## Viking Families and Farms

GOOD HABITS OF GREAT CHAMPIONS Champions are made in the battles of life. Champions are made of consistent winning streaks. Every champion bears the marks of battle wounds but they never give up. There are habits, daily pursuits and practices these champions possess that make them win in their chosen causes. These core habits explored in this book based on insights from the life of the Master will surely explode your potential to end your life well and impact not only your immediate family but your whole world.

## The Insolent Chariots

In 1947, British India—the part of South Asia that is today's India, Pakistan, and Bangladesh—emerged from the colonial era with the world's largest centrally managed canal irrigation infrastructure. However, as vividly illustrated by Tushaar Shah, the orderly irrigation economy that saved millions of rural poor from droughts and famines is now a vast atomistic system of widely dispersed tube-wells that are drawing groundwater without permits or hindrances. *Taming the Anarchy* is about the development of this chaos and the prospects to bring it under control. It is about both the massive benefit that the irrigation economy has created and the ill-fare it threatens through depleted aquifers and pollution. Tushaar Shah brings exceptional insight into a socio-ecological phenomenon that has befuddled scientists and policymakers alike. In systematic fashion, he investigates the forces behind the transformation of South Asian irrigation and considers its social, economic, and ecological impacts. He considers what is unique to South Asia and what is in common with other developing regions. He argues that, without effective governance, the resulting groundwater stress threatens the sustenance of the agrarian system and therefore the well being of the nearly one and a half billion people who live in South Asia. Yet, finding solutions is a formidable challenge. The way forward in the short run, Shah suggests, lies in

indirect, adaptive strategies that change the conduct of water users. From antiquity until the 1960s, agricultural water management in South Asia was predominantly the affair of village communities and/or the state. Today, the region depends on irrigation from some 25 million individually owned groundwater wells. Tushaar Shah provides a fascinating economic, political, and cultural history of the development and use of technology that is also a history of a society in transition. His book provides powerful ideas and lessons for researchers, historians, and policymakers interested in South Asia, as well as readers who are interested in the water and agricultural futures of other developing countries and regions, including China and Africa.

## **French Resistance**

Looks at what life was like for those who were not on an expedition, including Viking houses and farms, the roles of men and women, slavery, and what Viking feasts were like.

## **The Larger Life**

A traditional source of sexual titillation for adult readers, fairy tales historically boasted licentious themes before being cleaned up for the consumption of children in modern times. Seasoned erotica author Mitzi Szereto restores the explicit sex in these 15 tales — and adds some provocative surprises of her own. Here the bawdy humor of French fable meets the sublime eroticism of ancient Chinese myth; a not-so-virgin damsel weds a Prince Charming with a shoe fetish; Little Red Riding Hood discovers Grandma's bed is open to any stray wolf; and a Japanese monk stumbles onto an S/M scene behind a forbidden door. Each tale is prefaced by a brief introduction telling its history and the sexual culture in which the work was originally composed.

## **GOOD HABITS OF GREAT CHAMPIONS**

When teaching and learning are characterized by collaboration, challenge, support, risk taking, and reflectivity, they become a transactional process. This book provides a practical guide for those involved in helping adults learn to critically examine, question, and rethink the teaching and learning encounter. The authors detail the descriptive elements, skills, and guiding principles of the transactional process, what it means to ground teaching in learning, how to individualize the teaching and learning process, and how to foster critical reflection. The book provides specific advice on adult learning methods and techniques most appropriate for facilitating the adult learning transactional process, how technology can be interactive and collaborative, numerous approaches for evaluating the teaching and learning process, and various strategies for improving instruction and resources for one's own professional development.

## **The Winning Cars of the Indianapolis 500**

This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using

the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the “old” growth theory and bridges to the “new” growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

## **Combatting Unemployment**

In light of the tremendous changes that have come to the island of Borneo in recent decades, this volume takes a detailed historical look at the Borneo environment from native, colonial and national perspectives. It examines change and continuity in the economic, political and social dimensions of human-environment interactions. Reflecting the increasingly multidisciplinary nature of environmental history, the book brings together an international group of historians, anthropologists, geographers and social foresters, all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak, and the Indonesian province of Kalimantan and Brunei. Drawing on extensive archival research and fieldwork, these ten original contributions encompass eleven centuries of history on Borneo, examining interrelated topics that include long-distance trade, conservation, land tenure, resource access, property rights, perceptions of the environment, migration, and development policy and practice. The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on "Environmental change in native and colonial histories of Borneo: Lessons from the past, prospects for the future" held in Leiden under the auspices of the International Institute for Asian Studies.

