## Roommates for Passion (Lesbian Erotica)

When Kasey Edwards discovers she'll be infertile within a year, she is forced to bring the baby issue to the forefront of her mind. In *30-Something and the Clock Is Ticking*, she explores what having a child would mean to her identity, her career, her body, her relationships and her mental health. Kasey speaks to people who have children and people who don't, women who claim motherhood is the best thing they've ever done and those who say it's the worst. She discovers how the desire for a baby can drive people to the brink of insanity, the logistical challenges of ovulating and trying to conceive on a longhaul flight, the indignity and despair of IVF and the price of buying sperm on the Internet. This witty memoir will make you laugh, cry and ponder the joys and regrets of motherhood. It will inspire you to tackle the baby issue head-on and on your own terms, rather than letting time, denial and social pressures make the decision for you.

## **DESTINY'S WOMAN**

In recent years neuroscientists have uncovered the countless ways our brain trips us up in day-to-day life, from its propensity toward irrational thought to how our intuitions deceive us. The latest research on sleep, however, points in the opposite direction. Where old wives tales have long advised to "sleep on a problem," today scientists are discovering the truth behind these folk sayings, and how the busy brain radically improves our minds through sleep and dreams. In *The Secret World of Sleep*, neuroscientist Penny Lewis explores the latest research into the nighttime brain to understand the real benefits of sleep. She shows how, while our body rests, the brain practices tasks it learned during the day, replays traumatic events to mollify them, and forges connections between distant concepts. By understanding the roles that the nocturnal brain plays in our waking life, we can improve the relationship between the two, and even boost creativity and become smarter. This is a fascinating exploration of one of the most surprising corners of neuroscience that shows how science may be able to harness the power of sleep to improve learning, health, and more.

It's a gift that often brings Victory forebodings of disaster, but it also wins her first prize in a cereal-box competition. The rag-tag family leaves its trailer home for a house in a leafy London suburb: The Cornflake House. The neighbors' consternation at their arrival has comic, then disastrous, consequences. Now Eve is a young woman in prison. How she got there, and how her amazing mother planned long ago to get her out,

## **The Secret World of Sleep**

This comprehensive, practical guide explores how contemporary furniture is used within interior design to define a space, create division and enclosure, and alter or redefine circulation. Initial chapters illustrate the different contexts in which furniture is used, from the office and domestic interiors to retail and exhibition space; look at types of furniture, whether off-the-shelf or bespoke; and explore the new vogue for recycling and vintage. Later chapters examine both traditional materials such as wood and the more unusual such as stone and glass, while also explaining new methods of manufacture - such as Computer Numerical Controlled and Selected Laser Sintering. The final chapter looks at how a design is developed, the site surveyed, prototypes made and specifications and schedules drawn up. Furniture for Interior Design is a detailed, highly illustrated guide to specifying and placing existing manufactured furniture, but also

shows the reader how to design, detail, and commission batch-produced furniture or one-off, site-specific pieces.
