. At the very end of the century, Inés Joyes y Blake published an Apology for Women, arguing that women should develop self-respect, support each other and refuse to be manipulated by insincere lovers and domineering husbands. All three writers wrote with verve and imagination about one of the most important social questions of their day

This book assesses the state of the art of coatings materials and processes for gas-turbine blades and vanes, determines potential applications of coatings in high-temperature environments, identifies needs for improved coatings in terms of performance enhancements, design considerations, and fabrication processes, assesses durability of advanced coating systems in expected service environments, and discusses the required inspection, repair, and maintenance methods. The promising areas for research and development of materials and processes for improved coating systems and the approaches to increased coating standardization are identified, with an emphasis on materials and processes with the potential for improved performance, quality, reproducibility, or manufacturing cost reduction.

The contents of this book correspond to Sessions VII and VIII of the International Workshop on Instabilities and Nonequilibrium Structures which took place in Viña del Mar, Chile, in December 1997 and December 1999, respectively. Part I is devoted to self-contained courses. Three courses are related to new developments in Bose-Einstein condensation: the first one by Robert Graham studies the classical dynamics of excitations of Bose condensates in anisotropic traps, the second by Marc Etienne Brachet refers to the bifurcations arising in attractive Bose-Einstein condensates and superfluid helium and the third course by André Verbeure is a pedagogical introduction to the subject with special emphasis on first principles and rigorous results. Part I is completed by two courses given by Michel Moreau: the first one on diffusion limited reactions of particles with fluctuating activity and the second on the phase boundary dynamics in a one dimensional nonequilibrium lattice gas. Part II includes a selection of invited seminars at both Workshops.

In Bath, England, good health is an ancient tradition and a booming business. One local font of wellness is the Sulis Clinic, where the rich come for rest, repair, and repasts of strictly organic—and not terribly pleasant—cuisine. World-famous cellist Sara Selkirk has come to Sulis to admit her former music teacher. The poor dear has fallen into decrepitude, and has lately been the unlikely suspect in the shocking murder in a local pub. Distracted from her upcoming Dvorak performance in Salzburg, Sara begins to wonder if there isn't an odd link between Sulis and the murder. But another death soon rocks Sara to her core, leading her to a choice she will regret—and a killer she can no longer avoid.... From the Paperback edition.

Philosophers and logicians have long debated how best to understand conditional or hypothetical sentences. William G. Lycan has a distinctive approach to this debate, attending not just to the semantics of such sentences, but equally to their syntax. He shows how insights from linguistic theory help to illuminate problems about the meaning and function of conditionals. For instance, philosophers and logicians have had problems analysing the locutions 'only if', 'unless', and 'even if'. Lycan sets out a general semantic theory of conditionals which works for all such sentences; he assigns meanings to them in a way that explains how and why those meanings depend upon features of utterance context. According to Lycan's theory the 'if'-clauses refer to items called 'events', 'circumstances', or 'conditions'. Real Conditionals gives at last the definitive presentation of this original approach to a topic at the intersection of philosophy, logic, and linguistics. Lycan's characteristically lively and witty expository style ensures that it can be enjoyed by readers from all three disciplines.

As the photographs demonstrate, this particular mission continues to be a difficult task. Nonetheless, like their "cautiously optimistic" counterparts in the ANA, it is also evident that the Marines believe that their mission will ultimately succeed in Afghanistan and the day will eventually come when U.S. forces can leave the region and Afghanistan will be free from the terror of a violent enemy. Repair and Protection of Concrete Structures presents the latest information regarding the durability and repair of concrete structures. It emphasizes the importance of selecting repair materials to match site and service conditions, using proper repair procedures, and attending to the details of design. Divided into three parts, the book discusses such topics as the properties of new products, the various materials in general use for repair work, selection criteria, methodologies for selecting appropriate repair materials, the behavior of concrete under various environmental conditions, non-destructive evaluation methods for detecting deterioration of structures, and basic repair principles applicable to a wide range of buildings. Engineers, architects, technologists, and contractors should consider this book a valuable tool that provides a much needed survey of current work and thinking regarding degradation and techniques for improving repair work.

Despite the fact that Juarez is a Mexican border city just across the Rio Grande from El Paso, Texas, most Americans are unaware that for more than twelve years this city has been the center of an epidemic of horrific crimes against women and girls, consisting of kidnappings, rape, mutilation, and murder, with most of the victims conforming to a specific profile: young, slender, and poor, fueling the premise that the murders are not random. Indeed, there has been much speculation that the killer or killers are American citizens. While some leading members of the American media have reported on the situation, prompting the U.S. government to send in top criminal profilers from the FBI, little real information about this international atrocity has emerged. According to Amnesty International, as of 2006 more than 400 bodies have been recovered, with hundreds still missing. As for who is behind the murders themselves, the answer remains unknown, although many have argued that the killings have become a

sort of blood sport, due to the lawlessness of the city itself. Among the theories being considered are illegal trafficking in human organs, ritualistic satanic sacrifices, copycat killers, and a conspiracy between members of the powerful Juárez drug cartel and some corrupt Mexican officials who have turned a blind eye to the felonies, all the while lining their pockets with money drenched in blood. Despite numerous arrests over the last ten years, the murders continue to occur, with the killers growing bolder, dumping bodies in the city itself rather than on the outskirts of town, as was initially the case, indicating a possible growing and most alarming alliance of silence and cover-up by Mexican politicians. The Daughters of Juárez promises to be the first eye-opening, authoritative nonfiction work of its kind to examine the brutal killings and draw attention to these atrocities on the border. The end result will shock readers and become required reading on the subject for years to come.

Wellbeing and Quality of Life Assessment is a practical resource for people working in social or development policy and practice who are thinking about integrating wellbeing or quality of life in their work in both the global North and South. The main body of the book presents different tools that have been developed and used in social and development policy and practice, written by NGO professionals. These chapters outline the inspiration behind their approach, how it works, what has been learned through it, and issues and dilemmas that remain. Human development may encompass social, cultural and spiritual facets as well as economic improvement, and development organizations are beginning to recognize this fact. But building into programming a wider understanding of development throws up a number of questions: how do our organizations define wellbeing and quality of life? What do target communities in the global north or south mean by a quality of life? How can we measure change in wellbeing, and attribute it to our programming?

Further to the south, the Minoan civilisation based on Crete held sway, and this power – along with the Helladic Achaeans to the north gradually swamped the Cycladic civilisation in between. Alexandra Brennan is fed up with her dead end New York City job-and even more fed up of running into her smug ex-boyfriend. So when he crosses the line by telling her that she'll never get into graduate school in the United Kingdom, that's precisely what she does. Armed with imported cigarettes and extra strength coffee, Alex leaves home and crosses the Atlantic to face all that Great Britain and grad school have to offer, including ill-considered romantic interludes, a red-headed nemesis with intellectual pretensions and ulterior motives, a preponderance of eighties music, and more books than she can possibly read in a year. What she discovers, however, is that instead of running away from home - she may have actually found it. With a cheeky sense of humor and terrific cast of characters, ENGLISH AS A SECOND LANGUAGE is a funny and irreverent novel about a young woman's misadventures on the path to adulthood.