## **The Shadow Cabinet**

The Constitution of the State of Illinois is the governing document of the state of Illinois. There have been four Illinois Constitutions; the fourth and current version was adopted in 1970. The current constitution is referred to as the "Constitution of Illinois of 1970" or less formally as the "1970 Constitution." The document is still referred to as the "Constitution of Illinois of 1970" even though there have been amendments to it after 1970.

## **Shaking Off the Dust**

## **Train Your Brain For Success**

This book breaks down the so-called holy books and help those who are asleep in religion to overstand the metaphysics of what its reality and the truth that it points toward is really about. This is a book for the black man and woman who has the spiritual DNA that will bring about change throughout the dimensions of self.

## **I, Isaac, Take Thee, Rebekah**

A simplified approach to applying the Finite Element Method to geotechnical problems Predicting soil behavior by constitutive equations that are based on experimental findings and embodied in numerical methods, such as the finite element method, is a significant aspect of soil mechanics. Engineers are able to solve a wide range of geotechnical engineering problems, especially inherently complex ones that resist traditional analysis. Applied Soil Mechanics with ABAQUS® Applications provides civil engineering students and practitioners with a simple, basic introduction to applying the finite element method to soil mechanics problems. Accessible to someone with little background in soil mechanics and finite element analysis, Applied Soil Mechanics with ABAQUS® Applications explains the basic concepts of soil mechanics and then prepares the reader for solving geotechnical engineering problems using both traditional engineering solutions and the more versatile, finite element solutions. Topics covered include: Properties of Soil Elasticity and Plasticity Stresses in Soil Consolidation Shear Strength of Soil Shallow Foundations Lateral Earth Pressure and Retaining Walls Piles and Pile Groups Seepage Taking a unique approach, the author describes the general soil mechanics for each topic, shows traditional applications of these principles with longhand solutions, and then presents finite element solutions for the same applications, comparing both. The book is prepared with ABAQUS® software applications to enable a range of readers to experiment firsthand with the principles described in the book (the software application files are available under "student resources" at [www.wiley.com/college/helwany](http://www.wiley.com/college/helwany)). By presenting both the traditional solutions alongside the FEM solutions, Applied Soil Mechanics with ABAQUS® Applications is an ideal introduction to traditional soil mechanics and a guide to alternative solutions and emergent methods. Dr. Helwany also has an online course based on the book available at [www.geomilwaukee.com](http://www.geomilwaukee.com).

## **The Phone Book**

In the twenty-fourth chapter of Genesis a beautiful young woman offers assistance to a weary traveler and his camels, and out of that simple action, a marriage results—a marriage that offers profound lessons to couples today. Bible scholar and renowned speaker Ravi Zacharias draws five points critical to the long-lasting success of every marriage from the biblical story of the marriage of Isaac and Rebekah. "Real love folds together both the emotions and the will," writes Zacharias. "Without the emotions, marriage is a drudgery; without the will, it is a mockery." Building upon that foundational truth, Zacharias goes on to explain the principles of seeking the counsel of others when finding a mate, cherishing your partner, remaining pure, becoming a man or woman of prayer, and, finally, risking everything in a relationship in order to experience God's ideal for love. Couples everywhere, from those about to be married, to those who have been married for decades, will draw strength and wisdom for the journey of marriage as they learn from Ravi what it means to move from romance to lasting love.

