Patient outcomes research

Measurement Tools in Patient Education, Second Edition

The new edition upholds the premise that knowledge about research process and design is mandatory in today's health care arena, and that all nurses and midwives need to understand research findings and their implication for changing practice. It is completely revised with many new chapters. The text has been restructured into three sections. Section 1 Research Awareness sets the scene for the importance of nursing and midwifery research and provides an overview of

Get Free Measurement Of Nursing Outcomes Volume 1 Measuring Nursing Performance In Practice Education And Research

research theory and practice as processes. Chapters on searching for and reviewing the literature provide detailed advice for undergraduates and facilitate access to research articles online. One of the new chapters discusses ethical issues in Australia and New Zealand. Section 2 Appreciation and Application provides a detailed discussion of qualitative, quantitative and mixed methods research approaches with many useful examples from the clinical area. Section 3 Conducting primary research is new and is designed to accommodate both undergraduate and postgraduate students in their research effort. Writing research proposals may be a requirement for undergraduates in their research program and postgraduates will find the information useful for undertaking a higher degree or applying for university or external funding. This final Section is also useful as a guide on disseminating and publishing conducted research findings. Combined Australian and New Zealand editorship ensures greater trans-Tasman coverage, awareness and relevance. Contributions from international luminaries are balanced by a heightened focus on research conducted within Australia and New Zealand. New edition conscientiously recognises midwifery research as related to but independent from nursing. The research process-driven approach is directed towards 'consumers' of research, and the comprehensive coverage extends from undergraduate through to a postgraduate level of knowledge. Expanded pedagogy includes Key Terms and Learning Outcomes at the beginning of each chapter; Icons throughout that direct readers to web-based material; Evidence-based Tips, Research in Brief boxes and Points to Ponder for constant reinforcement that links evidence to practice. Integrated Tutorial Triggers with suggested answers provided and Multiple Choice Questions enable students to assess their understanding of key points. Evolve Website provides True/False questions and access to journal articles cited in the text, with additional reflective questions. Australian adaptation of Nursing Research: Lobiondo-Wood & Haber

Measurement of Nursing Outcomes, 2nd Edition

This thoroughly updated and revised new edition of the award-winning series on measurement presents nearly 80 actual, tested instruments for assessing nursing outcomes in a multitude of settings and situations. Each tool is accompanied by a descriptive essay that includes information on purpose, administration, scoring, and reliability and validity. Whether you are interested in measuring patient outcomes, evaluating patient learning, or assessing the effectiveness of teaching and learning in a nursing school, this compendium can provide the authoritative tools you need. Volume 1: Measuring Nursing Performance in Practice, Education, and Research Carolyn Feher Waltz, PhD, RN, FAAN and Louise Sherman Jenkins, PhD, RN, FAAN 2001 Volume 2: Client Outcomes and Quality of Care Ora Lea Strickland, PhD, RN, FAAN and Coleen Dilorio, PhD, RN, FAAN December 2002 Volume 3: Self Care and Coping Ora Leah Strickland, PhD, RN, FAAN and Coleen Dilorio, PhD, RN, FAAN December 2002

Measurement of Nursing Outcomes, 2nd Edition, Volume 3

cs.nurse.res_theory

Measurement of Nursing Outcomes, 2nd Edition, Volume 3

This book provides up-to-date resources and examples of outcome measures, tools and methods that can be used by APNs in their quest to keep pace with new developments in the rapidly expanding field of outcome measurement. The chapter authors, recognized expert practitioners, offer invaluable insight into the process of conducting outcomes assessments in all APN practice, including the clinical nurse, nurse practitioner, certified registered nurse anesthetist and certified nurse midwife practice specialties. Detailed figures, tables, and examples of outcome studies from actual research in APN practice make this an essential resource for evaluating the true impact the advanced practice nurse has on the delivery and fulfillment of care.

