examples designed to assist you in assessment, planning, interventions, and outcomes to promote healthy aging Critical Thinking Questions and Activities assist you in developing critical thinking skills related to chapter and nursing study content and include suggestions for in-classroom activities to enhance learning. Content consistent with the core competencies for geriatric nursing incorporates the Recommended Baccalaureate Competencies and Curricular Guidelines for the Nursing Care of Older Adults, the Geriatric Nursing Education State of the Science Papers, and the Hartford Institute for Geriatric Nursing Best Practices in Nursing Care to Older Adults. The latest information on biological theories of aging and evolving genomic research covers current findings on these timely issues. Research Highlights Boxes highlight important research studies in the field of gerontology Research Questions found at the end of chapters gives you a chance to do further research outside of your book study to give you a better grasp of the field as a whole. Safety Alert Boxes emphasize important safety tips to consider while working in a clinical setting. Resources for Best Practice boxes contain suggestions for further information on various chapter topics and tools for practice. Tips for Best Practice boxes feature summarized lists of evidence-based nursing interventions for practice. Healthy People boxes reference the goals cited in Healthy People 2020. NEW! Additional coverage of frailty in older adults helps you to understand the precautions you need to take when working with this population. NEW! Increased information on Health Literacy assists you in learning the right terms to promote healthy aging. NEW! Added information on herbs/supplements

includes essential oils and green tea.

Health Promotion Throughout the Life Span

One of the most complete nursing education learning systems available, Virtual Clinical Excursions guides you through a virtual hospital setting where the patients are real and their conditions are constantly changing. By immersing yourself in a realistic, yet safe, nursing environment, VCE allows you to get acclimated to the routine and rigors of the average clinical rotation where you can conduct a complete assessment of a patient and set priorities for care, collect data, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital, which provide a perfect environment in which you may "practice" what you are learning.

Gerontological Nursing

The most comprehensive of its kind, *Nursing Theorists and Their Work*, 8th Edition provides an in-depth look at 39 theorists of historical, international, and significant importance. Each chapter features a clear, consistent presentation of a key nursing philosophy or theory. Case studies, critical thinking activities, and in-depth

Read Online Ebersole And Hess Gerontological Nursing And Healthy Aging Elsevier Ebook On VitalSource Retail Access Card

objective critiques of nursing theories help bridge the gap between theory and application. Critical Thinking Activities at the end of each theorist chapter help you to process the theory presented and apply it to personal and hypothetical practice situations. A case study at the end of each theorist chapter puts the theory into a larger perspective, demonstrating how it can be applied to practice. A Brief Summary in each theorist chapter helps you review for tests and confirm your comprehension. A Major Concepts & Definitions box included in each theorist chapter outlines the theory's most significant ideas and clarifies content-specific vocabulary. Each theorist chapter is written by a scholar specializing in that particular theorist's work, often having worked closely with the theorists, to provide the most accurate and complete information possible. Beginning chapters provide a strong foundation on the history and philosophy of science, logical reasoning, and the theory development process. Diagrams for theories help you visualize and better understand inherently abstract concepts. Pictures of theorists, as well as a listing of contact information for each individual, enables you to contact the source of information directly. Theorist chapters have been reviewed and edited by the theorist, validating the accounts set forth in the text for currency and accuracy. An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information, ideal for both undergraduate and graduate research projects. NEW! Quotes from the theorist make each complex theory more memorable. NEW! Chapter on Afaf Meleis profiles a theorist who has shaped theoretical development in nursing and explores her

her into assisted living? When hell freezes over. He can't bring himself to force her from the home both treasure—the place where his father's voice lingers, the scene of shared jokes, skirmishes, and, behind the dusty antiques, a rarely acknowledged conflict: Betty, who speaks her mind but cannot quite reveal her heart, has never really accepted the fact that her son is gay. As these two unforgettable characters try to bring their different worlds together, Hodgman reveals the challenges of Betty's life and his own struggle for self-respect, moving readers from their small town—crumbling but still colorful—to the star-studded corridors of Vanity Fair. Evocative of *The End of Your Life Book Club* and *The Tender Bar*, Hodgman's New York Times bestselling debut is both an indelible portrait of a family and an exquisitely told tale of a prodigal son's return. From the Hardcover edition.

