Crimes Against The State

The aim of this book is to assess recent developments in international law seeking to bring an end to impunity by bringing to justice those accused of war crimes and crimes against humanity. The book was originally conceived while the editors were engaged, in different capacities, in proceedings relating to the detention of Senator Pinochet in London. The vigorous public debate that attended that case - and related developments in international criminal justice, such as the creation of the International Criminal Court and the trial of former President Milosevic - demonstrate the close connections between the law and wider political or moral questions. In the field of international criminal justice there appeared, therefore, a clear need to distinguish legal from essentially political issues - promoting the application of the law in an impartial and apolitical manner - while at the same time enabling each to legitimately inform the development of the other. The essays in this volume, written by internationally recognised legal experts: scholars, practitioners, judges - explore a wide range of subjects, including immunities, justice in international and mixed courts, justice in national courts, and in a

particularly practical section, perspectives offered by experienced practitioners in the field. "This is a welcome collection of papers on criminal justice both at the international and the national level a book which fills many gaps and adds considerable value by discussing wider policy and moral issues; it is to be recommended to all who are interested in the development of international criminal justice." Crimes Against Humanity in International Criminal Law

The author is a sociologist who has written extensively on human rights and recently on climate change. In her new book she develops the idea that protecting everyone's human rights and slowing planetary warming are the same goals. It is now clear that the leader of the richest, most powerful country in the world - United States President Donald J. Trump - has set the trigger of destruction by exempting the United States from the international treaty that aims to give the entire planet some reprieve from warming. That is, all countries of the world have entered into an agreement to end reliance on fossil fuels, except the United States, which withdrew at the outset of the Trump Administration. Regardless of the US

position in the future, the country's emissions are so very extremely high they will continue to wreck havoc on the entire world. While Blau maintains that President Trump has committed a crime against Humanity, even beyond his tenure the book sets the stage for a human rights approach to climate change for the future.

Justice for Crimes Against Humanity

Each year, countless people fall victim to crimes against humanity. These include widespread occurrences of systematic murder, torture, rape, disappearances, forced deportation and political persecution. Crimes against humanity constitute an attack on human dignity and as such they violate the human rights of the victim, as well as the laws of humanity. In recent years, following the creation of the International Criminal Court, there has been a growing interest in the prosecution of offenders and, in particular, in reparation following crimes against humanity. While such measures are meant to provide justice for victims, victims are often forgotten or lost in legal debates about what constitutes reparation and who is eligible to receive it. This book reaches beyond the boundaries of law and psychology and takes a multidisciplinary approach to the question of reparation for victims of crimes against humanity. Law does not take place in a vacuum and it is important to consider the impact of the law on the psychology of the victim, as well as the legal principles themselves. Herein lies the originality of this book, which bridges the gaps between psychology, victimology, criminology and law and will be

International Law: A Dictionary is a pathbreaking study of the development of international law from the earliest times to the present for students, scholars, legal professionals, and other interested readers. Combining the features of a brief encyclopedic dictionary and a textbook, readers are acquainted with the basic tenets of public international law. Preceding the main text are a list of acronyms and abbreviations, a glossary of Latin phrases, a chronology of major developments, a table of cases with references to entries and a list of the 373 entries. Numerous cross-references lead the reader to relevant entries, and the abundant references to primary sources, mostly treaties and court cases, enable the reader to locate research materials. The selected bibliography includes books, research aids, textbooks, and casebooks as well as recent books on special international law topics.

On the tenth anniversary of the September 11, 2001 terrorist attacks, David Ray Griffin reviews the troubling questions that remain unanswered 9/11 Ten Years Later is David Ray Griffin's tenth book about the tragic events of September 11, 2001. Asking in the first chapter whether 9/11 justified the war in Afghanistan, he explains why it did not. In the following three chapters, devoted to the destruction of the World Trade Center, Griffin asks why otherwise rational journalists have endorsed miracles (understood as events that contradict laws of science). Also, introducing the book's theme, Griffin points out that 9/11 has been categorized by some social scientists as a state crime against democracy. Turning next to debates within the 9/11 Truth Movement, Griffin reinforces his claim that the reported phone calls from the airliners were faked, and argues that the intensely debated issue about the Pentagon—whether it was struck by a Boeing 757—is quite unimportant. Finally, Griffin suggests that the basic faith of Americans is not Christianity but "nationalist faith"—which most fundamentally prevents Americans from examining evidence that 9/11 was orchestrated by U.S. leaders—and argues that the success thus far of the 9/11 state crime against democracy need not be permanent.