Issues in Discovery, Experimental, and Laboratory Medicine: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Discovery, Experimental, and Laboratory Medicine. The editors have built Issues in Discovery, Experimental, and Laboratory Medicine: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Discovery, Experimental, and Laboratory Medicine in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Discovery, Experimental, and Laboratory Medicine: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Measurement of Nursing Outcomes

Ulrich & Canale's Nursing Care Planning Guides - E-Book

Outcome Assessment in Advanced Practice Nursing, Second Edition

'The 4th edition of this extensive text is an outstanding resource prepared by nurses (and a librarian) for nurses. In a structured and helpful style it presents thousands of items from the literature - published papers, reports, books and electronic resources - as a clear, accessible, and most of all useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well-conceived, and the "How to use this book" section is remarkably simple. The book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks' - RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research, and includes references for books, journal papers and Internet resources. Designed to act as a 'signpost' to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care and the social sciences. Entries are concise, informative and accessible, and are arranged under three main sections: · 'Sources of Literature' covers the process of literature searching, including using libraries and other tools for accessing literature · 'Methods of Inquiry' includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data · 'The Background to Research in Nursing' encompasses the development of nursing research; the profession's responsibilities; the role of government; funding; research roles and careers; and education for research. Fully revised and updated, the Fourth Edition includes just under 3000 entries, of which 90% are new. It has extensive coverage of US, UK literature and other international resources. This new edition will be an essential guide for all those with an interest in nursing research, including students, teachers, librarians, practitioners and researchers.

Measurement of Nursing Outcomes, 2nd Edition

"As in the first edition, the author has done a magnificent job compiling these instruments and providing important information that the reader can use to evaluate their usefulness." --Ora Lea Strickland, RN, PhD, FAAN (From the Foreword) This book provides all the essential research tools for assessing and measuring caring for those in the caring professions. Watson's text is the only comprehensive and accessible collection of instruments for care measurement in clinical and educational nursing research. The measurements address quality of care, patient, client, and nurse perceptions of caring, and caring behaviors, abilities, and efficacy. Newly updated, this edition also contains three new chapters, which document the most effective caring language and provide innovative methods of selecting appropriate tools for measurement based on validity and reliability. Key features of new edition: A chapter providing a comprehensive literature review of the

Winner of an AJN Book of the Year Award!. Now in its third edition, this classic text on the how-to's of measurement presents the basic principles and terminology, along with practical information, on how to design and implement measurement instruments in nursing and health care. The book is for nurses in a variety of roles, including student, educator, clinician, researcher, administrator, and consultant. An appendix of data sources and other measurement resources, including internet sites, completes the book.

SCI Nursing

Assessing and Measuring Caring in Nursing and Health Science

Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the

Get Free Measurement Of Nursing Outcomes Volume 1 Measuring Nursing Performance In Practice Education And Research

most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Resources for Nursing Research

This is a compendium of over 30 tools for the measurement of professional and educational outcomes in nursing. It is a second edition of the award winning series of books on measuring outcomes in nursing. The tools and methods are presented with attention to purpose and utility, conceptual basis, development, testing, and reliability and validity assessments. Major topic areas focus on clinical decision making and performance in education and practice, student outcomes, and research. In most cases the complete measurement instrument is included in the book.

Nursing and Midwifery Research

Measurement of Nursing Outcomes, 2nd Edition, Volume 3

This convenient, concise version of the best-selling Mosby's Dictionary of Medicine, Nursing, and Health Professions provides condensed definitions to incorporate only the most essential information. Mosby's Pocket Dictionary includes all of the information you need, including content on diseases, procedures, equipment, drugs, and so much more. Screened thumb tabs make it easy to locate definitions quickly, and a list of common medical abbreviations printed in the front and back covers make this a perfect reference for clinical practice. UNIQUE! Emphasis on nursing and health science

terminology makes this the most useful pocket dictionary for students and practitioners in nursing and health professions. Its small size makes it easy to transport, and the sturdy, flexible cover increases the durability. The practical, straightforward alphabetical organization with no subentries and easy-to-use thumb tabs make it easy to find and understand information. UNIQUE! A section on nursing diagnoses with entries for all NANDA-approved nursing diagnoses prepares you for real-world practice. British spellings for selected entries help you recognize alternate spellings. Etymologies aid your understanding of medical terminology and help you develop a professional vocabulary. Pronunciations provided for key entries help you use terminology correctly in everyday practice. Includes 38,700 definitions, with over 5,000 new and 25,000 revised definitions, to reflect the latest information in all areas of nursing, medicine, and health professions. UNIQUE! Current definitions for all NANDA nursing diagnoses, NIC (Nursing Interventions Classifications) and NOC (Nursing Outcomes Classifications) ensure you have the most up-to-date information for clinical documentation, communication, and care evaluation.

