Strange Bedfellows

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

Make sure your K9 investigation work holds up in court. Based on Resi and Ruud's previous book, *K9 Fraud*, with updated content and a new chapter. Learn how to: Avoid the most common mistakes handlers make. Become a better trainer and handler with a scientific understanding of scent and tracking work. Train your dog for scent-identification lineups using the scientifically proven Dutch standard. Faulty K9 investigations often have serious consequences: the guilty might walk free, and the innocent might suffer. Internationally recognized dog handlers and trainers Dr. Resi Gerritsen and Ruud Haak use real-life case studies—historical and recent—to highlight K9 errors that can derail entire investigations. Each of these mistakes, such as influencing your dog's results or

relying on contaminated scents, damages your reputation and the value of your work. But with the right knowledge and training protocols, you can minimize investigation errors. K9 errors have hampered investigations from the earliest uses of dogs for police work in Europe to twenty-first century cases such as the 2001 anthrax attacks in the United States. Don't let the same mistakes happen to you and your team. Get a free ebook through the Shelfie app with the purchase of a print copy.

A well-trained tracking dog can be the deciding factor in both criminal investigations and search-and-rescue operations. When the stakes are high and you demand only top performance from your K9, you need training methods relied upon by police forces and search-and-rescue teams around the world. Dr. Resi Gerritsen and Ruud Haak show you how to train your dog in clean-scent tracking, a proven method that trains dogs to follow a particular scent on a track while ignoring crosstracks and other odors. In *K9 Professional Tracking*, you'll learn how to start a successful clean-scent tracking program from the ground up: how to pick the right dog, what equipment you need, how to lay a track, and which exercises work. Resi and Ruud also break down the science of scent and the dog's nose, critical information that allows you to fully understand what your K9 is and is not capable of in the field. With the right knowledge

Initially dominated by simple renditions of East Coast architecture, Milwaukee developed from three pioneer settlements, those of Solomon Juneau, Byron Kilbourn, and George Walker—three hubs from which three villages radiated outward into one city. Following the Civil War, Milwaukee’s growth at the onset of the Industrial Era afforded the city a fanciful array of Victorian streetscapes. The 1890s followed with an era of ethnic architecture in which bold interpretations of German Renaissance Revival and Baroque designs paid homage to Milwaukee’s overwhelming German population. At the turn of the century, Milwaukee’s proximity to Chicago influenced the streetscape with classicized civic structures and skyscrapers designed by Chicago architects. World War I and the ensuing anti-German sentiment, as well as Prohibition, inevitably had adverse effects on “Brew City.” By the 1920s, Milwaukee’s architecture had assimilated to the national aesthetic, suburban development was on the rise, and architectural growth would soon be stunted by the Great Depression.

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance,

Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. A Slice of the Pie will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.