## **Applied Soil Mechanics with ABAQUS Applications**

## **Growth and International Trade**

In the early 1980s, two water-supply systems on the Marine Corps Base Camp Lejeune in North Carolina were found to be contaminated with the industrial solvents trichloroethylene (TCE) and perchloroethylene (PCE). The water systems were supplied by the Tarawa Terrace and Hadnot Point watertreatment plants, which served enlisted-family housing, barracks for unmarried service personnel, base administrative offices, schools, and recreational areas. The Hadnot Point water system also served the base hospital and an industrial area and supplied water to housing on the Holcomb Boulevard water system (full-time until 1972 and periodically thereafter). This book examines what is known about the contamination of the water supplies at Camp Lejeune and whether the contamination can be linked to any adverse health outcomes in former residents and workers at the base.

## **Overcoming Stagnation in Aid-dependent Countries**

Shaping the views of scholars and policymakers on how to address unemployment, the contributions of Layard and Nickell have served to illuminate the policy discourse in Europe. The book includes their key writings on the subject together with a new essay on what should be done during recession.

## **Illinois Constitution Of 1970**

The thrilling third installment to the Edgar-nominated, bestselling series Rory and her friends are reeling from a series of sudden and tragic events. While racked with grief, Rory tries to determine if she acted in time to save a member of the squad. If she did, how do you find a ghost? Also, Rory's classmate Charlotte has been kidnapped by Jane and her nefarious organization. Evidence is uncovered of a forty-year-old cult, ten missing teenagers, and a likely mass murder. Everything indicates that Charlotte's in danger, and it seems that something much bigger and much more terrible is coming. Time is running out as Rory fights to find her friends and the ghost squad struggles to stop Jane from unleashing her spectral nightmare on the entire city. In the process, they'll discover the existence of an organization that underpins London itself--and Rory will learn that someone she trusts has been keeping a tremendous secret.

## **Wood Conserving Cook Stoves**

This reimagining of the Robin Hood legend tells the story of the young boy behind the bandit hero's rise to fame. Will Shackley is the son of a lord, and though just thirteen, he's led a charmed, protected life and is the heir to Shackley House, while his father is away on the Third Crusade with King Richard the Lionheart. But with King Richard's absence, the winds of treason are blowing across England, and soon Shackley House becomes caught up in a dangerous power struggle that drives Will out of the only home he's ever known. Alone, he flees into the dangerous Sherwood Forest, where he joins an elusive gang of bandits readers will immediately recognize. How Will helps a drunkard named Rob become one of the most feared and revered criminals in history is a swashbuckling ride perfect for anyone who loves heroes, villains, and adventure.

## **Taming the Anarchy**

Presents concept art, scenery landscapes, and character designs of video game "Assassin's Creed Unity."

## **Phospholipid Technology and Applications**

Phospholipid technology and applications is an essential reference for technologists developing food and cosmetics products, scientists researching phospholipids in biological and food systems, technologists in fats and oils refining, and scientists developing drugs and drug delivery systems and carriers. The major source of phospholipids is the lecithin recovered during degumming of vegetable oils, particularly soybean oil. This crude material finds uses in its own right but can be purified through a series of processes which eventually lead to individual phospholipid classes such as phosphatidylcholines. It is widely accepted that oil and water do not mix but there are several areas in science and technology where these two distinct phases must coexist in stable emulsions. This is achieved by admixture of amphiphilic molecules of which the phospholipids are important natural examples. Today, phospholipids find many uses in the food industry and in other industries which exploit the amphiphilic nature of these compounds. Further, there are now important procedures by which their amphiphilicity can be optimized for different uses. The early chapters in this book are devoted to the more common glycerol-based phospholipids and cover their structure, source, composition, modification by chemical and enzymatic methods, their physical, chemical, and nutritional properties, and their major uses. The final chapter is devoted to another kind of phospholipid, the sphingolipids, in which there is a growing interest.

## **Passport Series: North America**

Shares life lessons for the golf course combined with pointers on how to improve one's game, providing guidelines under such headers as "Listening and Learning," "How to Turn Stress into Success," and "The 10 Secrets of Long-Living People." Reprint. 75,000 first printing.

## **Eternal Horizon**

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupuncture techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter

than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.

