### Noble Savages

With bullets flying, wounded soldiers scream out in pain as the Chinook comes in to land in one of the most dangerous parts of Afghanistan. At the machine's controls is one man and if he doesn't stay calm then everyone could die. That man is Flt Lt Alex 'Frenchie' Duncan DFC and he's been involved in some of the most daring and dangerous missions undertaken by the Chinook force in Afghanistan. In this book he recounts his experiences of life under fire in the dust, heat and bullets of an active war zone. At 99ft long, the Chinook is a big and valuable target to the Taliban, who will stop at nothing to bring one down. And yet Frenchie and his crew risk everything because they know that the troops on the front line are relying on them. Sweating the Metal is the true story of the raw determination and courage of men on the front line - and it's time for their story to be told.

### Political Loyalty and the Nation-State

With this first volume, the Baltic Yearbook of International Law joins the family of legal publications. The idea was born primarily in the Baltic States of Estonia, Latvia and Lithuania. Indeed, international and domestic events and other developments surrounding the Baltic States throughout their history have made a considerable impact on discussions and on the evolution of international law and international politics. Despite a clear Baltic ownership, the aim of the Baltic Yearbook of International Law is to become a forum for debate on topical questions in international law and related fields and thus to contribute to the development of thought, standard-setting and relevant practices in the world. The Baltic Yearbook of International Law is an annual publication containing studies that are relevant to Baltic affairs and beyond. The

Yearbook will serve as an important source of information not available elsewhere on practices of Estonia, Latvia and Lithuania in the area of foreign relations. Book reviews will include information on books published in the Baltic States and about Baltic issues.

### **True Perception**

Eight stories from the author of *A Book of American Martyrs* that display her "mastery of imagery and stream of consciousness" (Kirkus Reviews). Joyce Carol Oates is an unparalleled investigator of human personality. In these eight stories, she deftly tests the bonds between damaged individuals—brother and sister, teacher and student, two lonesome strangers on a subway—in the beautiful, bracing prose that has become her signature. In the title story, a white, aspiring professor in Detroit tries to shake a black, male shadow during the summer of the city's 1967 race riots. In "The Rescuer," a promising graduate student detours to inner-city Trenton, New Jersey, to save her brother from a downward spiral, only to find herself entranced by his dangerous new world. Meanwhile, a young woman prowls the New York City subways in search of her perfect man in "Lorelei." In each of these short stories, Oates portrays a desperate confrontation with the demons inside us. Sometimes it's the human who wins, and sometimes it's the demon. "Oates offers unexpected glimmers of redemption amid the grotesquerie, degradation, and exploitation that fill this collection's eight tales." —Publishers Weekly

### **Into the Heart**

Poor dialogue is one of the main reasons for a publisher's reader glazing over when reading a first-time novel, where the author has seen fit to include every superfluous utterance of every-day speech. The purpose of dialogue is to move the story along and to give added dimension to the characters through what they say, and often think. Creating Meaningful Dialogue helps to get rid of the dross from your typescript and retain the gold in the story. Try to incorporate the exercises given at the end of each chapter into your own writing where appropriate and see how it improves the flow of the dialogue by making the characters come alive. With added input from publishers and publisher's readers, this book is invaluable for all would-be novelists and fiction writers.

Yanomami raises questions central to the field of anthropology - questions concerning the practice of fieldwork, the production of knowledge, and anthropology's intellectual and ethical vision of itself. Using the Yanomami controversy - one of anthropology's most famous and explosive imbroglios - as its starting point, this book considers how fieldwork is done, how professional credibility and integrity are maintained, and how the discipline might change to address central theoretical and methodological problems. Both the most up-to-date and thorough public discussion of the Yanomami controversy.

The fundamentals and implementation of digital electronics are essential to understanding the design and working of consumer/industrial electronics, communications, embedded systems, computers, security and military equipment. Devices used in applications such as these are constantly decreasing in size and employing more complex technology. It is therefore essential for engineers and students to understand the fundamentals, implementation and application principles of digital electronics, devices and integrated circuits. This is so that they can use the most appropriate and effective technique to suit their technical need. This book provides practical and comprehensive coverage of digital electronics, bringing together information on fundamental theory, operational aspects and potential applications. With worked problems, examples, and

review questions for each chapter, Digital Electronics includes: information on number systems, binary codes, digital arithmetic, logic gates and families, and Boolean algebra; an in-depth look at multiplexers, de-multiplexers, devices for arithmetic operations, flip-flops and related devices, counters and registers, and data conversion circuits; up-to-date coverage of recent application fields, such as programmable logic devices, microprocessors, microcontrollers, digital troubleshooting and digital instrumentation. A comprehensive, must-read book on digital electronics for senior undergraduate and graduate students of electrical, electronics and computer engineering, and a valuable reference book for professionals and researchers.

