Pediatric Nurse Practitioner Certification Review Guide

This book reflects the cumulative work of two previous iterations and includes their complete text. It is a foundational volume that articulates the essentials of this specialty, its accountabilities and activities - the who, what, when, where, and how of its practice - for both specialists and generalists. The 16 standards themselves - those by which all nurses in this specialty practice and their practice competencies measured and evaluated - are grounded in the perspectives and priorities of pediatric nursing and form the core of the book. The book's extensive scope of practice discussion - of its characteristics, development and trends, education and training, its practice environments and settings, its general and specialized practice roles, its ethical and conceptual bases - lends a broad context for

understanding and using these standards. Although this reference and guide is mainly for practicing nurses and nursing faculty and students, Pediatric Nursing: Scope and Standards of Practice is also an essential source document for other pediatric specialists, healthcare providers, researchers, and scholars.

Authored and endorsed by the National Association of Pediatric Nurse Practitioners (NAPNAP) and the Association of Faculties of Pediatric Nurse Practitioners (AFPNP), this core review accompanies the Core Curriculum for Primary Care Pediatric Nurse Practitioners. It provides practice questions for recent graduates for both pediatric and family nurse practitioner programs to use in their respective certification exams offered by the PNCB and ANCC.

The Future of Nursing

"The Pediatric Nurse Practitioner Certification Review Guide presents information and current standards of practice for Nurse Practitioners (NP) in the pediatric primary care setting. One major change is the certification for PNPs will only be offered by PNCB instead of both PNCB and American Nurses Credentialing Center (ANCC). PNCB has changed their blueprint. The current content outline is based on our 2017-18 Job Task Analysis (JTA) research. This routine, required research ensures that exam content accurately represents current pediatric primary care nurse practitioner practice in the U.S. The revised book would focus on the current blueprint, released Sept 2018"--

Acute Care Nurse Practitioner Certification Study Question Book

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
