"Silhouettes are an increasingly popular form of capturing portraits with a history that goes back hundreds of years. In this unique how-to book, silhouette artist Charles Burns teaches the basic techniques needed for making silhouettes: learning the proportions of a profile, tracing a shadow, reducing an image, drawing and cutting freely, and his own 'natural waves' technique. You'll learn to create scissor-cut portraits, painted silhouettes, hollow-cut silhouettes, silhouettes painted on glass, caricatures, and more, as well as how to use color, applique, and three-dimensional effects in creative and innovative ways and how to mount and display

your creations"--P. [4] of cover.

The Odyssey of Homer

The substantial burden of death and disability that results from interpersonal violence, road traffic injuries, unintentional injuries, occupational health risks, air pollution, climate change, and inadequate water and sanitation falls disproportionately on low- and middle-income countries. Injury Prevention and Environmental Health addresses the risk factors and presents updated data on the burden, as well as economic analyses of platforms and packages for delivering cost-effective and feasible interventions in these settings. The volume's contributors demonstrate that implementation of a range of prevention strategies-presented in an essential package of interventions and policies-could achieve a convergence in death and disability rates that would avert more than 7.5 million deaths a year.