### **The Mystery of the Syntilla Silvers**

A sharp distinction is usually drawn between public international law, concerned with the rights and obligations of states with respect to other states and individuals, and private international law, concerned with issues of jurisdiction, applicable law and the recognition and enforcement of foreign judgments in international private law disputes before national courts. Through the adoption of an international systemic perspective, Dr Alex Mills challenges this distinction by exploring the ways in which norms of public international law shape and are given effect through private international law. Based on an analysis of the history of private international law, its role in US, EU, Australian and Canadian federal constitutional law, and its relationship with international constitutional law, he rejects its conventional characterisation as purely national law. He argues instead that private international law effects an international ordering of regulatory authority in private law, structured by international principles of justice, pluralism and subsidiarity.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

## **Complete**

"Napoleon Chagnon's well-known case study, Yąnomamö: the Fierce People, begins with a first chapter on doing fieldwork among them. It is one of the features of this case study that makes it one of the most widely used in this series. Ever since The Fierce People appeared in 1968 readers have expressed their strong interest in a more complete account of Chagnon's experiences and methods of research with the Yąnomamö. The present study is a response to this wish, and as the reader will discover, a very satisfying one. Studying the Yąnomamö is satisfying because in it Chagnon explains not only how he went about the collection of data, why he considered it important, and how he organized it analytically, but also because his personal experience is described in vivid detail. Much of what he describes is pure adventure of the kind that most field anthropologists encounter in some degree, but rarely in quite this dramatic a context, for there are few people remaining in this world like the Yąnomamö"--Page vi.

## **High Crime Area**

The renowned anthropologist author of the best-selling Yanomamö describes his controversial life-long research among the Yanomamö Indians, describing how his beliefs in the evolutionary advantages of their inherent violence have been systematically rejected by politically correct scientists. 50,000 first printing.

## **The Confluence of Public and Private International Law**

In spite of the undoubtedly great and rising importance of the international legislative co-operation regarding private international law, it must be remembered that no successful unification or harmonization of conflict rules has ever taken place on the universal level, and that the conflict rules stemming from international legislative co-operation between a limited number of countries give rise to the same problems as non-harmonized rules, whenever they have to be used in relation to countries not participating in the legislative co-operation in question. This book will therefore focus on the last-mentioned problems and refrain from dealing with the particular issues arising from international legislative co-operation in the field of private international law. One of the principal aims of Michael Bogdan is to demonstrate the relationship between the national rules of private international law and the rest of the legal system of the forum country, in the first place its substantive private law and its law of civil procedure, as well as to illustrate the impact of the forum country's general ethical and other values on its private international law.

Complete will teach and inspire married couples who own a business to have their partnership support and enhance both the company and crucial spousal and family relationships. It is based on the premise that while owning and running a business is hard, managing that with the help of a spouse is really hard. The spousal partnership adds another layer of complexity because so much is at risk. Divorce rates hover at 50% and business failure rates are above 75% within the first 5 years. Entering into a spousal partnership combines two entities that have high probabilities of failure, and the fallout can be the loss of the business, the breakup of the marriage, or both. DeSantis offers practical action steps as well as heartfelt prayers-all proven through her own hard-won wisdom and experience as a child of serial entrepreneurs and years as co-owner with her husband of a business consultancy.

## **The Ordinary Parent's Guide to Teaching Reading**

Political Loyalty and the Nation-State examines the gradual weakening of the state's ability to order the political allegiances of its subjects. At the focal centre of the book lies the question of the extent to which it is possible to invest political principles, such as the rules and procedures of democracy, with a sentiment of loyalty and whether political loyalty can

become merely a matter of choice and personal responsibility. The authors consider theoretical issues, problems of loyalty arising from population movement and case studies of conflicts of loyalty from Italy, Northern Ireland, and Russia. It is shown that loyalty can become decoupled from state, territory and nation; that loyalties can be multiple; and that today's loyalties reflect advanced attitudes towards difference.

