was the river, and, as The Big Sandy demonstrates, steamboats did much to shape the culture of the region. Carol Crowe-Carraco offers an intriguing and readable account of this region's history from the days of the venturesome Long Hunters of the eighteenth century, through the bitter struggles of the Civil War and its aftermath, up to the 1970s, with their uncertain promise of a new prosperity. The Big Sandy pictures these changes vividly while showing how the turbulent past of the valley lives on in the region's present.

Jerome Corsi's newest opus, *No Greater Valor*, examines the Siege of Bastogne—one of the most heroic victories of WWII—with a focus on the surprising faith of the Americans who fought there. In December of 1944, an outmanned, outgunned, and surrounded US force fought Hitler's overwhelming Panzer divisions to a miraculous standstill at Bastogne. The underdogs had saved the war for the Allies. It was nothing short of miraculous. Corsi's analysis is based on a record of oral histories along with original field maps used by field commanders, battle orders, and other documentation made at the time of the military command. With a perspective gleaned from newspapers, periodicals, and newsreels of the day, Corsi paints a riveting portrait of one of the most important battles in world history.

processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

Killers of Man

During forty years of caring for districts of churches and isolated believers, besides raising up new churches by evangelistic effort, the author of this work became greatly impressed with the need of educating the people in the fundamental doctrines of the Holy Scriptures. He has found very few who could give from the word of God an intelligent reason for even its most prominent and important truths. This spiritual poverty any minister will discover by personal investigation. When we add to this condition the fact that during the past thirty years new errors have been stealthily introduced among Christians generally--errors which undermine the very foundations of Bible truth and Christianity--it becomes evident that even professing Christians are unprepared for the crises they will be obliged to meet in the near future.
