"Lowenfeld examines the major elements of economic law in the international arena including the World Trade Organization and its antecedents; dumping, subsidies, and other devices that alter the market; the International Monetary System, including the collapse of the Bretton Woods system; the debt of developing countries; the law of foreign direct investment, including changing perceptions of the rights of host states and multinational enterprises; and economic sanctions. The book also contains chapters on competition law, environmental law, and new chapters on intellectual property and the various forms of arbitration; demonstrating how these subjects fit into the framework of international economic law."--BOOK JACKET.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

This fully updated second edition of Jurisdiction in International Law examines the international law of jurisdiction, focusing on the areas of law where jurisdiction is most contentious: criminal, antitrust, securities, discovery, and international humanitarian and human rights law. Since F.A. Mann's work in the 1980s, no analytical overview has been attempted of this crucial topic in international law: prescribing the admissible geographical reach of a State's laws. This new edition includes new material on personal jurisdiction in the U.S., extraterritorial applications of

human rights treaties, discussions on cyberspace, the Morrison case. Jurisdiction in International Law has been updated covering developments in sanction and tax laws, and includes further exploration on transnational tort litigation and universal civil jurisdiction. The need for such an overview has grown more pressing in recent years as the traditional framework of the law of jurisdiction, grounded in the principles of sovereignty and territoriality, has been undermined by piecemeal developments. Antitrust jurisdiction is heading in new directions, influenced by law and economics approaches; new EC rules are reshaping jurisdiction in securities law; the U.S. is arguably overreaching in the field of corporate governance law; and the universality principle has gained ground in European criminal law and U.S. tort law. Such developments have given rise to conflicts over competency that struggle to be resolved within traditional jurisdiction theory. This study proposes an innovative approach that departs from the classical solutions and advocates a general principle of international subsidiary jurisdiction. Under the new proposed rule, States would be entitled, and at times even obliged, to exercise subsidiary jurisdiction over internationally relevant situations in the interest of the international community if the State having primary jurisdiction fails to assume its responsibility.

### **The Restatement of Suretyship & Guaranty**

The law of torts recognises many defences to liability. While some of these defences have been explored in detail, scant attention has been given to the theoretical foundations of defences generally. In particular, no serious attempt has been made to explain how defences relate to each other or to the torts to which they pertain. The goal of this book is to reduce the size of this substantial gap in our understanding of tort law. The principal way in which it attempts to do so is by developing a taxonomy of defences. The book shows that much can be learned about a given defence from the way in which it is classified. This book has been awarded Joint Second Prize for the 2014 Society of Legal Scholars Peter Birks Prize for Outstanding Legal Scholarship.

Election administration is essential to the proper functioning of our democracy. The American Law Institute's first Principles in this area focuses on two areas of great importance: non-precinct voting and the resolution of disputed elections. Part I provides principles for use by jurisdictions that wish to use absentee-voting or early-voting options as a supplement to in-person precinct-based voting on Election Day. Part II concerns principles applicable to disputed elections generally, while Part III specifically concerns procedures necessary for disputed presidential elections given their uniquely challenging scheduling constraints.

### **A Model Land Development Code**

In this groundbreaking book, Scalia and Garner systematically explain all the most important principles of constitutional, statutory, and contractual interpretation in an engaging and informative style with hundreds of illustrations from actual cases. Is a burrito a sandwich? Is a corporation entitled to personal privacy? If you trade a gun for drugs, are you using a gun in a drug transaction? The authors grapple with these and dozens of equally curious questions while explaining the most principled, lucid, and reliable techniques for deriving meaning from authoritative texts. Meanwhile, the book takes up some of the most controversial issues in modern jurisprudence. What, exactly, is "textualism?" Why is "strict construction" a bad thing? What is the true doctrine of "originalism?" And which is more important: the spirit of the law, or the letter? The authors write with a well-argued point of view that is definitive yet nuanced, straightforward yet sophisticated.

Restitution is a body of law that has immense practical value and wide application to disputes of all sorts. Simply put, it is the set of rules that govern recovery of gains that a party should not keep—or “unjust enrichment,” as it is formally called; and unjust enrichment occurs every day in both private and commercial transactions. Restitution has the dual distinction of being one of the most useful but overlooked bodies of law, due to its lack of study by several generations of modern lawyers. Without a single casebook in print on the subject, it has been nearly impossible to teach restitution law in the past. Restitution and Unjust Enrichment: Cases and Notes fills that void and presents the substance, remedies

importance, not only for the development of the law of unjust enrichment in the US, but also for global scholarship relating to this area of private law. The Restatement First appeared in 1937, and the Restatement Second was abandoned; hence the Restatement Third is the most significant survey of the American law on this topic for over 70 years. Private law has been a comparatively neglected area of study in US law schools for several decades, and this is particularly true of the law of unjust enrichment. However, the appearance of the Restatement Third has prompted a renewal of interest in the subject among US scholars, and it is hoped that the present volume of essays will contribute to this revival, while reflecting on the lessons to be learned from the Restatement by other legal systems. Featuring the work of leading scholars from the UK, Germany, South Africa, Canada, Hong Kong and Australia, the essays undertake critical and comparative analysis of the Restatement, and offer fresh insights into the rules that it articulates.