9/11 Ten Years Later

The 2010 Kampala Amendments to the Rome Statute empowered the International Criminal Court to prosecute the 'supreme crime' under international law: the crime of aggression. This landmark commentary provides the first analysis of the history, theory, legal interpretation and future of the crime of aggression. As well as explaining the positions of the main actors in the negotiations, the authoritative team of leading scholars and practitioners set out exactly how countries have themselves criminalized illegal war-making in domestic law and practice. In light of the anticipated activation of the Court's jurisdiction over this crime in 2017, this work offers, over two volumes, a comprehensive legal analysis of how to

Ending Violence Against Women

Crimes by the Capitalist State systematically examines a broad spectrum of state criminality including state terrorism, torture and murder, drug smuggling and arms trafficking, espionage and surveillance, and violations of internationally established human rights. While exploring crimes by the state from both a national and international perspective, this book also reflects the latest scholarship in comparative political and social science, especially as these relate to current developments in the political economy, the study of crimes by the powerful, and theories on state and social control. This book stresses the importance of studying crimes by the state as a prerequisite for peacemaking worldwide. For example, state crimes such as the Iran-Contra Affair or the apartheid policies of South Africa should become the subject matter of criminologists and lay persons alike. The collective evidence gathered here demonstrates that state criminality is primarily an organizational and structural phenomenon, and only secondarily an individual phenomenon, whether committed for ideological reasons or for personal profit.

Crimes Against Nature provides a systematic account and analysis of the key concerns of green criminology, written by one of the leading authorities in the field. The book draws upon the disciplines of environmental studies, environmental sociology and environmental management as well as criminology and socio-legal studies, and draws upon a wide range of examples of crimes against the environment – ranging from toxic waste, logging, wildlife smuggling, bio-piracy, the use and transport of ozone depleting substances through to illegal logging and fishing, water pollution and animal abuse. The book is divided into three parts: Part 1 sets out theoretical approaches and perspectives on the subject; Part 2 explores the (national and international) dimensions of environmental crime and the explanations for it; Part 3 deals with the range of responses to environmental crime - environmental law enforcement, regulation, environmental crime prevention and the role of global institutions and movements.

State Crime

This book traces the evolution of crimes against humanity (CAH) and their application from the end of World War I to the present day, in terms of both historic legal analysis and subject-matter content. The first part of the book addresses

general issues pertaining to the categorization of CAH in normative jurisprudential and doctrinal terms. This is followed by an analysis of the specific contents of CAH, describing its historic phases going through international criminal tribunals, mixed model tribunals and the International Criminal Court. The book examines the general parts and defenses of the crime, along with the history and jurisprudence of both international and national prosecutions. For the first time, a list of all countries that have enacted national legislation specifically directed at CAH is collected, along with all of the national prosecutions that have occurred under national legislation up to 2010.

Organised crime, corruption, and terrorism are considered to pose significant and unrelenting threats to the integrity, security, and stability of contemporary societies. Alongside traditional criminal enforcement responses, strategies focused on following the money trail of such crimes have become increasingly prevalent. These strategies include anti-money laundering measures to prevent 'dirty money' from infiltrating the legitimate economy, proceeds of crime powers to target the accumulated assets derived from crime, and counter-terrorist financing measures to prevent 'clean' money from being used for terrorist purposes. This collection brings together 17 emerging researchers in the fields of anti-money laundering, proceeds of crime, counter-terrorist financing and corruption to offer critical analyses of contemporary anti-assets strategies and state responses to a range of financial crimes. The chapters focus on innovative anti-financial crime measures and assemblages of governance that have become a feature of late modernity and on the ways in which individual nation states have responded to anti-money laundering and counter-terrorist financing requirements in light of their specific social, political, and economic contexts. This collection draws on perspectives from law, criminology, sociology, politics, and other disciplines. It adopts a much-needed international approach, focusing not only on expected jurisdictions, such as the United States and United Kingdom, but also on analysis from countries such as Qatar, Kuwait, Iran, and Nigeria. The authors stand out for their fresh and original

