In the aftermath of the financial crisis, capital management has become a critical factor in value creation for banks and other financial institutions. Although complex and subject to regulatory change, the strategic importance of capital management became apparent during the crisis and has moved the subject to the top of corporate agendas. Bank and Insurance Capital Management is an essential guide to help banks and insurance companies understand and manage their capital position. Bridging the gap between theory and practice, it provides proven techniques for managing bank capital, as well as explaining key capital management perspectives, including accounting, regulatory, risk and capital management and corporate finance. It also shows how to analyze a firm's stakeholders such as depositors, policy holders, debt holders and shareholders, and manage their expectations, and how to align risk and capital management so as to best optimize the return on capital and preserve capital in periods of stress. Economic capital is also

discussed in depth, as are the practicalities of bank and insurance M&A, and the book also shows how financial innovations can be used to optimise the capital position and how diversification effects are reflected in the capital position. This book will arm readers with the knowledge and skills needed to understand how capital management can improve capital structure and performance, achieving an optimal cost of, and return on capital, creating value as a result.

FEATURES EXCLUSIVE INTERVIEW with SUBRATA ROY EVERYTHING YOU WANTED TO KNOW ABOUT SUBRATA ROY AND SAHARA INDIA PARIWAR, BUT WERE AFRAID TO ASK... Sahara: The Untold Story is based on painstaking research to demystify India's most secretive and largely unlisted conglomerate, the Sahara India Pariwar. It also delves into the group's ongoing legal battle with the market regulator. Entrepreneur Subrata Roy, the guardian angel of the group, whose feet are touched by everybody in the Pariwar, wants to reach out to a million lives and feels impeded and shuttered in by regulations. So the clash with the regulators was inevitable. But when a regulator slams one door, maverick Roy opens another. This play has been on since 1978, when Sahara was set up. Roy is well known for glamour and his association with film stars, cricketers and politicians. He exudes patriotism, with a statue of Bharat Mata (the presiding deity of the group) on a

"For everyone thinking of a new adventure, a new life, or even a new venture: DO IT." - Jim Rogers, bestselling author of *Investment Biker*. After building a successful business, Dirk Weisiger was ready for something new. But he wasn't sure what. Maybe a motorcycle adventure, I've never done that! What followed was a fourteen-month, solo motorcycle journey from Austin, Texas to Ushuaia, Argentina, filled with unexpected adventures, surprises, and lessons about life and travel. "I headed south to see new vistas on a solo journey, but ended up feeling more connected to the people I met along the way." In this book, you'll not only enjoy Dirk's adventure and insights, but find inspiration for your own journey. Dirk Weisiger is a travel trekker, trick roper, and storyteller. Dirk has always enjoyed speaking to groups, spinning tales, ropes, and offering lessons he's learned in adventures of life and business. He's travelled to five continents and climbed Mount Kilimanjaro. Most of all Dirk loves people and believes that making new friends is the best part of travel. (A

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps,

The next bull market is here. It's not in stocks. It's not in bonds. It's in commodities - and some smart investors will be riding that bull to record returns in the next decade. Before Jim Rogers hit the road to write his best-selling books *Investment Biker* and *Adventure Capitalist*, he was one of the world's most successful investors. He co-founded the Quantum Fund and made so much money that he never needed to work again. Yet despite his success, Rogers has never written a book of practical investment advice - until now. In *Hot Commodities*, Rogers offers the low-down on the most lucrative markets for today and tomorrow. In late 1998, gliding under the radar, a bull market in commodities began. Rogers thinks it's going to continue for at least fifteen years - and he's put his money where his mouth is: In 1998, he started his own commodities index fund. It's up 165% since then, with more than \$200 million invested, and it's the single-best performing index fund in the world in any asset class. Less risky than stocks and less sluggish than bonds, commodities are where the

money is - and will be in the years ahead. Rogers's strategies are simple and straightforward. You can start small - a few thousand dollars will suffice. It's all about putting your money into stuff you understand, the basic materials of everyday life, like copper, sugar, cotton, corn, or crude oil. Once you recognize the cyclical and historical trading patterns outlined here, you'll be on your way. In language that is both colourful and accessible, Rogers explains why the world of commodity investing can be one of the simplest of all - and how commodities are the bases by which investors can value companies, markets, and whole economies. To be a truly great investor is to know something about commodities. For small investors and high rollers alike, *Hot Commodities* is as good as gold . . . or lead, or aluminium, which are some of the commodities Rogers says could be as rewarding for investors.

