### **New Yesterdays**

This is the revised edition of Dr. Stevenson's 1987 book, summarizing for general readers almost forty years of experience in the study of children who claim to remember previous lives. For many Westerners the idea of reincarnation seems remote and bizarre; it is the author's intent to correct some common misconceptions. New material relating to birthmarks and birth defects, independent replication studies with a critique of criticisms, and recent developments in genetic study are included. The work gives an overview of the history of the belief in and evidence for reincarnation. Representative cases of children, research methods used, analyses of the cases and of variations due to different cultures, and the explanatory value of the idea of reincarnation for some unsolved problems in psychology and medicine are reviewed.

### **Adventures of Huckleberry Finn**

"Time to Make It Stop" is a simple, easy to read and fun guide to relieving the stress and anxiety of today's hectic modern life. Each page comes alive with deceptively simple cartoon illustrations that delight the eye and open the mind to the timeless world of "Now" and the gift called the Present. It is written by Jim George, who combines a thirty-year career in animation and children's books with a private hypnotherapy and counseling practice to create a one-of-a-kind "Dr. Seuss of Self Help" experience.

Jim Cramer, host of CNBC's Mad Money and bestselling author and financial guru, offers specific advice about how to overcome your fear of the markets and put your investments back on track to recover from the financial debacle of 2008-2009. You don't even look at your 401(k) statements any longer. When mail comes from your broker or your mutual fund, you throw it in a drawer unopened. You know how bad things are and you're just waiting for them to improve before you start thinking about your money again. But how long will that take? How many opportunities will you miss while you hide your head in the sand? Shouldn't you be doing something? Jim Cramer says that there are positive steps you can take to

start the financial healing process. You can start to get back to even, then go from there. Cramer explains how to make the best of the bad situation you're in, and how not to succumb to fear and panic. He tell you what steps to take depending on your age and your financial goals. Getting Back to Even will include advice on refinancing a mortgage, recovering from job loss or downsizing, and making a new financial plan. It will include twenty new rules for investing that fit the current economic climate. Jim Cramer believes that the stock market is still the best long-term investment anyone can make. He'll offer guidance on which stocks to select, or how to find a reliable and successful mutual-fund manager, and how to spot the economic recovery when it happens. Whether you're 25 and investing to build wealth or 65 and hoping to restore your retirement savings, you'll need the advice Jim Cramer offers in Getting Back to Even.

Tom Brokaw applied the term The Greatest Generation to those who "came of age during the Depression and the Second World War, and went on to build modern America - men and women whose everyday lives of duty, honor, achievement, and courage gave us the world we have today." Without detracting from the record of that generation, I want to draw attention to the preceding generation, the parents who raised these people and instilled in them the qualities and values so essential

to their later performance. Those parents faced a major war in their youth, the First World War. With far less education than their children, they faced economic boom and bust, and made career adjustments through changing times. During the Great Depression, they continued to earn a livelihood and to "bring home the bacon" for the fledglings of the Greatest Generation. Many endured major career disruptions again with the onset of the Second World War, yet became too old, or had too many responsibilities, to enter new career fields that opened in the booming postwar years. Many past generations have made enormous contributions, so I will avoid superlatives and any claim to uniqueness. I will refer to this generation simply as A Stalwart Generation. To represent this generation, I will focus on a man of working-class background whose diverse experience touched many aspects of that period's history. His name was Jim. He lived from 1884 to 1954. Also available as a color paperback and Kindle e-book.

## **Ephaidria**

Can anyone speak a language he or she has not learned normally, in childhood or later? Claims to have accomplished this are made from time to time, but only rarely do they receive support when carefully examined. In this volume, Dr. Stevenson presents detailed reports of two cases that seem authentic. Authentic instances of speaking a language that has not been learned normally (responsive xenoglossy) suggest that another personality (perhaps one of a previous life) had learned the language. Cases of responsive xenoglossy thus add to the evidence concerning the survival of human personality after death.

She decides for Arthur then she sees him with a young woman and her life falls apart, again.

## **Jim Cramer's Getting Back to Even**

NEW YORK TIMES BESTSELLER Gregory Zuckerman, the bestselling author of *The Greatest Trade Ever* and *The Frackers*, answers the question investors have been asking for decades: How did Jim Simons do it? Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Jim Simons is the greatest money maker in modern financial history. No other investor--Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros--can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth

twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. *The Man Who Solved the Market* is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also a story of what Simons's revolution means for the rest of us.

