A Text-book in General Zoölogy

Aimed at medical students and junior doctors, A Textbook of General Practice 2e incorporates the essential information that a student needs to know and understand about general practice and being a general practitioner. The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and practice. It addresses changes in the curriculum and provides guidance on practical skills, the theory of providing good medicine and the larger considerations of encouraging life long learning and professional development. This is a relatively new approach, in line with the GMCs recommendations and the MRCGP exams. The new edition builds on the successful formula of the first, by thoroughly reviewing and revising all content. Self-assessment sections have been added to all chapters and a glossary of terms is included at the end of the book. Thinking/discussion points have been extended and additional student quotes included.

A Textbook in General Zoology

An essential guide to general practice and being a general practitioner, A Textbook of General Practice is written specifically with the medical student and foundation doctor in mind. Reflecting current practice, the book does not seek to reiterate the content of a general medical textbook, but instead teaches the fundamental principles of general practice. The coverage is comprehensive, with everything the undergraduate student or foundation doctor will encounter in a general practice module or rotation. The skills and knowledge presented can usefully be applied to all areas of clinical practice. With practical exercises throughout the book, readers are encouraged to learn through doing. Quotes from students and tutors offer insights into personal experience, while thinking and discussion points encourage reflection. New features in this edition include improved organization, "red flag" pointers to serious illnesses, and SBA-style self assessment questions. With content entirely updated to reflect the latest recommendations from Tomorrow's Doctors, the third edition of A Textbook of General Practice is the number one choice for undergraduates seeking a narrative introduction to this important discipline.

Text-book of General Physics for High School and Colleges

Misconceptions, misunderstandings, and flawed facts finally get the heave-ho in this humorous, downright humiliating book of reeducation based on the phenomenal British bestseller. Challenging what most of us assume to be verifiable truths in areas like history, literature, science, nature, and more, *The Book of General Ignorance* is a witty “gotcha” compendium of how little we actually know about anything. It'll have you scratching your head wondering why we even bother to go to school. Think Magellan was the first man to circumnavigate the globe, baseball was invented in America, Henry VIII had six wives, Mount Everest is the tallest mountain? Wrong, wrong, wrong, and wrong again. You'll be surprised at how much you don't know! Check out *THE BOOK OF GENERAL IGNORANCE* for more fun entries and complete answers to the following: How long can a chicken live without its head? About two years. What do chameleons do? They don't change color to match the background. Never have; never will. Complete myth. Utter fabrication. Total Lie. They change color as a result of different emotional states. How many legs does a centipede have? Not a hundred. How many toes has a two-toed sloth? It's either six or eight. Who was the first American president? Peyton Randolph. What were George Washington's false teeth made from? Mostly hippopotamus. What was James Bond's favorite drink? Not the vodka martini.
