In the 1980s and 90s the Australian Defence Force introduced a much-modified Land Rover 110 as the Defence Force's basic lightweight utility vehicle. The basic cargo and general service models of the Australian Land Rover 110 are known as the "Truck, Utility, Lightweight, MC2" and the "Truck, Utility, Lightweight, Winch, MC2" respectively. There are several specialist variants of the Australian Land Rover 110, but the base vehicle is the same in most cases. Although never its official name, the Australian Defence Force Land Rover 110 is known among military vehicle enthusiasts as the "Perentie." They are almost universally considered to be the most capable Land Rover 110/Defender vehicles in the world. The "Perentie" was popularised around the world as Major Les Hiddins' vehicle in the hit TV series "Bush Tucker Man." This handbook reproduces the Australian Army's Electrical and Mechanical Engineering Instructions for the basic Land Rover "Perentie." It's 622 pages comprise a complete electrical and mechanical repair and servicing handbook for these iconic vehicles. It covers everything from basic servicing to complete rebuilds of the vehicle. Available for the first time in print, this handbook is designed as a workshop reference manual. Don't rely upon loose paper printouts. This edition is purposefully a low cost option and it never goes out of print, so you can keep one copy with the vehicle and another in the workshop.

Land Rover 110 Perentie Cargo & General Service 4x4

294 pages, 130 black & white illustrations, size 5.5 x 8.5 inches. In 1963, Temple Press UK published a revised and expanded 4th UK edition of 'Tuning for Speed' and, in 1965, they published a reprint of that 1963 edition. Both the 1963 and the 1965 publications are identical in content and contain 294 pages, a significant increase from the previous 208 page 1960 printing. With a total of 294 pages, the revised and expanded 4th UK edition is the most comprehensive of all of the 'Tuning for Speed' editions ever published. Earlier editions only stretched to 208 pages and later editions shrunk to 260 pages (or less) as what was thought to be 'dated information' was deleted from the contents. This 'dated information' is considered valuable today by those enthusiasts interested in vintage motorcycle tuning and modification. Consequently, this makes the revised 4th UK publication the most complete and desirable edition. Therefore, it is our pleasure to offer this reprint of the Floyd Clymer 'Revised 4th UK Edition or Second American Edition of 'Tuning for Speed' to motorcycle enthusiasts worldwide. 'Tuning for Speed' was originally published in 1948 and continuously reprinted and updated in order to keep pace with the constantly evolving range of British motorcycles and engines. While the primary focus of this publication is on 1965 and prior British motorcycles, the theory and engineering it contains is still applicable to the current crop of high revving imports. 'Tuning for Speed' is considered by many knowledgeable motorcycle enthusiasts to be one of the best books ever written on how to improve, modify and fine tune a motorcycle engine and it is often referred to as one of the 'top 10' classic motorcycle books. The Floyd Clymer association with this publication dates back to the early 1960's when he purchased the United States Publishing rights for 'Tuning for Speed' from Temple Press in the UK and, in 1967, Clymer published the 1st American edition of that title. However, by 1967, the Clymer publication had been preceded by 8 printings of the UK edition and was incorrectly identified by Clymer as a 9th edition. In fact, the 1967 Clymer publication is actually a reprint of the less desirable 208 page 1960 UK edition. However, in 1963, the 4th UK edition was revised and expanded to 294 pages (with a second identical re-print in 1965). Therefore, this 2nd American edition of the Floyd Clymer publication of 'Tuning for Speed' includes all of that valuable 'dated information' that was deleted from the later editions and is identical in all respects to the 294 page 1963/1965 revised and expanded 4th UK edition - with the exception that 7 pages of UK-based advertising to the rear of the book are not included in the Clymer publication.