## Returning to Earth

*The Challenge Built to Last*, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in

the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

## **Pondering Life**

Ten years after the worldwide bestseller *Good to Great*, Jim Collins returns with another groundbreaking work, this time to ask: why do some companies thrive in uncertainty, even chaos, and others do not? Based on nine years of research, buttressed by rigorous analysis and infused with engaging stories, Collins and his colleague Morten Hansen enumerate the principles for building a truly great enterprise in unpredictable, tumultuous and fast-moving times. This book is classic Collins: contrarian, data-driven and uplifting.

Colm Tóibín's New York Times bestselling novel—soon to be a film starring Saoirse Ronan and Jim Broadbent from the award-winning team that produced *An Education*—is “a moving, deeply satisfying read” (Entertainment Weekly) about a young Irish immigrant in Brooklyn in the early 1950s. “One of the most unforgettable characters in contemporary literature” (Pittsburgh Post-Gazette), Eilis Lacey has come of age in small-town Ireland in the hard years following World War Two. When an Irish priest from Brooklyn offers to sponsor Eilis in America, she decides she must go, leaving her fragile mother and her charismatic sister behind. Eilis finds work in a department store on Fulton Street, and when she least expects it, finds love. Tony, who loves the Dodgers and his big Italian family, slowly wins her over with patient charm. But just as Eilis begins to fall in love, devastating news from Ireland threatens the promise of her future. Author “Colm Tóibín...is his generation's most gifted writer of love's complicated, contradictory power” (Los Angeles Times). “Written with mesmerizing power and skill” (The Boston Globe), *Brooklyn* is a “triumph...One of those magically quiet novels that sneak up on readers and capture their imaginations” (USA TODAY).

The Wrestling Biography You've Been Waiting For! There are few people who have been in the wrestling business longer than Jim Ross. And those who have made it as long as he has (half a century to be exact) probably made enemies or burned bridges. But that's just not JR. Slobberknocker is the story of how an Oklahoman farm kid, with a vivid imagination and seemingly unattainable dreams, became "The Voice of Wrestling" to record TV audiences and millions of fans around the world. Jim opens up about his life as an only child on a working farm, who became obsessed with professional wrestling having first saw it on his grandparent's TV. Even though the wrestling business was notoriously secretive and wary of "outsiders," he somehow got a foot in the door to start a historic career, one where he held almost every job in the business?from putting up the ring to calling matches, from driving his blind, drunk boss towards revenge, to consoling two naked 600 pound brothers in the shower room after a rough match. With all those adventures and responsibilities, he's also recognized as the man who built and nurtured a once-in-a-generation talent roster that took the WWE to new heights, including "Stone Cold" Steve Austin, Brock Lesnar, and The Rock to name a few. Readers will finally get the opportunity to hear never-before-told stories about the politics, wackiness, and personalities of all the biggest stars. But this isn't just a wrestling story. It's a story about overcoming adversity and achieving your dreams, as success did not come without significant costs and unforeseen challenges to JR, including multiple bouts of severe facial paralysis called Bell's Palsy. Currently the host of the podcast The Ross Report, any fan of wrestling?from the territory days to today?will be enthralled with stories from the road and behind the scenes. Slobberknocker is the first time Ross tells his story?and you don't want to miss it!

## **Three Gates to Hell**

Back in 2014, the year of the original LieDeck Revolution, humanity couldn't cope with reality as laid bare by the infallible lie detector. To avoid total chaos, a coup transforms the UN into a military world government called the World Democratic Authority (WDA), and only WDA agents are allowed to use LieDecks, for policing purposes. In 2033, there emerges a widespread demand for the democratization of the military world government and public access to the LieDeck device. The opposition is led by "Evolution," a social movement that has involved hundreds of millions throughout the world in a new way of living-a new way of being, really. Their new "consciousness" is accomplished by never lying, which is in turn achieved by pretending that their spoken words are being openly checked by the banned LieDeck device. One WDA agent, Lilly Petrosian, is chosen by her superiors to live in and LieDeck-monitor an Evolutionary "clan" named Victor-E, and finds herself caught between these two worlds.

We are not who we think or profess we are--nor what the logo over our church door declares. We all need to go back to the simplicity of Genesis 1:1, "In the beginning God." He was, He is, and He's there for you! We need to get back to God being the One in charge of our lives, not just knowing about Him or being knowledgeable about His Word. We need to personally KNOW Him like the branch connected to the Vine, and be empowered to live above the pull of our flesh In Him. When we honestly and practically find this, then we'll have 'Power' to not only live what we profess, but to truly change the world! You are about to enter a forever life-changing experience! Dare to practically implement these eleven chapters, and I guarantee you will never be the same again! Not in your marriage, not in your family, or in your influence upon your church and the world about you! Lets' Get Started!

