Through her Inside Out Weight Loss program and seminars, along with podcasts downloaded more than 3 million times, Renée Stephens has helped countless people free themselves from emotional eating to achieve the body and life they've always desired. Now, in her first book, she shares the breakthrough lessons of her popular work and develops them into a complete, step-by-step program: Full-Filled: The 6-Week Weight-Loss Plan for Changing Your Relationship with Food—and Your Life—from the Inside Out. With Full-Filled, you will gain freedom from dieting as you use some of the world's most advanced mind and behavior-changing techniques. An intuitive and easy weight-loss program, Full-Filled will open the door to bigger transformations in your life. Not only will you drop excess physical pounds with Renée's expert guidance, you will get to the root of why you eat and you will lose your spiritual weight—by identifying why you eat the way you do and finding better ways to satisfy your true hunger without food. A former food addict, Stephens is a leading weight-loss coach who works with women and men who have spent years trying to free themselves from their weight struggle and to regain control of their lives. Women, Food and God led millions to spiritual insights; Full-Filled turns those insights into practical steps in an easy-to-follow program that will permanently change how you think about and behave around food. The Full-Filled program will identify and heal your underlying food issues and provide you with the specific tools to create new habits that will make you slim and healthy for a lifetime. This isn't about what foods you should and shouldn't eat (although Renée does share some of her favorite recipes to make weight loss happen faster and easier). Filled with personal success stories and a whole bag of transformative tips and tricks, Full-Filled will set you up for significant weight loss and provide the no-

fail techniques for keeping the pounds off permanently.

## **The Austin Seven Manual**

The Chinese are inordinately proud of having invented, among a whole host of other things, the compass (without which the world would have got lost), paper (without which books would not exist), the printing press (ditto), porcelain (no pretty matching chinaware), silk (no decadence), pasta (what would the Italians eat?), the wheelbarrow (how would civilisation have fared without it?) and the bristle toothbrush. A guide to understanding the Chinese which dispels or confirms preconceived prejudices with humor and insight.

Updated for a new generation of bike lovers, Ultimate Harley Davidson is a visually stunning and comprehensive history of Harley-Davidson that charts the company and its bikes decade by decade. From the moment the first model rolled out of a backyard shed in Milwaukee, through Harley's postwar golden age, to the sought-after bikes that distinguish the company today, Ultimate Harley-Davidson presents seventy of the most beautiful and coveted Harleys of all time. Whether it's the 1911 V-Twin or the 1999 X1 Lightning, the seventy Harley-Davidson bikes examined are presented in minute detail, with close-ups of the engines and in-depth technical specifications.

## **Yamaha V-Star 1100**

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Professional Sheet Metal Fabrication is the number-one resource for sheet metal workers old and new. Join veteran metalworker Ed Barr as he walks you through the ins and outs of planning a sheet metal project, acquiring the necessary tools and resources, doing the work, and adding the perfect finishing touches for a seamless final product. From his workshop at McPherson College—home of the only genuine sheet metal fabrication education program in the country—Barr not only demonstrates how the latest tools and products work, but also explains why sheet metal reacts the way it does to a wide variety of processes. He includes clear directions for using power and pneumatic hammers and the English wheel, as well as describing specific skills like hand-forming techniques, buck building, louver punching, edge finishing, and more. Readers will learn how to form door seams and to make fenders, hoods, and other body parts; they'll also learn how to put various finishes on metal through engine turning, metal chasing, and laser processing. This is truly the most detailed enthusiast-focused sheet metal how-to book on the market: whether you're a metal hobbyist or experienced professional, you're sure to find something new in Professional Sheet Metal Fabrication.

## **Classic Motorcycling**

"I gained a great deal this book and expect every other reader will gain likewise" -- Hugh Anderson, MBE, World Champion 1963, '64 and '65 writing in the Foreword. A different and fascinating new look at classic motorcycling with an international flavour -- sure to appeal to all owners (and intending owners) of classic bikes. "Classic Motorcycling" is about buying, riding and maintaining classic motorcycles. It comes complete with sections on survival rates of classics and their price appreciation over recent years with future predictions, and is literally packed full of advice for both aspiring and experienced owners. From choosing the right bike, training for today's traffic, clothing, safety, maintenance, how and where to buy those all important spares, equipping a workshop, projects to improve most classics to simply experiencing the joy of ownership -- its all here.
