Parenting Bright Kids Who Struggle in School guides parents through the challenging and often unfamiliar landscape of raising kids who have been labeled with learning differences, including dyslexia, ADHD, autism, sensory processing disorder, and more. This book: Builds upon Harvard professor Todd Rose's groundbreaking research in the "Science of Individuality." Helps parents target their child's jagged profile of strengths and weaknesses. Explains a child's context of learning and multiple pathways. Teaches revolutionary techniques to encourage strengths and mitigate weaknesses. Helps parents manage the emotional fallout of raising a child who does not conform to the "average" model of learning. Parenting Gifted Children 101

As seen on PBS's POV An unprecedented guide to helping black boys achieve success at every stage of their lives—at home, at school, and in the world Regardless of how wealthy or poor their parents are, all black boys must confront and surmount the "achievement gap": a divide that shows up not only in our sons' test scores, but in their social and emotional development, their physical well-being, and their outlook on life. As children, they score as high on cognitive tests as their peers, but at some point, the gap emerges. Why? This is the question Joe Brewster, M.D., and Michèle Stephenson asked when their own son, Idris, began struggling in a new school. As they filmed his experiences for their award-winning documentary American Promise, they met an array of researchers who had not only identified the reasons for the gap, but had come up with practical, innovative solutions to close it. In Promises Kept, they explain • how to influence your son's brain before he's even born • how to tell the difference between authoritarian and authoritative discipline—and why it matters • how to create an educational program for your son that matches his needs • how to prepare him for explicit and implicit racism in school and in the wider world • how to help your child develop resilience, self-discipline, emotional intelligence, and a positive outlook that will last a lifetime Filled with innovative research, practical strategies, and the voices of parents and children who are grappling with these issues firsthand, Promises Kept will challenge your assumptions and inspire you to make sure your child isn't lost in the gap. Praise for Promises Kept "The authors offer a plethora of information and advice geared toward the specific developmental needs of black boys. . . . Thorough and detailed, this guidebook is also a call to action. As Brewster sees it, when people of color remain complacent, they not only break a tacit promise to future generations to achieve social equity, they also imperil the futures of both the nation and the planet. A practical and impassioned parenting guide."—Kirkus Reviews "A penetrating look at the standard practices, at school and at home, that contribute to the achievement gap between the races and the sexes that seems to put black boys at a disadvantage. [Brewster and Stephenson] debunk myths and offer ten parenting and education strategies to improve the prospects for black boys to help them overcome racial stereotypes and low expectations. . . . This is a practical and insightful look at the particular challenges of raising black males."—Booklist

Intelligence That Comes from the Heart Every parent knows the importance of equipping children with the intellectual skills they need to succeed in school and life. But children also need to master their emotions. Raising an Emotionally Intelligent Child is a guide to teaching children to understand and regulate their emotional world. And as acclaimed psychologist and researcher John Gottman shows, once they master this important life skill, emotionally intelligent children will enjoy increased self-confidence, greater physical health, better performance in school, and healthier social relationships. Raising an Emotionally Intelligent Child will equip parents with a five-step "emotion coaching" process that teaches how to:

- * Be aware of a child's emotions
- * Recognize emotional expression as an opportunity for intimacy and teaching
- * Listen empathetically and validate a child's feelings
- * Label emotions in words a child can understand
- * Help a child come up with an appropriate way to solve a problem or deal with an upsetting issue or situation

Written for parents of children of all ages, Raising an Emotionally

Intelligent Child will enrich the bonds between parent and child and contribute immeasurably to the development of a generation of emotionally healthy adults.

There's nothing more frustrating than watching your bright, talented son or daughter struggle with everyday tasks like finishing homework, putting away toys, or following instructions at school. Helpful worksheets and forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Small changes can add up to big improvements--this empowering book shows how. "The Underachieving Gifted Child: Recognizing, Understanding, and Reversing Underachievement" answers these important questions. Although there are many

factors that contribute to achievement, achievement-oriented students exhibit four key traits: (1) they believe that they have the skills to perform well, (2) they expect that they can succeed, (3) they believe what they are doing is meaningful, and (4) they set realistic expectations and implement strategies to successfully complete their goals. In this volume, parents and teachers will learn specific strategies to improve student achievement by improving students' attitudes in these four important areas.

Beginning with sensible strategies to determine whether--and in which areas--your child is gifted, this book takes parents through selecting an appropriate day-care center, a school, and a home reference library. It helps us figure out where our role stops and the school's role begins, as well as detailing ways to keep our children's creativity alive and how to cope with sibling rivalry and our own doubts and fears. Also included are a recommended reading list, a special section on the roles of the computer and television in your gifted child's life, and much more.
