'Think globally, act locally' has become a call to environmentalist mobilization, proposing a closer connection between global concerns, local issues and individual responsibility. A History of Environmentalism explores this dialectic relationship, with ten contributors from a range of disciplines providing a history of environmentalism which frames global themes and narrates local stories. Each of the chapters in this volume addresses specific struggles in the history of environmental movements, for example over national parks, species protection, forests, waste, contamination, nuclear energy and expropriation. A diverse range of environments and environmental actors are covered, including the communities in the Amazonian Forest, the antelope in Tibet, atomic power plants in Europe and oil and politics in the Niger Delta. The chapters demonstrate how these conflicts make visible the intricate connections between local and global, the body and the environment, and power and nature. A History of Environmentalism tells us much about transformations of cultural perceptions and ways of production and consuming, as well as ecological and social changes. More than offering an exhaustive picture of the entire environmentalist movement, A History of Environmentalism highlights the importance of the experience of environmentalism within local communities. It offers a worldwide and polyphonic perspective, making it key reading for students and scholars of global and environmental history and political ecology.

Tenure security and demand for land tenure regularization in Nigeria

International Journal of Applied Linguistics and English Literature (IJALEL: Vol. 3, No.1), 2014

The Flaming Forest

Welcome to the nightmarish future of The Theta Timeline, where '1984' meets 'Slaughterhouse-Five.' Leaders who rely on war and fear. The men and women who refuse to accept a tyrannical government. And an unreliable means of time travel in which most people don't survive. Freedom was not stolen overnight, but gradually chipped away through a campaign of war and terror. People were told new laws and restrictions were for their own good. But the reality was a monstrous regime bent on controlling its subjects. Now, there is only one way to stop the Tyranny: go back in time and prevent it from ever starting. At times eloquent, funny, satirical, and infuriating, The Theta Timeline is not only Dietzel's most powerful book, it is as important as any dystopian vision created to date.

1990 Public Reports: Southeast Michigan

In line with the conventional view that customary land rights impede agricultural development, the traditional tenure system in Nigeria has been perceived to obstruct the achievement of efficient development and agricultural transformation. This led to the Land Use Act (LUA) of 1978. As a remedial measure to the perceived inadequacy of the traditional tenure system, the act nationalized the control of all land, empowering state governors and local governments with administration and management of land.¹ The act conferred on state governors the custodian right to provide use rights (i.e., the "right of occupancy") for land users in their state, dissolving any possessory (freehold) rights to land which were granted by the customary system.

Since the dawn of the twenty-first century, the U.S. military has been engaged in two major wars and other military operations short of war. The lessons learned suggest that the future security environment will present challenges and complexities that the joint force will be expected to overcome. The success of the joint force will depend on the operational leadership of its joint force commander. The joint force commander will need to possess and demonstrate varying leadership qualities. However, the essential quality that will facilitate the joint force to prevail is the joint force commander's operational vision. This paper explores the future security environment, examines the theoretical concept of operational vision, and the role of operational vision to the efficacy of the joint force commander. This paper draws upon the lessons of two operational commanders and the effects of their operational vision to the outcome of each respective military campaign. Finally, the analysis will conclude by demonstrating operational vision is the key leadership quality that will enable the joint force to overcome the challenges of the future security environment