## **Escaping Back to God**

James Leininger was just two years old when he began having disturbing nightmares that would not stop. He screamed out in the night: 'Plane on fire! Little man can't get out!' While nightmares are common among children, what happened next shocked those around him James began to reveal details of planes and war tragedies that no two-year-old boy could know. His desperate parents were at a loss to help him until he said three things: 'Corsair', 'Natoma' and 'Jack Larsen'. From these tantalising clues, James's parents travelled thousands of miles and spent many long years piecing together these facts to try and find an answer that could end his torment. Finally, despite his mother's fears and his father's staunch Christian beliefs, they found only one possibility to the endless coincidences that surrounded every detail in James's life - that their son was reliving the past life of a World War II fighter pilot. Their touching story is one that will challenge sceptics and confirm the beliefs of those who already believe in life after death.

## **Being Dead**

\*Includes pictures \*Includes Bridger's quotes about his expeditions \*Includes online resources and a bibliography for further reading Exploration of the early American

West, beginning with Lewis and Clark's transcontinental trek at the behest of President Thomas Jefferson, was not accomplished by standing armies, the era's new steam train technology, or by way of land grabs. These came later, but not until pathways known only to a few of the land's indigenous people were discovered, carved out, and charted in an area stretching from the eastern Rocky Mountains to the Pacific Ocean, and the present-day borders of Mexico and Canada. Even the great survey parties, such as Colonel William Powell's exploration of the Colorado River, came decades later. The first views of Western America's enormity by white Americans were seen by individuals of an entirely different personality, in an era that could only exist apart from its home civilization. The American mountain man, with his practical skills, could endure isolation in a way most could not. He lived in constant peril from the extremes of nature and from the hostilities of cultures unlike his own. In an emergency, assistance was rarely available, and he rarely stayed in one place long enough to build even a simple shelter. Travel in the American West relied upon a specific calendar, and to ignore it could be fatal, as many discovered, to their misfortune. Winter in the mountainous regions of the Rocky Mountains and Cascades was lethally cold to explorer and settler alike, but desert areas and grass plains presented difficulties as well. The network of rivers flowing west of the Mississippi on both sides of the continental divide served as early highways to the Wyoming and Montana regions, the Oregon Territory, Utah and Colorado, and the California southwest. Some were placidly tranquil, while others raged through the extreme elevations, all but defying navigation. Contact with indigenous tribes was problematic enough with linguistic and cultural barriers, but to survive, there required a sensitivity to tribal food sources and sacred areas when traveling. Apart from such realities, the mountain man's poetically obsessive kinship with undiscovered lands and unspoiled nature, free from society's trappings, was secondary. The aesthetic aspect was a luxury to be enjoyed once work had been done and safety assured. Distant observers who heard or read of the journey were fascinated with the peripheral glamour, but not enamored of the work's grisly nature. A small group of individuals have come down to us as famous figures from the fur trapping era of the 19th century, but explorer and guide Jim Bridger is the most distinguished of the lot. This is because he remained in a dangerous and vast Western wilderness long after the fur trade's demise in addition to powers of observation enabling him to create accurate maps decades after passing through any terrain.

## **Return to Life**

Have you ever just wondered about life? What is Life? Is there God? How do we fit into the universe? What is our relationship with other living things? What does it mean to be human? Doctor Ergo provides you with a firm background and vantage point from which to view those questions. You will gain a comprehensive perspective on Life and the human condition - from the Big Bang, through Life history on this planet, to the current condition of our human mind and species, and some solid thoughts on what Life is. This is a Story of Life. In a Darwinian world, our mental capacity has enabled us to ascend to the pinnacle of the survival pyramid. Therefore, the essence of the story about our species centers on our mind. Our cognitive skills are built upon the neural architectures that originally developed for vision and for speech/hearing. We can be aware of the 2 sides of our mind through introspection of our own consciousness: Vision based - non-verbal emotions,

