Unable to conceive, Julia and Gavin Jones head to Hope Infertility Clinic. The couple is put through a series of embarrassing exams, testing the limit of their libidos. After receiving the results, Mr. Jones is outraged at the fault being his. Having once suffered a fate of infertility himself, Dr. Raymond Breeding has dedicated his life to the world of conception. If anyone can cure the couples' ailment, it's him. However, the closer he examines the female patient, the heavier his heart grows. Removing Gavin from the equation, he decides to cure her with an injection of his own.

BMW's Bavarian blue and white propeller logo harks back to its early twentieth-century roots as an aircraft engine manufacturer. How this venerable company weathered two world wars, moved from aircraft to motorcycles and, finally, to the cars that would provide its greatest glory is the remarkable story recounted in this book. With unique access to BMW's factories and archives, author Graham Robson

gives readers an inside look at how the great German automaker works and how its methods have evolved over the decades. Visiting factories throughout Germany and in the United States he offers readers a rare, behind the scenes, nuts-and-bolts account of how BMW produces its famed models. Illustrated with rare photographs from BMW's own archives, this book constitutes an unprecedented tour of the history and culture of one of the world's great automakers.

Wolseley was one of Britain's leading car manufacturers in vintage days. Its two early managers, Austin and Siddeley, became famous for their own makes of car and Wolseley made a fascinating assortment of products from sledges for Scott of the Antarctic to Count Schilowsky's two-wheel Gyrocar. Austin and Morris fought American firms for its ownership in the 1920s, Morris winning eventually in 1927. The name was used for upmarket versions of first the Morris and then BMC models of the 1950s, when the cars were widely used by the police.

Volkswagen Jetta Service Manual

Written for the do-it-yourselfer, good enough for the pro. Includes everything you wish to know about your vehicles heating and air conditioning. From simple adjustments, to complete tune-ups and troubleshooting.

BMW Enthusiast's Companion

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

Lemon-Aid New Cars and Trucks 2010

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

John Haynes

The #1 New York Times–bestselling humorist’s tribute to car travel is “a ride worth taking, even for readers who don’t know an oil pan from a frying pan” (The Washington Times). From a veteran of both Car and Driver and National Lampoon magazines, this hilarious book chronicles the golden age of the automobile in America—and takes us on a whirlwind tour of the world’s most scenic and bumpiest roads in trouble-laden cross-country treks, from a 1978 Florida-to-California escapade in a 1956 special four-door Buick sedan, to a thousand-mile effort across Mexico in the Baja 1000 in 1983, to a journey through Kyrgyzstan in 2006 on the back of a Soviet army surplus six-wheel-drive truck. For longtime fans of the celebrated humorist, the collection features a host of O’Rourke’s classic pieces on driving, including “How to Drive Fast on Drugs While Getting Your Wing-Wang Squeezed and Not Spill Your Drink,” about the potential misdeeds one might perform in the front (and back) seat of an automobile; “The Rolling Organ Donors Motorcycle Club,” which chronicles a seven-hundred-mile weekend trip through Michigan and Indiana that O’Rourke took on a Harley-Davidson; his brilliant and funny piece from Rolling Stone on NASCAR and its peculiar culture recorded during an alcohol-fueled weekend in Charlotte, North Carolina, in 1977; and an hilarious account of a ride from Islamabad to Calcutta in Land Rover’s new Discovery Trek. “Never in neutral, O’Rourke offers laughter on wheels.” —Publishers Weekly “An insightful look not just at the American love affair with cars, but also at one man’s changing outlook on life, all of it fast-paced and over the top . . . Even readers who know nothing about cars and motorcycles will appreciate the joy and hilarity of this book.” —Booklist

101 Performance Projects for Your BMW 3 Series 1982-2000

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many

modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.