### **Studying the Yanomamö**

They want to know why this world is in bad shape, this book will give the answer and will help people forget about the things that happened to them in the past because they have a better future. With Effortless Beauty, Julie DuBose brings a new perspective to photography. She talks in an intimate way not just about how we express our experience with our camera, but about a whole new and fresh way to experience our visual world altogether. She guides us through the process of seeing without our usual habitual ways of experiencing what we see, so that we can have vivid, mind-stopping visual perceptions, and express those perceptions exactly as we see them. This book is a road map for taking a different kind of photograph, which might even lead to a different kind of living: direct living through direct seeing.

### **A House to Remember**

With this volume, the Baltic Yearbook of International Law celebrates the centenary of the three Baltic States: Estonia, Latvia and Lithuania. The editors of the Yearbook launched a call for papers on a theme: the Baltic States and International Law. The volume contains a selection of articles examining diverse issues and it is no surprise that the history of statehood and international law are closely intertwined in the case of the Baltic States. It is highly symbolic that the Baltic Yearbook of International Law, having been founded and hosted for many years by the Raoul Wallenberg Institute at Lund University in Sweden, has now, from 2018, come home and has taken up residence at the Riga Graduate School of Law (RGSL) in Latvia, in the very heart of the three Baltic States. Among the selected authors, the Yearbook is glad to continue to introduce new

authors from the region. The Baltic Yearbook of International Law is the first legal journal in the field and sub fields of international law published under the auspices of the Baltic Editorial Board that attempts to bring to the international debate issues that are of importance in the Baltic States, providing a forum for the views on topical international-law themes from Baltic and international scholars. The first volume appeared in 2001 with a symposium on the question of the international legal status of the Baltic States. The Yearbook contains State practice reports from Estonia, Latvia and Lithuania, thus serving as an important source of international law that is unavailable elsewhere. From time to time the Yearbook has offered articles discussing the history of international law and current issues in Eastern Europe and the Russian Federation, thus making regional discourse more accessible to a wider global audience.

Genuine art has the power to awaken and liberate. The renowned meditation master and artist Chögyam Trungpa called this type of art "dharma art"—any creative work that springs from an awakened state of mind, characterized by directness, unselfconsciousness, and nonaggression. Dharma art provides a vehicle to appreciate the nature of things as they are and express it without any struggle or desire to achieve. A work of dharma art brings out the goodness and dignity of the situation it reflects—dignity that comes from the artist’s interest in the details of life and sense of appreciation for

experience. Trungpa shows how the principles of dharma art extend to everyday life: any activity can provide an opportunity to relax and open our senses to the phenomenal world. An expanded edition of Trungpa's Dharma Art (1996), this book includes a new introduction and essay.

### **Yanomami**

Anthropologist Kenneth Good went to the rain forests of the Amazon to study the Yanomami. He found more than one of the few remaining peoples untouched by modern civilization. During more than a decade of observation, Good found himself accepted, indeed virtually adopted, by the tribe and eventually fell in love with a young Yanomami woman. In the process, he made exciting new discoveries about the tribal people and about himself. Into the Heart is the fascinating story of his journey of discovery.

### **Compass Points**

Milestones, particularly those as special as the twin-birth of a new century and millenium, lend themselves to rhapsody and the urge to say something positive and forward-looking. The Yearbook is not merely succumbing to this tendency, however, when it observes that, in some important respects, 2000 proved itself an auspicious opening. There was a flurry of activity among states to implement international humanitarian law (IHL), most of it a consequence of states ratifying the several humanitarian law treaties that were concluded in the late-Nineties. States are starting to indicate that they are taking humanitarian law, and particularly its penal provisions, more seriously than hitherto. A growing number of states are amending their penal codes (or examining the need to do so) to criminalise 3 serious breaches of humanitarian law. A major incentive is the need for states wishing to enter into the International Criminal Court (ICC) regime, and to take full advantage of the principle of complementarity, to adjust their national law to the requirements of the Rome Statute. This can be a one, two or several step process, and the legal and constitutional obstacles and challenges vary widely from state to state. Particularly encouraging are early signs that some states have been prepared to go beyond the substantive law as laid down in the Statute to, for instance, provide 4 broader definitions of crimes. Ratification and implementation of the ICC Statute presents a unique opportunity for states to contribute to the progressive development of customary international criminal law. Given the fact that ratification of the Statute has been proceeding apace, and that it is expected to come into force in 2002, much more activity in this sphere can be expected in the next few years. We may then see the emergence of layers or parallel systems of criminal enforcement of humanitarian law: by ad hoc international courts, the ICC and by states.