Financial guru George Soros is one of the most colorful and intriguing figures in the financial world today. Now in *Soros on Soros*, readers are given their most intimate and revealing look yet into the life and mind of the one *BusinessWeek* dubbed, "The Man Who Moves Markets." *Soros on Soros* interweaves financial theory and personal reminiscence, political analysis and moral reflection to offer a compelling portrait of the world (and its markets) according to Soros. In an interview-style narrative with Byron Wien, Managing Director at Morgan Stanley, and with German journalist Krisztina Koenen, Soros vividly describes the genesis of his brilliant financial career and shares his views on investing and global finance, politics and the emerging world order, and the responsibility of power. Speaking with remarkable candor, he traces his progress from Holocaust survivor to philosophy student, unsuccessful tobacco salesman to the world's most powerful and profitable trader and introduces us to the people and events that helped shape his character and his often controversial views. In describing the investment theories and financial strategies that have made him "a superstar among money managers" (*The New York Times*), Soros tells the fascinating story of the phenomenally successful Soros Fund Management and its \$12 billion flagship, Quantum Fund. He also offers fresh insights into some of his most sensational wins and losses, including a firsthand account of the \$1 billion he made going up against the British pound and the fortune he lost speculating on the yen. Rogers reveals how to learn from his triumphs and mistakes in order to achieve a prosperous, well-lived life. For example:

- Trust your own judgment: Rogers sensed China's true potential way back in the 1980s, at a time when most analysts were highly skeptical of its prospects for growth.
- Focus on what you like: Rogers was five when he started collecting empty bottles at baseball games instead of playing.
- Be persistent: Coming to Yale from rural Alabama, and in over his head, Rogers never stopped studying and wound up with a scholarship to Oxford.
- See the world: In 1990, Rogers traveled through six continents by motorcycle, gaining a global perspective and learning how to evaluate prospects in rapidly developing countries such as Brazil, Russia, India, and China.
- Nothing is really new: anything deemed

“innovative” or “unprecedented” is usually just overhyped, as in the case of the Internet or TV, airplanes, and railroads before it • And not a bit off the subject, and very important: Boys will need you more than you’ll need them! Wise and warm, accessible and inspiring, A Gift to My Children is a great gift for all those just starting to invest in their futures.

In the 1960's the authors set off to drive around the world in a Toyota Land Cruiser. It turned out to be the last and longest motor journey every made.

In Search of Greener Grass

Drive . . . and grow rich! The bestselling author of Investment Biker is back from the ultimate road trip: a three-year drive around the world that would ultimately set the Guinness record for the longest continuous car journey. In Adventure Capitalist, legendary investor Jim Rogers, dubbed “the Indiana Jones of finance” by Time magazine, proves that the best way to profit from the global situation is to see the world mile by mile. “While I have never patronized a prostitute,” he writes, “I know that one can learn more about a country from speaking to the madam of a brothel or a black marketeer than from meeting a foreign minister.” Behind the wheel of a sunburst-yellow, custom-built convertible Mercedes, Rogers and his fiancée, Paige Parker, began their “Millennium Adventure” on January 1, 1999, from Iceland. They

traveled through 116 countries, including many where most have rarely ventured, such as Saudi Arabia, Myanmar, Angola, Sudan, Congo, Colombia, and East Timor. They drove through war zones, deserts, jungles, epidemics, and blizzards. They had many narrow escapes. They camped with nomads and camels in the western Sahara. They ate silkworms, iguanas, snakes, termites, guinea pigs, porcupines, crocodiles, and grasshoppers. Best of all, they saw the real world from the ground up—the only vantage point from which it can be truly understood—economically, politically, and socially. Here are just a few of the author's conclusions: • The new commodity bull market has started. • The twenty-first century will belong to China. • There is a dramatic shortage of women developing in Asia. • Pakistan is on the verge of disintegrating. • India, like many other large nations, will break into several countries. • The Euro is doomed to fail. • There are fortunes to be made in Angola. • Nongovernmental organizations (NGOs) are a scam. • Bolivia is a comer after decades of instability, thanks to gigantic amounts of natural gas. Adventure Capitalist is the most opinionated, sprawling, adventurous journey you're likely to take within the pages of a book—the perfect read for armchair adventurers, global investors, car enthusiasts, and anyone interested in seeing the world and understanding it as it really is.

“Cities are green” is becoming a common refrain. But Calthorpe argues that a more comprehensive understanding of urbanism at the regional scale provides a better platform to address climate change. In this groundbreaking new work, he shows how such regionally scaled urbanism can be combined with green technology to achieve not only needed reductions in carbon emissions but other critical economies and lifestyle benefits. Rather than just providing another checklist of new energy sources or one dimensional land use alternatives, he combines them into comprehensive national growth scenarios for 2050 and documents their potential impacts. In so doing he powerfully demonstrates that it will take an integrated approach of land use transformation, policy changes, and innovative technology to transition to a low carbon economy. To accomplish this Calthorpe synthesizes thirty years of experience, starting with his ground breaking work in sustainable community design in the 1980s following through to his current leadership in transit-oriented design, regional planning, and land use policy. Peter Calthorpe shows us what is possible using real world examples of innovative design strategies and forward-thinking policies that are already changing the way we live. This provocative and engaging work emerges from Calthorpe’s belief that, just as the last fifty years produced massive changes in our culture, economy and environment, the next fifty will generate changes of an even more profound nature. The book, enhanced by its superb four-color graphics, is a call to action and a road map for moving forward.
