As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

In *With Roots & Wing*, Jay McDaniel brings together insights from the natural sciences, Christian theology, and interreligious dialogue, breaking new ground in the search for a wholistic spirituality for our time. Taking this title from the Jewish proverb--that we must give our children both roots and wings--McDaniel shows how this applies to our spiritual lives as well. *With Roots and Wings* offers an alternative to the contemporary dilemmas of empty consumerism and rigid fundamentalism, consisting of three basic, interrelated approaches to being: to be rooted in the Earth and religious tradition; to be open to the insights of people of other faiths as well as to share our own; and to become centered on God. McDaniel shows where the "new universe story" of Thomas Berry and Brian Swimme and the Christian story meet and differ, where they complement, and where they supplement one another. *With Roots & Wings* shows how to experience both "green grace" that comes from opening one's self to the rhythms of the cosmos, and "red grace" symbolized in the crucifixion of Christ--both of which are vital to a Christian ecological spirituality and praxis. Most impressive is McDaniel's ability to absorb and reflect important lessons Christians can learn from Native Americans, from Buddhists and Hindus, from Muslims and Jews. The complexity of the issues he addresses and his ability to explain them simply and clearly makes *With Roots and Wings* must-reading for the general reader as well as ecological activists, clergy, and laity alike. Nothing else comes near it in depth, power, and insight.

### **Love's Rite**

Globalization and high-speed communication put twenty-first century people in contact with adherents to a wide variety of world religions, but usually, valuable knowledge of these other traditions is limited at best. On the one hand, religious stereotypes abound, hampering a serious exploration of unfamiliar philosophies and practices. On the other hand, the popular idea that all religions lead to the same God or the same moral life fails to account for the distinctive origins and radically different teachings found across the world's many religions.

*Understanding World Religions* presents religion as a complex and intriguing matrix of history, philosophy, culture, beliefs, and practices. Hexham believes that a certain degree of objectivity and critique is inherent in the study of religion, and he guides readers in responsible ways of carrying this out. Of particular importance is Hexham's decision to explore African religions, which have frequently been absent from major religion texts. He surveys these in addition to varieties of Hinduism, Buddhism, Judaism, Christianity, and Islam.

*Siddhartha* is a 1922 novel by Hermann Hesse that deals with the spiritual journey of self-discovery of a man named Siddhartha during the time of the Gautama Buddha. The book, Hesse's ninth novel, was written in German, in a simple, lyrical style. It was published in the U.S. in 1951 and became influential during the 1960s. Hesse dedicated the first part of it to Romain Rolland and the second to Wilhelm Gundert, his cousin. The word Siddhartha is made up of two words in the Sanskrit

language, siddha (achieved) + artha (what was searched for), which together means "he who has found meaning (of existence)" or "he who has attained his goals". In fact, the Buddha's own name, before his renunciation, was Siddhartha Gautama, Prince of Kapilvastu. In this book, the Buddha is referred to as "Gotama".

This is the first book to examine the same-sex weddings and same-sex couple suicides reported in India over the last two decades. Ruth Vanita examines these cases in the context of a wide variety of same-sex unions, from Fourteenth-century narratives about co-wives who miraculously produce a child together, to Nineteenth-century depictions of ritualized unions between women, to marriages between gay men and lesbians arranged over the internet. Examining the changing legal, literary, religious and social Indian and Euro-American traditions within which same-sex unions are embedded, she brings a fresh perspective to the gay marriage debate, suggesting that same-sex marriage dwells not at the margins but at the heart of culture. *Love's Rites* by Ruth Vanita is a finalist for a Lambda Literary Award.
