Case conceptualization and treatment planning skills have always been important in providing quality care to clients. These skills are even more vital in today's managed care market for documenting clients' need for treatment and support interventions on brief, intermediate or long-term bases. This book enables readers to design case conceptualizations and treatment plans from diverse theoretical perspectives, including: behavioural; cognitive; process//experiential; family systems; dynamic; and transtheoretical. The author also demonstrates how readers can integrate important domains of human complexity into their clinical work, so that treatment can be tailored to a particular client. These domains include development, se

The very idea that Buddhist teachings can be mastered will arouse controversy within Buddhist circles. Even so, Daniel Ingram insists that enlightenment is an attainable goal, once our fanciful notions of it are stripped away, and we have learned to use meditation as a method for examining reality rather than an opportunity to wallow in self-absorbed mind-noise. This book sets out concisely the difference between concentration-based (sometimes

Mastering the Kennedy Axis V

A research methods text with a unique focus on evidence-based practice with couples and families, this book bridges the divide between research and clinical work. The text offers comprehensive, user-friendly coverage of measurement and design issues and basic qualitative and quantitative methods. Illustrating research concepts with clinically relevant examples and sample studies, it teaches clear steps for evaluating different types of studies and identifying common threats to validity. Of special value to therapists, it provides a systematic framework for using research to guide the selection and evaluation of interventions that meet the needs of particular clients. Pedagogical features: *End-of-chapter "Applications" sections showing how to evaluate specific methods. *Appendices with quick-reference guides and recommended resources. *Instructive glossary. See also the authors' Essential Skills in Family Therapy, Third Edition: From the First Interview to Termination, which addresses all aspects of real-world clinical practice, and Essential Assessment Skills for Couple and Family Therapists, which shows how to weave assessment into all phases of therapy.

Multicultural Psychology

How can we connect the spiritual realizations of Buddhism with the psychological insights of the West? In *Toward a Psychology of Awakening* John Welwood addresses this question with comprehensiveness and depth. Along the way he shows how meditative awareness can help us develop more dynamic and vital relationships and how psychotherapy can help us embody spiritual realization more fully in everyday life. Welwood's psychology of awakening brings together the three major dimensions of human experience: personal, interpersonal, and suprapersonal, in one overall framework of understanding and practice.

Socioculturally Attuned Family Therapy addresses the need for socially responsible couple, marriage, and family therapy that infuses diversity, equity, and inclusion throughout theory and clinical practice. The text begins with a discussion of societal systems, diversity, and socially just practice. The authors then integrate principles of societal context, power, and equity into the core concepts of ten major family therapy models, paying close attention to the "how to's" of change processes through a highly diverse range of case examples. The text concludes with descriptions of integrative, equity-based family therapy guidelines that clinicians can apply to their practice.

Case Conceptualization

This revolutionary, user-friendly textbook not only guides social workers in developing competence in the DSM system of diagnosis, it also assists them in staying attuned during client assessment to social work values and principles: a focus on client strengths, concern for the worth and dignity of individuals, appreciation of environmental influences on behavior, and commitment to evidence-informed practice. The authors, seasoned practitioner-scholars, provide an in-depth exploration of fourteen major mental disorders that social workers commonly see in practice, including anxiety disorders, depression, bipolar disorder, and schizophrenia. They skillfully integrate several perspectives in order to help practitioners meet the challenges they will face in client assessment. A risk and resilience framework helps social workers understand environmental influences on the emergence of mental disorders and the strengths that clients already possess. Social workers will also learn to apply critical thinking to the DSM when it is inconsistent with social work values and principles. Finally, the authors catalog the latest evidence-based assessment instruments and treatments for each disorder so that social workers can intervene efficiently and effectively, using the best resources available. Students and practitioners alike will appreciate the wealth of case examples, evidence-based assessment instruments, treatment plans, and new social diversity sections that make

Mastering the DSM-5

This text is a treatment planner and theory guide for therapists working from systemic and postmodern approaches. Unlike existing resources, this treatment planner provides a means to directly integrate family therapy theory and practice. By providing treatment planning strategies along with complete overviews of specific theories, the book provides a remedy for the common "missing link" between theory and practice. The purpose of this book is to fill the ever-widening gap between formal training in theory and actual practice in managed-care dominated workplaces. The text covers 11 of the most widely used family therapies providing a summary for each theory and then specific strategies for developing a treatment plan.
