Keeping Fit all the Way

This path-breaking book reveals how Hollywood became "Hollywood" and what that meant for the politics of America and American film. *Working-Class Hollywood* tells the story of filmmaking in the first three decades of the twentieth century, a time when going to the movies could transform lives and when the cinema was a battleground for control of American consciousness. Steven Ross documents the rise of a working-class film movement that challenged the dominant political ideas of the day. Between 1907 and 1930, worker filmmakers repeatedly clashed with censors, movie industry leaders, and federal agencies over the kinds of images and subjects audiences would be allowed to see. The outcome of these battles was critical to our own times, for the victors got to shape the meaning of class in twentieth-century America. Surveying several hundred movies made by or about working men and women, Ross shows how filmmakers were far more concerned with class conflict during the silent era than at any subsequent time. Directors like Charlie Chaplin, D. W. Griffith, and William de Mille made movies that defended working people and chastised their enemies. Worker filmmakers went a step further and produced movies from *A Martyr to His Cause* (1911) to *The Gastonia Textile Strike* (1929) that depicted a unified working class using strikes, unions, and socialism to transform a nation. J. Edgar Hoover considered these class-conscious productions so dangerous that he assigned secret agents to spy on worker filmmakers. Liberal and radical films declined in the 1920s as an emerging Hollywood studio system, pressured by censors and Wall Street investors, pushed American film in increasingly conservative directions. Appealing to people's dreams of luxury and upward mobility, studios produced lavish fantasy films that shifted popular attention away from the problems of the workplace and toward the pleasures of the new consumer society. While worker filmmakers were trying to heighten class consciousness, Hollywood producers were suggesting that class no longer mattered. *Working-Class Hollywood* shows how silent films helped shape the modern belief that we are a classless nation.

Ontology and the Ambitions of Metaphysics

"The American Dream is the fundamental story of this country, and my life is a grateful reflection of its reality." When Rosario was fourteen years old she moved from Mexico to California with no grasp of the English language and few resources. She has since become a trailblazer in every sense: from becoming the first in her family to graduate from college to having her signature appear on the U.S. dollar bill as the treasurer of the United States, and the first Latina in California to run for the U.S. Senate. *Leading Between Two Worlds* is the story of this incredible journey. Rosario exposes her most personal secrets and impressive achievements as she divulges what she has sacrificed and what she has gained in politics. She takes us through a deeply felt betrayal, her struggle through depression, the creation of her family, her devotion to advocating for the rights of people with disabilities, and her joyous return to Mexico. Rosario's story is the story of every immigrant who -- in the face of unbelievable adversity -- seeks to make it in the United States. Her journey is one of tragedy and triumph, one from which readers will draw inspiration.

Introduction to Differential Equations with Boundary Value Problems

No one would deny the proposition that in order to understand human behavior and development, one must understand "feelings." The interest in emotions is enduring. Yet, within the discipline of psychology, the study of feelings and emotions has been somewhat less than respectable, a stepchild to the fields of cognitive science and psycholinguistics. Perusal of the language acquisition literature reveals a greater concern among psychologists for the acquisition of prepositions than for terms that convey feelings. Without question, issues related to emotion, its development, and its measurement have been neglected in the research literature until quite recently. From a developmental perspective, Piaget and his followers have articulated a complex theory of transition and change in intellectual behavior. Nearly a century ago, Freud proposed an elaborate theory of personality development in which some aspects of emotional growth were considered. We await the construction of a comprehensive theory of emotional development. Recognizing such a need, we set out over a decade ago to solve what seemed to be a relatively simple problem: By observing young children, could one successfully classify children in terms of individual differences on emotional dimensions such as happiness, fear, and anger? The task appeared easy. One could send graduate students into a preschool and ask them to observe children for several days, after which they would rank the children in terms of differences on various emotional dimensions.

Many significant problems in metaphysics are tied to ontological questions, but ontology and its relation to larger questions in metaphysics give rise to a series of puzzles that suggest that we don't fully understand what ontology is supposed to do, nor what ambitions metaphysics can have for finding out about what reality is like. Thomas Hofweber aims to solve these puzzles about ontology and consequently to make progress on four central metaphysical problems: the philosophy of arithmetic, the metaphysics of ordinary objects, the problem of universals, and the question of whether the reality is independent of us. Crucial parts of the proposed solution involve considerations about quantification and its relationship to ontology, the place of reference in natural languages, the possibility of ineffable facts, the extent of empirical evidence in metaphysics, and whether metaphysics can be properly esoteric. Overall, Hofweber defends a rationalist account of arithmetic, an empiricist picture in the philosophy of ordinary objects, a restricted form of nominalism, and realism about reality, understood as all there is, but idealism about reality, understood as all that is the case. He defends metaphysics as having some questions of fact that are distinctly its own, with a limited form of autonomy from other parts of inquiry, but rejects several metaphysical projects and approaches as being based on a mistake.

How are we to understand the complex forces that shape human behavior? A variety of diverse perspectives, drawing upon studies of human behavioral ontogeny, as well as humanity's evolutionary heritage seem to provide the best likelihood of success. It is in the attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the Genesis of Behavior. In many respects, the incredible burgeoning of research in child development the last or like a lines over decade two seems thousand of inquiry spreading outward in an incoherent starburst of effort. The need exists to provide, on an ongoing basis, an arena of discourse within which the threads of continuity between those diverse lines of research on human development can be woven into a fabric of meaning and understanding. Scientists, scholars, and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach. Each requires the opportunity to see-to the degree that our knowledge in given areas permits-various aspects of development in a coherent, integrated fashion. It is hoped that this series-by bringing together research on infant biology; developing infant capacities; animal models, the impact of social, cultural, and familial forces on development, and the distorted products of such forces under certain circumstances-will serve these important social and scientific needs.

Academic Paper from the year 2017 in the subject Cultural Studies - Miscellaneous, language: English, abstract: Over the last 50 years, Zambia has never experienced xenophobia or any form of social instability, a record of which made the country become known as a beacon of peace worldwide. However, one of the most horrific incidents took place in 2016, when two foreigners were burnt alive in the capital Lusaka by a mob of local residents angered by a presence of foreigners. This hostility towards foreigners spread across some parts of the country and resulted in a destruction of shops and businesses owned by foreigners. A series of these events came to be known as xenophobia. The incidences of xenophobia were widely covered by the media and had a huge impact on culture integration and the country's image. Zambia's experience of xenophobia affected peace and remains a threat to cultural integration despite the country remaining home to refugees, asylum seekers and immigrants coming from Rwanda, Zimbabwe, Somalia and the Democratic Republic of Congo. This study aims at assessing xenophobia, its predicates, causes and effects. Thus, the paper examines and critically analyses xenophobia and its impact on cultural integration in Zambia's case.

1001 Dream Cars You Must Drive Before You Die

The life of Patricia Highsmith was as secretive and unusual as that of many of the best-known characters who people her "peerlessly disturbing" thrillers and short

stories. Yet even as her work has found new popularity in the last few years, the life of this famously elusive writer has remained a mystery. For *Beautiful Shadow*, the first biography of Highsmith, British journalist Andrew Wilson mined the vast archive of diaries, notebooks, and letters she left behind, astonishing in their candor and detail. He interviewed her closest friends and colleagues as well as some of her many lovers. But Wilson also traces Highsmith's literary roots in the work of Poe, noir, and existentialism, locating the influences that helped distinguish Highsmith's writing so startlingly from more ordinary thrillers. The result is both a serious critical biography and one that reveals much about a brilliant and contradictory woman, one who despite her acclaim and affairs always maintained her solitude.