feelings and intuitions coming from our vision-based cognition in our Right Brain. Speech based - words, thoughts, and reasoning coming from our speech-based cognition in our Left Brain. Vision developed quickly in the Cambrian Period (570 million years ago) when the earliest animals with body forms emerged. Vision enabled the animal to see the "world," and gave the animal a sense of "self," i.e. that which was viewing the world. Consequently the concepts of "world" and "self" are deeply embedded in the cognition that developed from the vision neurological architecture. Likewise, Darwinian survival necessitated identification of same-species animals (for protection and reproduction); hence the concept of "group" is also deeply embedded in the vision-based neurology. Our speech-based left brain has no equal anywhere else in Life on this planet. This is what has made possible the major advances of the human mind, separated us from the animals, and enabled us to conquer the planet. This Sensory Mind model clarifies Plato's writings and the psychological models that were developed by Sigmund Freud and Carl Jung. The personality types tested by Myers-Briggs, which are based on the theories of Carl Jung, are consistent with the Sensory Mind. Major trends in human history have been about the growth of our collective left brain in the governance of human affairs and its interplay with our vision-based (non-verbal) right mind. Our human "advances" have largely resulted from development of our speech-based mind, but the essence and truth of life comes to us from our vision-based mind. Our earliest groupings and civilizations were largely governed by vision-based animal grouping models. These have evolved into newer civilizations and human groupings that include participation and/or leadership of our left brain "group-think." We are very familiar with the concept of Darwinian survival and its role in the evolution of Life. However, Darwinian survival is simply the strategy or tactic that governs the advancement of Life. What is it that drives Life to engage in the Darwinian struggle for survival? There IS a Life Drive that fuels evolution what is it? The Life Drive permeates all of life and is the force that drives Darwinian evolution. It is theorized that Life is a previously unidentified parameter in Einstein's Theory of Relativity and that it exists at the conditions opposite to the Big Bang conditions. Most religious and belief systems, whether god-based such as Judaism, Christianity, or Islam, or spiritually-based such as Buddhism or Taoism, are oriented towards the ultimate truth that is Life.

Would your routine office fire drill be able to handle the large-scale chaos of a major disaster? Can you get everyone out safely in the face of a factory fire, explosion, or natural disaster? In *Emergency Evacuation Planning for Your Workplace: From Chaos to Life-Saving Solutions*, Jim Burtles leads you step-by-step through a planning methodology that saves lives. You can be assured your company will be ready and that everyone will know what to do -- whatever the nature of the emergency. In one practical, easy-to-read resource, Burtles helps you create a comprehensive plan to evacuate people of all ages and health conditions from workplaces such as small offices, skyscrapers, stores, industrial plants,

hospitals, college campuses, and more. His carefully constructed methodology leads you through the development of organization-wide plans - ensuring that your procedures align with best practices, relevant regulations, sound governance, and corporate responsibility. His five stages of an Emergency Evacuation Planning (EEP) Lifecycle include: Set up the EEP program - Bring management on board, get executive buy-in and policy approval to proceed. Embed EEP into the corporate culture - Begin your awareness campaign immediately, getting the message out to the community you are serving. Understand the environment - Explore which areas of the organization have emergency plans and which need to be covered in your overall EEP/ Agree upon an EEP strategy - Work closely with people who know the premises to identify threats that could trigger an emergency, and visit and evaluate potential exit points. Develop evacuation procedures - Look at the people, their probable locations, their existing challenges. Determine if you will need one plan or a suite of plans. Exercise and maintain the EEP- Run regular exercises to familiarize everyone with plans and choices - as often as needed to accommodate changing personnel and individual needs. Because this a long-term process, go back to the earlier parts of the cycle and review the plan to keep it current. Thought-provoking discussion questions, real-life case studies and examples, comprehensive index, and detailed glossary facilitate both college and professional instruction. Downloadable resources and tools - practical toolkit full of innovative and field-tested plans, forms, checklists, tips, and tools to support you as you set up effective workplace evacuation procedures. ## **Working Class Hero**

A haunting new novel about love, death, and the afterlife, from the author of Quarantine Baritone Bay, mid-afternoon. A couple, naked, married almost thirty years, are lying murdered in the dunes. "Their bodies had expired, but anyone could tell--just look at them--that Joseph and Celice were still devoted. For while his hand was touching her, curved round her shin, the couple seemed to have achieved that peace the world denies, a period of grace, defying even murder. Anyone who found them there, so wickedly disfigured, would nevertheless be bound to see that something of their love had survived the death of cells. The corpses were surrendered to the weather and the earth, but they were still a man and wife, quietly resting; flesh on flesh; dead, but not departed yet."