Critical Thinking & Nursing Diagnosis

Designated a Doody's Core Title! "This is a valuable resource for readers seeking basic to advanced information on measurement. It should be on the bookshelf of all researchers, and a requirement for graduate nursing students."Score: 100, 5 stars--Doody's Medical Reviews "this book is a wonderful shelf reference for nurse researcher mentors and investigators who may need to explore content or use content to design, test, select, and evaluate instruments and methods used in measuring nurse concepts and outcomes."--Clinical Nurse Specialist This fourth edition presents everything nurses and health researchers need to know about designing, testing, selecting, and evaluating instruments and methods for measuring in nursing. Thoroughly updated, this fourth edition now contains only the latest, most cutting-edge measurement instruments that have direct applicability for nurses and health researchers in a variety of roles, including students, clinicians, educators, researchers, administrators, and consultants. Using clear and accessible language, the authors explain in detail, and illustrate by example, how to conduct sound measurement practices that have been adequately tested for reliability and validity. This edition is enriched with topics on the leading edge of nursing and health care research, such as measurement in the digital world, biomedical instrumentation, new clinical data collection methods, and methods for measuring quality of care. Key features: Provides new and emerging strategies for testing the validity of specific measures Discusses computer-based testing: the use of Internet research and data collection Investigates methods for measuring physiological variables using biomedical instrumentation Includes information on measurement practices in clinical research, focusing on clinical data collection methods, such as clinimetrics Identifies the challenges of measuring quality of care and how to address them

Annual Review of Nursing Research, Volume 27, 2009

Guidance and insights on managing the single most expensive nursing diagnosis.

Measurement of Nursing Outcomes: Client outcomes and quality of care

This volume sets the stage for understanding the evolution and importance of nursing science in the field by providing a brief historical overview of the tobacco epidemic and emerging science, describing changing trends in tobacco use, reviewing health risks of smoking and benefits of quitting, reviewing concepts in nicotine addiction and evidence-based recommendations for tobacco dependence treatment. Also highlighted are nursing science efforts and leadership in addressing two barriers to mounting programs of nursing research in tobacco control: the lack of nursing education and training in tobacco control and the limited research funding and mentorship. Finally, the contributors to this volume address the issue of smoking in the profession as it influences nurses' health, interventions with patients, and, potentially, scholarship efforts.

Issues in Discovery, Experimental, and Laboratory Medicine: 2011 Edition

This thoroughly updated and revised new edition of the award-winning series on measurement presents nearly 80 actual, tested instruments for assessing nursing outcomes in a multitude of settings and situations. Each tool is accompanied by a descriptive essay that includes information on purpose, administration, scoring, and reliability and validity. Whether you are interested in measuring patient outcomes, evaluating patient learning, or assessing the effectiveness of teaching and learning in a nursing school, this compendium can provide the authoritative tools you need.

Measurement in Nursing and Health Research

Awarded first place in the 2013 AJN Book of the Year Awards in the Advanced Practice Nursing category Named a Doody's Core Title "This is an excellent and timely tool for advanced practice nurses." Score: 100, 5 stars -Doody's Medical Reviews Measuring the results of APN care has become increasingly important as a way to demonstrate the significant impact of APN nurses on practice outcomes. The third edition of this award-winning volume has been updated to provide the most current knowledge, perspectives, and research on assessing outcomes of APN care. It addresses not only the health outcomes of APN practice but the economic impact of APN care as well. Chapters discuss outcome measurement in all areas of advance practice nursing, including identifying outcomes in specialty areas and in community and ambulatory settings. The text provides detailed descriptions of how to conduct outcomes assessments, how to locate the most current instruments and measures for APN assessment, and perspectives on international initiatives in APN assessment. Examples of outcomes studies at the DNP level are culled from the most current published projects. Written by expert practitioners,

Measurement of Nursing Outcomes: Measuring nursing performance in practice, education, and research

Measurement of Nursing Outcomes: Measuring nursing performance: practice, education, and research

This 25th anniversary edition of the Annual Review of Nursing Research is focused on nursing science in vulnerable populations. Identified as a priority in the nursing discipline, vulnerable populations are discussed in terms of the development of nursing science, diverse approaches in building the state of the science research, integrating biologic methods in the research, and research in reducing health disparities. Topics include: Measurement issues Prevention of infectious diseases among vulnerable populations Genomics and proteomics methodologies for research Promoting culturally appropriate interventions Community-academic research partnerships with vulnerable populations Vulnerable populations in Thailand: women living with HIV/AIDS As in all volumes of the Annual Reviews, leading nurse researchers provide students, other researchers, and clinicians with the foundations for evidence-based practice and further research.