Geriatric Nursing

TOWARD HEALTHY AGING is based on Maslow's conceptual framework of human needs from the basic to the transcendental. With a focus on wellness and healthy aging, this fifth edition emphasizes the individuality of the aged and the humanistic and spiritual potential for further development in late life. Disease processes are discussed in the context of healthy adaptation, nursing support and responsibilities. The text is organized from the basic to the complex in terms of understanding the aged and their needs. Extensive current references, nursing care plans, case studies, student activities, research questions, resources, and appendixes are included in each chapter. * Focuses on health and wellness to establish a positive perspective to aging. * Discusses disease processes in the context of healthy adaptation, nursing support and responsibilities to help the reader gain an understanding of their client's experience. * Integrates considerations for age, cultural, and gender differences throughout to help the nurse understand these important aspects of caring for older adults. * Provides a consistent chapter organization including objectives, nursing care plans, research

questions, and study questions/activities to make information easy to find and use. * Includes case studies at end of every chapter to expand student knowledge and understanding. * Features a separate chapter on laboratory values including comparisons and implications for the aged. * Integrates federal guidelines for Healthy People 2000 that reflect current practice about healthy aging considerations. * Includes appendices and resource lists to assist the student in further exploration of material.

Nursing Older Adults

Effectively learning pharmacology requires students to clearly see the connection between pharmacology, disease and patient care. Pharmacology for Nurses, 3e (this is the standalone book) is structured to present pharmacology and pathology together, so students can more easily grasp the interrelationship between these subjects and provide a holistic perspective to patient care. A prototype approach, easy to follow presentation and extensive pedagogical aids enable students to understand key concepts and apply essential components of nursing care to drug therapy. particular needs in the critical care setting." --AJN "[This] book's contents run the gamut of elder problems and care: physiology, pharmacology, nutrition, restraints, substance abuse.it is a compendium that can be used as a text or a resource."

--Claire M. Fagin, PhD, RN, FAAN (From the Foreword) This book is an evidence-based, best-practices guide that directs the bedside care of critically ill elders. The book serves as a reference on major clinical issues for nurses working at the forefront of care-from nurses in critical care and step-down units to those in trauma and emergency departments. Nurse educators at all degree levels will also find this book to be useful as a textbook and resource for students. The authors provide evidence-based, practical guidelines for both the complex clinical and management aspects of care. The book offers comprehensive coverage of all the issues caregivers need to be up to date on, including the standards of practice for geriatric care, new technologies, pharmacotherapy, pain management issues, ethical issues, and much more. Key topics discussed: Strategies for patient safety for older patients in the intensive care setting Family responses to critical care of the older adult Infection, sepsis, and immune function Understanding and managing sleep disorders in older patients in the ICU Heart failure in the critically ill older patient Substance abuse and withdrawal in elderly patients

With DocuCare availability, this new edition also connects textbook resources with clinical and simulation setting via supplementary resources.

Toward Healthy Aging

Evidence-Informed Approaches for Managing Dementia Transitions provides evidence-informed approaches and future directions for supporting a higher quality of life for people living with dementia. Through a person-centered lens, this book equips care providers to better help people living with dementia align their expectations and hopes with the trajectories they can expect in their journey. It highlights the various transitions that those with dementia will experience and describes best practices for optimal adjustment to each. Topics covered include problem identification, driving cessation, loss of financial autonomy, acute hospital admission, moving to assisted living residences and long term care homes, and palliative and end of life care. This is a must have reference for researchers, clinicians, and mental health professionals (psychologists, counsellors, social workers, mental health nurses) as well as policy makers and other health and social care providers working with individuals with dementia. Emphasizes empowerment and quality of life for all those living with dementia Explores

Chapter on Neurologic Compromise expands content on stroke and Parkinson's disease.

Gerontological Nursing

A combined text and student workbook, *Anatomy of Orofacial Structures: A Comprehensive Approach, Enhanced 7th Edition*, makes it easy to understand oral histology and embryology, dental anatomy, and head and neck anatomy. Now in full color, the book includes more than 800 images, as well as review questions and detachable flashcards for convenient, on-the-go study. Clear coverage provides a solid foundation for students in dental assisting and dental hygiene programs. From longtime dental educators Richard Brand and Donald Isselhard, this book provides a complete learning package! Comprehensive coverage of oral histology and embryology, dental anatomy, and head and neck anatomy - makes this a single source for oral anatomy. More than 800 detailed anatomical illustrations support the material, including labeled line drawings, radiographs, and

clinical photographs. Text/Workbook format includes a perforated workbook section with chapter-by-chapter questions. Removable flashcards feature an image of a tooth on one side and that tooth's identifying/important information on the other side, providing an easy and effective study tool. A logical organization puts the most foundational information first, starting with dental anatomy and followed by oral histology and embryology, and then head and neck anatomy. NEW! Full-color art program features more than 800 images - illustrations, clinical photos, and radiographs.