Genocide, State Crime and the Law critically explores the use and role of law in the perpetration, redress and prevention of mass harm by the state. In this broad ranging book, Jennifer Balint charts the place of law in the perpetration of genocide and other crimes of the state together with its role in redress and in the process of reconstruction and reconciliation, considering law in its social and political context. The book argues for a new approach to these crimes perpetrated 'in the name of the state' - that we understand them as crimes against humanity with particular

institutional dimensions that law must address to be effective in accountability and as a basis for restoration. Focusing on seven instances of state crime - the genocide of the Armenians by the Ottoman state, the Holocaust and Nazi Germany, Cambodia under the Khmer Rouge, apartheid South Africa, Ethiopia under Mengistu and the Dergue, the genocide in Rwanda, and the conflict in the former Yugoslavia - and drawing on others, the book shows how law is companion and collaborator in these acts of nation-building by the state, and the limits and potentials of law's constitutive role in post-conflict reconstruction. It considers how law can be a partner in destruction yet also provide a space for justice. An important, and indeed vital, contribution to the growing interest and literature in the area of genocide and post-conflict studies, *Genocide, State Crime and the Law* will be of considerable value to those concerned with law's ability to be a force for good in the wake of harm and atrocity.

The Oxford Handbook of Roman Law and Society surveys the landscape of contemporary research and charts principal directions of future inquiry. More than a history of doctrine or an account of jurisprudence, the Handbook brings to bear upon Roman legal study the full range of intellectual resources of contemporary legal history, from comparison to popular constitutionalism, from international private law to law and society, thereby setting itself apart from other volumes as a unique contribution to scholarship on its subject. The Handbook brings the study of Roman law into closer alignment and dialogue with historical, sociological, and anthropological research into law in other periods. It will therefore be of value not only to ancient historians and legal historians already focused on the ancient world, but to historians of all periods interested in law and its complex and multifaceted relationship to society.

Crimes against History takes a global approach to the extreme forms of censorship to which history and historians have been subjected through the ages. The book opens by considering the varieties of censorship, from suppression, dismissal, and defamation to persecution and murder. Part I, "Kill switch," tells the tragic story of how the censorship of history has sometimes turned into deadly crimes against history, with chapters looking at topics such as historians and archivists being killed for political reasons, attacks by political leaders on historians, iconoclastic breaks with the past, and fake news. Part II, "Fragile freedom," reverses the perspective and examines how the censorship of history has backfired. Chapters consider the subversive power of historical analogies and resistance to the censorship of history. The book also contains a "Provisional memorial for history producers killed for political reasons (from ancient times until 2017)". It is a double tribute: to the history producers who were killed and to those who mustered the

Comparing case studies from across the world and written from a human rights perspective, Crimes against History is an essential resource for anyone interested in how deeply history and politics influence each other, as well as for anyone wanting a fuller view of the history of history.

Crimes against Nature reveals the hidden history behind three of the nation's first parklands: the Adirondacks, Yellowstone, and the Grand Canyon. Focusing on conservation's impact on local inhabitants, Karl Jacoby traces the effect of criminalizing such traditional practices as hunting, fishing, foraging, and timber cutting in the newly created parks. Jacoby reassesses the nature of these "crimes" and provides a rich portrait of rural people and their relationship with the natural world in the late nineteenth and early twentieth centuries.

Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as Islamic, Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law's place in the projects of comparative law, transnational, and international law.

When it was first published in 1999, *Crimes Against Humanity* called for a radical shift from diplomacy to justice in international affairs. In vivid, non-legalese prose, leading human rights lawyer Geoffrey Robertson made a riveting case for holding political and military leaders accountable in international courts for genocide, torture, and mass murder. Since then, fearsome figures such as Charles Taylor, Laurent Gbagbo, and Ratko Mladic´ have been tried in international criminal court, and a global movement has rallied around the human rights framework of justice. Any such legal framework requires constant evolution in order to stay relevant, and this newly revised and expanded volume brings the conversation up to date. In substantial new chapters, Robertson covers the protection of war correspondents, the problem of piracy, crimes against humanity in Syria, nuclear armament in Iran, and other challenges we are grappling with today. He criticizes the Obama administration’s policies around “targeted killing” and the trials of Khalid Sheik Mohammed and other “high value” detainees. By rendering a complex debate accessible, Robertson once again provides an essential guide for anyone looking to understand human rights and how to work toward a more complete blueprint for justice.