Saunders Q&A Review for the NCLEX-RN® Examination E-Book

With more than 5,800 test questions, Saunders Q&A Review for the NCLEX-RN® Examination, 5th Edition provides the practice you need to succeed on the NCLEX-RN exam. To enhance your review, each question includes a test-taking strategy, rationales for correct and incorrect answers, and page references to major nursing textbooks. The companion

Get Free Measurement Of Nursing Outcomes Volume 1 Measuring Nursing Performance In Practice Education And Research

Evolve website adds a pre-test to help in identifying any areas of weakness, and lets you answer questions in quiz, study, or exam mode. Written by NCLEX review expert Linda Anne Silvestri, this book organizes questions to match the Client Needs and Integrated Processes found in the most recent NCLEX-RN test plan. This review is part of the popular Saunders Pyramid to Success, which has helped more than 1.5 million nurses pass the NCLEX exam! A detailed test-taking strategy is included for each question, providing clues for analyzing and selecting the correct answer. Rationales are provided for both correct and incorrect answer options. Questions categorized by Cognitive Level, Client Needs area, Integrated Process, and clinical content area help you focus on the question types you find most difficult. All alternate item format questions (multiple response, prioritizing, fill-in-the-blank, figure/illustration (hot spot), audio, video, and chart/exhibit) are included. Chapters organized by Client Needs simplify your review and reflect the question mix in the NCLEX-RN® test plan blueprint. A 85-question comprehensive exam represents the content and percentages of question types identified in the NCLEX-RN test plan. Preparation for your NCLEX-RN review includes chapters on nonacademic preparation, test-taking strategies, the CAT format, and a view of the NCLEX-RN from a new graduate's perspective. Page references to Elsevier textbooks direct you to remediation material for any question answered incorrectly. A companion Evolve website includes a pre-test to help in identifying any areas of weakness, and lets you answer questions in quiz, study, or exam mode. Automatic updates of the Evolve site allow you to check for changes to content or functionality throughout the life of the edition. Content from the most recent NCLEX-RN® test plan covers the newest topics you could see on the exam. 600 questions are added, for a total of 5,800 in the book and on the companion Evolve website. Hundreds of new alternate item format questions provide even more opportunity for practice. A Priority Nursing Tip is included with each question, providing important patient care information. A full-color design and over 20 new figures enhance understanding and increase the book's visual appeal. Review format includes chapters on how to study for and take the NCLEX examination, and includes a test for each Client Need category, a test on Integrated Processes, and a comprehensive test for practice in answering questions from all areas. A new content-area index makes it easier to find questions and review a given disorder/topic.

Outcome Assessment in Advanced Practice Nursing

This major reference work presents actual, tested instruments for assessing nursing outcomes in nearly 100 different areas of practice and education.

Measurement of Nursing Outcomes: Measuring client outcomes

This is a compendium of over 30 tools for the measurement of professional and educational outcomes in nursing. It is a second edition of the award winning series of books on measuring outcomes in nursing. The tools and methods are presented with attention to purpose and utility, conceptual basis, development, testing, and reliability and validity assessments. Major topic areas focus on clinical decision making and performance in education and practice, student outcomes, and research. In most cases the complete measurement instrument is included in the book.

Nursing Informatics '91

"Australia welcomes this Fourth International Conference on Nursing Use of Computers and Information Science. The conference aim is to provide an opportunity for the sharing of knowledge and experiences regarding the use of information technology in health care. The theme is "Nurses Managing Information in Health Care". This was chosen as health care management, particularly hospital management, has undergone many changes since the United States of America led the change through its use of diagnosis related groups (DRG's) for funding purposes."--p. vi.

Pressure Ulcers

This exciting new resource is designed to assist undergraduate physiotherapy students and new graduates in confidently assessing patients in a range of physiotherapy specialties outside of the 'core' areas of practice. Areas covered include paediatrics, geriatrics, mental health and rheumatology. Valuable content is easily accessible in a small portable format which will be an invaluable reference during placements or practice. Each chapter provides a concise overview of the philosophy and the specific assessment processes for each of the 17 practice specialties. A wealth of online learning resources are also available with the Guide, these include access to case studies, multiple-choice questions and a reference