## **Golf & Life**

At speeds of over 230 miles per hour, the Indy open-wheel race cars set the bar for American Championship car racing. For over 100 years, the Indy cars and their drivers have drawn hundreds of thousands of spectators to Speedway, Indiana, with another 6 million people watching the race on television or by live stream. In *The Winning Cars of the Indianapolis 500*, James Craig Reinhardt, author and official tour guide for the Indianapolis Motor Speedway, details the history of the famous race and how the open-wheel race cars have evolved over the last century. Starting in 1911 with the first running of the Indy 500, Reinhardt profiles each race and car, including the starting position, engine, tires, race speed, margin of victory, and much more. Featuring nearly 200 images of the automobiles and individuals who make the race renowned, this book showcases the top drivers and how racing has changed through two world wars, the Great Depression, and unforgettable accidents. This beautifully illustrated book is a must-have for veteran and rookie race fans alike.

Chile peppers are hot--they add culinary fire to dishes from a variety of cuisines and inspire near-fanatical devotion in vegetable gardeners and collectors. *The Complete Chile Pepper Book*, by world-renowned chile experts Dave DeWitt and Paul W. Bosland, shares detailed profiles of the one hundred most popular chile varieties and include information on how to grow and cultivate them successfully, along with tips on planning, garden design, growing in containers, dealing with pests and disease, and breeding and hybridizing. Techniques for processing and preserving include canning, pickling, drying, and smoking. Eighty-five mouth-watering recipes show how to use the characteristic heat of chile peppers in beverages, sauces, appetizers, salads, soups, entrees, and desserts. This gorgeously illustrated, must-have reference for pepper-obsessed gardeners and cooks.

## **My Grandma**

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis "McQuarrie's book is extremely well written, the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark

Kearley, Florida State University This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-new illustrations, it is available in a soft-cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series of descriptive chemistry Interchapters, a Student Solutions Manual, and an optional state-of-the-art Online Homework program. For adopting professors, an Instructor's Manual and a CD of the art are also available.

## **Dinky the Elf**

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

## **The Bible Period by Period**

In this book, Nicolas Van de Walle identifies 26 countries that are extremely poor and grew little if at all in the 1990s. His sample excludes North Korea and countries where civil war explains some of their failure to grow (Afghanistan, Sierra Leone, Sudan, Tajikistan and others). The 26 countries have limited infrastructure and human capital and the small size of their markets deter private savings and investment. Aid was meant to help overcome these problems, and these countries received a lot. Yet they have failed to grow. What is wrong? Is foreign aid a solution or part of the problem? What changes might make aid more effective? Given these

countries require the financial and technical resources of the West, why haven't aid programs made a difference? Van de Walle blames their economic failure mostly on the venality and incompetence of their political leadership. He analyzes the contradictions and tensions faced by the aid community in poorly run countries, providing a sobering analysis of the perverse effects of aid where the politics is all wrong. Too often, resources provided by foreign aid keep the wrong government in office, and undermine adoption of economic as well as political reforms. Bad government combined with aid, in short, hurts poor countries - and particularly the poorest people in those countries. Despite good intentions, little progress has been made in implementing announced "reforms" of the aid business itself. A constituency for reform is lacking, in the donor countries and in the recipient countries, where those in power benefit from the status quo.

## **Facilitating Adult Learning**

The gang is back! Taking place four years after the events of the first book, *The Hunt for Saturn* continues the saga of Vincent and his friends. The rebellion that started on Urtan has now spread throughout the entire galaxy, threatening to bring the Imperial Republic down to its knees once and for all. Follow the companions as they escape the madness of General Zeth and prepare for the biggest conflict of their lives. Once again, *Eternal Horizon* incorporates sci-fi, fantasy, and comic book elements to continue the "novel-encyclopedia" series with over 90 illustrations that include character profiles, starship diagrams, scenic chapter openers and other images that support the story.

## **Contaminated Water Supplies at Camp Lejeune**

This study examines France's determination to remain aloof and unaffected as the world economy threatens the French way of doing business. Describing the difficulty in initiating change in French organizations, the author tells of the obstacles he encountered in attempting to modernize the working practices of a Paris firm. His observations are based upon customs and habits peculiar to the French, yet they apply equally to all foreign cultures. Management methods, attitudes to the outside world, and the historic roots of the French mentality are viewed and explained anecdotally, based on the author's experience of living and working in France, and are accompanied by humorous illustrations.
