In today's highly connected world, almost everybody has a web site, from local sewing circles to the world's largest corporations. If you're ready for one of your own, Microsoft's FrontPage 2003 has everything you need to create Web pages. It's true. Your geek friends may howl in contempt if you use FrontPage, but that's because the program has a reputation for spitting out cookie-cutter Web pages with messy, overloaded HTML code that takes forever to load. Not any more. After listening to complaints, Microsoft has given FrontPage 2003 some pretty advanced features, including an HTML cleanup tool that helps alleviate bloated code, and new support for Macromedia Flash and XML. Now, savvy Web veterans can control as much of the process as they want, and even collaborate on a site with developers who use Dreamweaver, GoLive or other Web authoring tools. Yet, unlike those other tools, FrontPage 2003 still has automated features for beginners who don't know where to start. There's still one flaw, though. Microsoft's idea of a user manual is a flimsy pamphlet. But that's easily solved. FrontPage 2003: The Missing Manual offers you everything from the basics to meaty sections on

advanced tasks. Our book puts the program's features in context, with clear and thorough chapters that provide valuable shortcuts, workarounds, and just plain common sense, no matter where you weigh in on the technical scale. With it, you can learn to build simple Web pages, or sophisticated ones with tables and Cascading Style Sheets, and find out how to manage and publish a Web site. You'll also learn to create forms, work with databases, and integrate FrontPage with Microsoft Office. If you haven't worked with Web pages before, each chapter provides "Up to Speed" sidebars with useful background information. If you do have experience, the "Power Users' Clinic" sidebars offer advanced tips and insights. You won't find tips like those in the pamphlet, or even in the Help file. FrontPage: The Missing Manual gives you the complete lowdown on the program above and beyond any book on the market.

CONCISE CAR® the rubrics of CAR® are similar to other Cognitive Apprenticeship Methodology's: "Watch It Do It Know It." CAR's unique power to facilitate recovery is derived by adding the ingredients of "The Way of Analogy" and "The Concept of the Singular." You might want to start by first reading Chapter 5 in "Bingo": the chair's fixed, relax and sit in it as a way to preempt any confusion about how "The Way of Analogy" is being used in "Relationship Associations." Here is the traditional (Thomas Aquinas) "Way of Analogy": Red is Red: and yet a horse is Red, with a "horsey" Redness. CAR® melds this with "The Concept of the Singular" [i.e. Remember Philosophy 101. the Universal Chair of the Greeks was the perfect chair; then came "the Particular" chair (Lounge Chairs); then came "the Singular" chair (your Dad's old Morris chair with the cigar burns on the right arm)] to get its synergism. CAR® is a "Singular Analogous Relationship Driven" Recovery modality and as such, less easily defined than experienced. CAR® methodology is already at work "within" you even before you start to read these books. You already know (you are ultimately aware) that you are "within the answer." "The 'Good News' is you are in Recovery now!" This is proclaimed at the beginning of all three books. "The first step in the acquisition of wisdom is silence, the second listening, the third memory, the fourth practice, the fifth teaching others." A thrilling retelling by master storyteller Jean Houston of the legendary exploits of the founder of the Iroquois Confederacy, known as the Peacemaker. Under his leadership they created a peaceful democracy among five tribes of Native peoples in the northeastern woodlands. This story has inspired American leaders from Benjamin Franklin to the present-day occupants of the White House, and is shown by Houston to be a potent guide to personal transformation and to the visioning of a peaceful world. Jean draws from the experiential workshops she leads, with the help of Margaret (Peggy) Rubin, to guide readers through group or individual exercises that "bring the story home."