Essentials of Nursing Research

Gerontological Nursing & Healthy Aging provides thorough coverage of promoting healthy aging when caring for older adults. The intent throughout the book is to facilitate the healthiest adaptation possible for any older adult, regardless of the situation and disease process. The majority of the book is devoted to discussing the significant problems that may occur and methods that nurses may use to make these problems more bearable, to solve some, and to help the elder find the best possible resolution towards healthy aging. Incorporates healthy aging strategies to maximize the healthiest behaviors of clients/patients with dementia and their caregivers. Disease processes are discussed in the context of healthy adaptation, nursing support & responsibilities to help the reader gain an understanding of their client's experience. Focus on health and wellness establishes a positive

perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help the nurse understand these important considerations in caring for older adults. Each chapter provides a consistent organization including learning objectives, research & study questions/activities. Assessment guidelines are incorporated throughout as tables, boxes, and forms to provide useful tools for practice. Activities and discussion questions at the end of every chapter provide situations to expand student knowledge and understanding. Appendices and resource lists assist in further exploration of material. Text correlates with federal guidelines for Healthy People 2010 to assist the student in integrating knowledge about healthy aging considerations. Expanded content on pharmacologic and nonpharmacologic pain management in Chapter 15 and integrated within appropriate content sections. Completely revised Culture and Aging chapter includes discussions of health disparities and working with interpreters to help identify nursing care interventions appropriate for ethnic elders. New author team with Theris Touhy and Kathleen Jett adds a wealth of experience related to gerontological nursing education and research.

Ebersole & Hess' Toward Healthy Aging - E-Book

"Gerontologic Nursing" is best known for its comprehensive coverage of health promotion and basic and complex gerontologic concepts and issues, as well as the most common medical-surgical problems associated with the older adult. The book

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This text covers the theory and practice of wellness-oriented gerontological nursing, addressing both physiologic and psychosocial aspects of aging. Organized around the author's unique Functional Consequences Theory, the book explores age-related changes as well as the risk factors that often interfere with optimal health and functioning. Key features include: NEW! Technology to Promote Wellness in Older Adults boxes describe examples of technology-based interventions that can be effective for promoting wellness for older adults. NEW! Interprofessional Collaboration (IPC) material, which is found in boxes or is highlighted with orange bars in the margins, indicates the responsibilities of nurses to collaborate with other professionals and paraprofessionals in health care and community-based settings when caring for older adults. NEW! Global Perspective boxes provide examples of the various ways in which health care professionals in other countries provide care for older adults. NEW! Unfolding Patient Stories, written by the National League for Nursing, are an

engaging way to begin meaningful conversations in the classroom. These vignettes, which open each unit, feature patients from Wolters Kluwer's vSim for Nursing | Gerontology (co-developed with Laerdal Medical) and DocuCare products; however, each Unfolding Patient Story in the book stands alone, not requiring purchase of these products. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. NEW! Transitional Care Unfolding Case Studies, which unfold across Chapters 27 through 29, to illustrate ways in which nurses can provide effective transitional care to an older adult whose progressively worsening condition requires that her needs be met in several settings. For your convenience, a list of these case studies, along with their location in the book, appears in the "Case Studies in This Book" section later in this frontmatter. Updated unfolding case studies illustrate common experiences of older adults as they progress from young-old to old-old and are affected by combinations of age-related changes and risk factors. Evidence-based information is threaded through the content and summarized in boxes in clinically oriented chapters. Assessment and intervention guidelines help nurses identify and address factors that affect the functioning and quality of life of older adults. Nursing interventions focus on teaching older adults and their caregivers about actions they can take to promote wellness. Case studies include content on transitional care, interprofessional collaboration, and QSEN!

Elsevier's Psychiatric Nursing

A sound knowledge of biochemistry is essential to understand the pathophysiology of disease, its diagnosis, treatment, and follow up. Since the nursing community works closely in association with clinicians in-patient care, it is important for them to be aware of the biochemical aspects of human diseases. Textbook of Biochemistry for Nurses has been designed to cater the academic needs of the nursing students. An earnest effort has been made to present the subject in simple words. In this textbook, wherever necessary, clinical application of biochemical knowledge is mentioned. The information present in this textbook will be helpful to the nurses throughout their career.

Pharmacology for Nurses

Get all the knowledge you need to provide effective care for adults as they age. Grounded in the core competencies recommended by the AACN in collaboration with the Hartford Institute for Geriatric Nursing, Ebersole & Hess' *Toward Healthy Aging*, 9th Edition is the only comprehensive text to address all aspects of gerontological nursing care. The new ninth edition has been extensively revised and updated and now includes shorter, more streamlined chapters and pedagogical features to facilitate learning, covering the areas of safety and ethical

considerations, genetics, communication with the patient and caregiver, promoting health in persons with conditions commonly occurring in later-life world-wide addressing loss and palliative care and much more. This new edition considers the experience of aging as a universal experience and the nurse's role in the reduction of health disparities and inequities as a member of the global community. Plus, it contains a variety of new learning features that focus the readers' attention on applying research and thinking critically in providing care to aging adults across the care continuum.

Bettyville

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical

practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-
