Moon San Juan Islands

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon,

Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual

Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff’s clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You’ll Never Eat Lunch in this Town Again* of the music industry.

The Owner-Builder Book: Construction Bargain Strategies

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

American Gas Engineering Journal

The House-owner's Book

Vol. for 1889 includes a section on South African mining companies.

The British National Bibliography

A comprehensive guide to the history and development of the Malinois breed. Learn: Specific problems Malinois handlers and trainers may encounter. How the breed developed to become the top choice for police work. Other roles for which the Malinois is perfectly adapted, including tracking, search and rescue, oil and gas detection, and more. The Malinois is one of the most effective working dog breeds in the world, prized for their intelligence and high energy level. This breed, which for centuries served as the ultimate sheepdog, has become increasingly popular among police departments and militaries that recognize its unique suitability for detection and police work. Beginning with a brief history of Belgian shepherd dogs, Resi Gerritsen and Ruud Haak next explore the emergence of the Malinois as a distinct breed over a century ago and examine the history of the Malinois in police work. They also provide practical tips and information for those who are raising and training a Malinois themselves.

Popular Science

Create a safe, successful K9 training program that results in reliable protection dogs. Learn how to: Select the optimal breeds, temperament and physical and mental characteristics for protection work. Master the obedience-training techniques that form the foundation of protection training. Use the methods of the Dutch Police Dog (KNPV) program, which produces some of the finest police and protection dogs in the world. Dr. Resi Gerritsen and Ruud Haak, leading dog trainers from the Netherlands, share their proven, comprehensive program for training dogs for personal protection. Their cutting-edge techniques and work with the International Red Cross, the United Nations and the International Rescue Dog Organization (IRO) have placed them in world demand. In this fully revised and updated edition of K9 Personal Protection, Resi and Ruud start with the basics, including how to select the right dog for protection work, how to properly raise a protection dog from a puppy and how to correct a dog's bad behavior. Next, they cover fundamental obedience training for protection dogs, such as training for heelwork, the recall, the send away and more. Finally, they present a complete program for training reliable protection dogs, from basic exercises and decoy techniques to the exercises of the KNPV program. National Military Manuals on the Law of Armed Conflict

'While there already exists a crowded body of publications addressing the effect of an aging population on the economy, this monograph is most outstanding in

presenting a global, in-depth analysis of the implications thereby generated for 23 developed and developing countries. . . Scholars, researchers, and practitioners everywhere will benefit immensely from this comprehensive work.' – H.I. Liebling, Choice 'Ron Lee and Andrew Mason's Population Aging and the Generational Economy is a demographic and economic tour-de-force. Their collaborative, intercontinental. . . study of aging, consumption, labor supply, saving, and private and public transfers is the place to go to understand global aging and its myriad and significant economic challenges and opportunities.' – Laurence Kotlikoff, Boston University, US 'The culmination of. . . work by Lee, Mason, and their collaborators from around the world to extend Samuelson's framework to accommodate realistic demography, empirical measurement of age-specific earnings, consumption, tax payments, and benefit receipts, the studies. . . demonstrate the power of this integrated economic-demographic framework to advance our understanding of critical public policy challenges faced by countries at different stages of demographic transition and population aging.' – Robert Willis, University of Michigan, US 'Lee and Mason have done scholars and practitioners a magnificent service by undertaking this comprehensive, compelling, and supremely innovative examination of the economic consequences of changes in population age structure. The book is a bona fide crystal ball. It will be a MUST READ for the next decade!' – David Bloom, Harvard School of Public Health, US 'Population Aging and the Generational Economy provides an encompassing account of what we know about population aging and the impact that this process

will have on our economies. It does not confine itself to the advanced industrial countries, where aging has already been largely studied, but adopts a truly global perspective. I am sure it will become a key reference for researchers, students and those involved in policy-making in areas that are affected by population aging.' - Giuliano Bonoli, Swiss Graduate School of Public Administration (IDHEAP), Switzerland

Over coming decades, changes in population age structure will have profound implications for the macroeconomy, influencing economic growth, generational equity, human capital, saving and investment, and the sustainability of public and private transfer systems. How the future unfolds will depend on key actors in the generational economy: governments, families, financial institutions, and others. This path-breaking book provides a comprehensive analysis of the macroeconomic effects of changes in population age structure across the globe. The result of a substantial seven-year research project involving over 50 economists and demographers from Africa, Asia, Europe, Latin America, and the United States, the book draws on a new and comprehensive conceptual framework - National Transfer Accounts - to quantify the economic lifecycle and economic flows across generations. It presents comprehensive estimates of both public and private economic flows between generations, and emphasizes the global nature of changes in population age structure that are affecting rich and poor countries alike. This unique and informative book will prove an invaluable reference tool for a wide-ranging audience encompassing students, researchers, and academics in fields such as demography, aging, public finance, economic development,

macroeconomics, gerontology, and national income accounting; for policy-makers and advisers focusing on areas of the public sector such as education, health, pensions, other social security programs, tax policy, and public debt; and for policy analysts at international agencies such as the World Bank, the IMF, and the UN.

Ag 601 - 1998

Published in 1994 to worldwide acclaim, the first edition of Jancis Robinson's seminal volume immediately attained legendary status, winning every major wine book award including the Glenfiddich and Julia Child/IACP awards, as well as writer and woman of the year accolades for its editor on both sides of the Atlantic. Combining meticulously-researched fact with refreshing opinion and wit, The Oxford Companion to Wine presents almost 4,000 entries on every wine-related topic imaginable, from regions and grape varieties to the owners, connoisseurs, growers, and tasters in wine through the ages; from viticulture and oenology to the history of wine, from its origins to the present day. The 187 esteemed contributors (including over 50 new to this edition) range from internationally renowned academics to some of the most famous wine writers and wine specialists in the

world. Now exhaustively updated, this fourth edition incorporates the very latest international research to present over 350 new entries on topics ranging from additives and wine apps to WSET and Zelen. Over 60 per cent of all entries have been revised; and useful lists and statistics are appended, including a unique list of the world's controlled appellations and their permitted grape varieties, as well as vineyard area, wine production and consumption by country. Illustrated with almost 30 updated maps of every important wine region in the world, many useful charts and diagrams, and 16 stunning colour photographs, this Companion is unlike any other wine book, offering an understanding of wine in all of its wider contexts--notably historical, cultural, and scientific--and serving as a truly companionable point of reference into which any wine-lover can dip and browse. New to this edition

Comprehensively revised and updated throughout Over 350 brand-new entries Significant new updates on hundreds of topics such as China, screwcaps, and the origins of viniculture Impressive global coverage of wine regions, including new entries on Alaska, Lesotho, Norway, and Tahiti Includes brand-new colour photographs and black and white line drawings Maps of wine regions have been updated

The Mining Manual

A well-trained tracking dog can be the deciding factor in both criminal investigations and search-and-rescue operations. When the stakes are high and you demand only top performance from your K9, you need training methods relied upon by police forces and search-and-rescue teams around the world. Dr. Resi Gerritsen and Ruud Haak show you how to train your dog in clean-scent tracking, a proven method that trains dogs to follow a particular scent on a track while ignoring crosstracks and other odors. In *K9 Professional Tracking*, you'll learn how to start a successful clean-scent tracking program from the ground up: how to pick the right dog, what equipment you need, how to lay a track, and which exercises work. Resi and Ruud also break down the science of scent and the dog's nose, critical information that allows you to fully understand what your K9 is and is not capable of in the field. With the right knowledge and techniques, you'll be able to train tracking dogs to the highest professional standards.
