Writing is not like chemical engineering. The figures of speech should not be learned the same way as the periodic table of elements. This is because figures of speech are not about hypothetical structures in things, but about real potentialities within language and within ourselves. The "figurings" of speech reveal the apparently limitless plasticity of language itself. We are inescapably confronted with the intoxicating possibility that we can make language do for us almost anything we want. Or at least a Shakespeare can. The figures of speech help to see how he does it, and how we might. Therefore, in the chapters presented in this volume, the quotations from Shakespeare, the Bible, and other sources are not presented to exemplify the definitions. Rather, the definitions are presented to lead to the quotations. And the quotations are there to show us how to do with language what we have not done before. They are there for imitation.

The Single Girl's Guide to Marrying a Man, His Kids, and His Ex-Wife

Almost anyone who has read or written Science Fiction or fantasy has been inspired by the work of Michael Moorcock. His literary flair and grand sense of adventure have been evident since his controversial first novel *Behold the Man*, through the stories and novels featuring his most famous character, Elric of Melniboné, to his fantasy masterpiece, *Gloriana*, winner of both the Campbell Memorial and World Fantasy, awards for best novel. Neil Gaiman, Alan Moore, and Michael Chabon all cite Moorcock as a major influence; as editor of *New Worlds* magazine, he helped launch the careers of many of his contemporaries, including Harlan Ellison, Philip K. Dick, and J. G. Ballard. Tor Books now proudly presents Moorcock's first independent novel in nine years, a tale both fantastical and autobiographical, a celebration of London and what it meant to be young there in the years after World War II. *The Whispering Swarm* is the first in a trilogy that will follow a young man named Michael as he simultaneously discovers himself and a secret realm hidden deep in the heart of London. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Letters to a Young Actor

Between 1869 and 1967, government-funded British charities sent nearly 100,000 British children to start new lives in the settler empire. This pioneering study tells the story of the rise and fall of child emigration to Canada, Australia, New Zealand, and Southern Rhodesia. In the mid-Victorian period, the book reveals, the concept of a global British race had a profound impact on the practice of charity work, the evolution of child welfare, and the experiences of poor children. During the twentieth century, however, rising nationalism in the dominions, alongside the emergence of new, psychological theories of child welfare, eroded faith in the 'British world' and brought child emigration into question. Combining archival sources with original oral histories, *Empire's Children* not only explores the powerful influence of empire on child-centered social policy, it also uncovers how the lives of ordinary children and families were forever transformed by imperial forces and settler nationalism.

The Ideal Book of Elocution, Oratory and Entertainment

This book tells of a voyage of discovery by the author, a retired Bechtel chief process engineer and chemical engineering society director, whose previous writings concerned Methane Valorization and Fischer-Tropsch Reactor Design. Trying to explain why a thirteen year old boy would join a Quaker expedition to Philadelphia in 1686 he devises a fictionalized account that is eventually supported by genetic testing. Along the way he discovers, among his ancestors, a master carpenter turned politician, Americas first golf club owner and a doctor of whom it was written, There was a popular notion that he cured his patients. He finds a Young Squire who taunts the British with school pamphlets during the Revolutionary War and several Quakers who were sent off to Virginia during that war - much as we locked up the Japanese during World War II. While written as a family history, the reader will find tie-ins to Benjamin Franklins papers, to Shakespeares *The Tempest*, to a British diarist who wrote about William Wordsworth and to an anti-slavery tract by Fanny Kemble. The book sheds light on familys papers kept under wraps at historical libraries but leaves the final answers up to future generations. In the authors own words, "I became interested in Fox family genealogy as a result of a business trip to Bechtels London Office in 1974. While there as the process design manager for an Algerian Liquified Natural Gas project, I took the opportunity to visit the Friends Library on Euston Road. There I found a family tree called *Descendants of Francis Fox of St. Germans*, by Joseph Foster and also Anne Cressons biography of my own ancestor, Joseph Fox, who had

been Speaker of the Pennsylvania Assembly during the Stamp Act uproar. I also located several books that seemed of immediate interest: The Journals of Caroline Fox 1835-1871, edited by Wendy Monk, and a biography, Caroline Fox, by Wilson Harris. These gave the approximate locations of several family estates out in Cornwall near Falmouth. There had been many famous visitors to these estates; men such as Wordsworth, Tennyson, Mill and Carlyle, and Caroline Fox had described their conversations in her Journals. "I then convinced a fellow process design engineer, Bob Chu, to drive with me out to Falmouth over a weekend. There we found the closed offices of G. C. Fox & Company, shipbrokers, and the Fox Rosehill Gardens but no other sign of Fox activity. I was a little discouraged. Bob was intrigued, however, and insisted we investigate further. So on Sunday morning we drove further west and found the Glendurgan estate, with foxes on the gateposts and Mrs. Philip Hamilton (Rona) Fox about to start up a lawnmower in the garage. She immediately dropped what she was doing and led us into her house where notes were compared on family connections. One of Francis Fox's sons had sailed to Philadelphia in 1686 on the same ship as Justinian Fox, my own ancestor. "Bob and I then had a chance to tour the fabulous Glendurgan Gardens, just recently added to the National Trust. We also stopped off at Catchfrench, an estate in St. Germans, near Plymouth, where I sat in the ruins of the house where Francis Fox had lived in the mid-1600s. This was enough to send a chill up my spine and got me to thinking about recording all of this history. Back in London, Rona's second son, Charles Lloyd Fox, introduced me to more relatives. As is described in this book, our families have maintained this relationship ever since then. "Work on this book actually started in 1992 after I retired from Bechtel and my wife, Betty, died of Lupus, both in rapid succession. I joined a Creative Writing Extension Class run by U. C. Berkeley and, for my project, started the fictionalized account recorded in the first two chapters of this book. I had learned that Justinian had only been 13 years old when he joined t

From My Window

Laura Mize, pediatric speech-language pathologist and founder of www.teachmetotalk.com, details the hierarchy of imitation skills she teaches to therapists in seminars throughout the country and in her best-selling therapy manuals and DVDs. Many times therapists and parents don't see success with late talking toddlers because the child needs an "in-between" step to help him learn the next component for expressive skill development. Our professional plans can also fail when we use techniques that are too clinical for parents to be able to remember and practice at home. This eight level approach is contained in Building Verbal Imitation in Toddlers.
