Contemporary Leadership Challenges

Leadership is crucial to the success of any organisation. But how can one seek to most effectively develop the leadership ability of both themselves, and others? How should one define leadership? Are great leaders born or made? This text addresses such fundamental questions via a comprehensive and critical approach to the discussion of key leadership theories. The text encourages the reader to consider the role of both follower and leader in the leadership process, and to recognise the emergence of both effective, and destructive, leadership. Each chapter features 'Expert Insights' on leadership, written by leaders in their respective fields. These insights offer the reader a valuable real-world perspective of leadership that enriches the abstract theory covered in each chapter. The provision of case studies, examples and supplementary online material provide the effective delivery of both undergraduate and postgraduate lectures and workshops, and self-guided study. A concluding chapter that focuses on the development of one's self-leadership ultimately facilitates a comprehensive introduction to what is at once a seductive, complex, transformative and alluring topic.

Research Concepts for the Practitioner of Educational Leadership

"English successfully challenges the established educational community to rethink the current state of research on school leadership in the social sciencesThe inclusion of theory, discourse, and stories of recognized leaders followed by chapter learning extensions that include key concepts, movie recommendations, and prompted reflective journaling makes this book a most valuable resource for

the educational leadership community." —H.J. Bultinck, CHOICE "The Art of Educational Leadership provides one of the most complete examinations of leadership that I have encountered. I admire the way it urges students to think and reflect. The format allows individual learners to focus on those materials that best fit their learning style while the numerous presentations of a single topic through the different modalities strengthens the learning. This text is a fresh, new look at leadership" —Louise L MacKay, East Tennessee State University "Fenwick W. English returns to themes of leadership he explored in more than 20 earlier books and dozens of presentation to educator audiences. He favors "re-centering educational leadership in the humanities," rather than acting on the recommendation of the business literature, and he emphasizes the use of films as a way to humanize leadership concepts." —THE SCHOOL ADMINISTRATOR "Excellent cogent analysis of key concepts of leadership are presented in a reader friendly style." —Saul B. Grossman, Temple University Moves beyond established notions of leadership to recognize that effective leading is about drama and performance—artistry! The Art of Educational Leadership: Balancing Performance and Accountability stresses the human side of leadership. No other text on this topic demonstrates so ably the importance of artistry in leadership in a field that has been lopsidedly dominated by concepts informed by science. Presenting the idea that leadership is an art, this book: Exemplifies a balance between the science and the art of educational leadership: The real improvement of practice is rooted in the art of application, which is about context and represents the key to leadership practice. Connects content material to self-discovery: Exercises at the end of each chapter include creating a personal, reflective journal to engage the reader in and reflect upon theories and practices presented in the book. Films are suggested for viewing to illustrate the interaction between context, culture, decisions, and outcomes. Portrays multicultural leadership in action: Biography boxes throughout the book share how multicultural educational and political leaders who have been recognized as "expert" practitioners learned the art of leadership in the public arena. This is the first book in educational leadership to sketch out a balance between the science and the art of the field. The text illustrates how performance and practice represent the art, while the delineation of the skills and conceptual models represent the science.

Trust-Based Leadership

An introduction to leadership draws on a program developed for an elementary school to show how to apply the principles of "The 7 Habits of Highly Effective People" to help everyone, including young children, identify and use their individual talents.

Fundamentals of Leadership

Culture, Leadership, and Organizations reports the results of a ten-year research program, the Global Leadership and Organizational Behavior Effectiveness (GLOBE) research program. GLOBE is a long-term program designed to conceptualize, operationalize, test, and validate a cross-level integrated theory of the relationship between culture and societal, organizational, and leadership effectiveness. A team of 160 scholars worked together since 1994 to study societal culture, organizational culture, and attributes of effective leadership in 62 cultures. Culture,

Leadership, and Organizations: The GLOBE Study of 62 Societies reports the findings of the first two phases of GLOBE. The book is primarily based on the results of the survey of over 17,000 middle managers in three industries: banking, food processing, and telecommunications, as well as archival measures of country economic prosperity and the physical and psychological well-being of the cultures studied.

The Making of a Leader

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the hourlong Netflix special Brené Brown: The Call to Courage! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do

better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Meeting the Ethical Challenges of Leadership

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of

entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Self-Leadership: How to Become a More Successful, Efficient, and Effective Leader from the Inside Out

Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.

How To Win Friends and Influence People

In recent years, scholars have focused more on the "dark sides of leadership." Both the negative and positive aspects of the relationship between leaders and followers are considered. But the relationship between leaders and followers is also influenced by the context in which the relationship occurs. Organizational aspects such as culture and structures are studied in relation to how negative leadership develops. Organizations, just like humans, are able to develop justifications for their actions, to self-aggrandize by claiming their exclusivity. In this book, the dark sides of organizational behaviors and leadership are considered from different aspects and contexts. The book contributes knowledge of how negative leadership develops, what part organizational structures play, and what the consequences are for the leader, the subordinates and the organization.

The Future of Nursing explores how nurses' roles, responsibilities, and education

should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
