Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

This volume is the offspring of a week-long workshop on "Galois groups over  $Q$  and related topics," which was held at the Mathematical Sciences Research Institute during the week March 23-27, 1987. The organizing committee consisted of Kenneth Ribet (chairman), Yasutaka Ihara, and Jean-Pierre Serre. The conference focused on three principal themes: 1. Extensions of  $Q$  with finite simple Galois groups. 2. Galois actions on fundamental groups, nilpotent extensions of  $Q$  arising from Fermat curves, and the interplay between Gauss sums and cyclotomic units. 3. Representations of  $\text{Gal}(Q/Q)$  with values in  $\text{GL}(2, j)$  deformations and connections with modular forms. Here is a summary of the conference program: • G. Hyundai and Kia Motors: The Early Years and Product Development by Donald G Southerton provides deep insights into the rise of the Korean car industry. From the 1960s to early 2000s, political and economic forces impacted the growth and development of the South Korean carmakers, including Hyundai and Kia Motors. In addition, the brands at times partnered for technology with Ford, Mazda, and Mitsubishi, along with world class designers like Giorgetto Giugiaro. Expanding rapidly the Korean brands soon looked to new international markets, including the U.S. Despite the failure of Kia Motors to survive the IMF Crisis, the merger with Hyundai led to integrated technology research, development, and manufacturing-- not to mention the economies of scale needed for the Korean automaker to compete globally with industry heavyweights such as Toyota, Ford, GM, and VW. Car models discussed including the Kia's Brisa, Pride, Sephia, Sportage, and Rio along with Hyundai's Pony, Excel and Santa Fe.

Hormones and Atherosclerosis covers the proceedings of the conference held in Brighton, Utah on March 11-14, 1958. The book focuses on the role of hormones in atherosclerosis, as well as cholesterol metabolism and biosynthesis, lipogenesis, and lipid transport. The selection first discusses the biosynthesis of cholesterol and aspects of the biosynthesis of cholesterol from mevalonic acid. Discussions focus on components of liver homogenates and coenzymes required for squalene and sterol synthesis from mevalonic acid and preservation of enzymes and microsomes. The text also ponders on the formation and metabolism of bile acids under different conditions and thyroid function, thyroxine analogs, and cholesterol metabolism in rats and rabbits. The book elaborates on the comparison of the participations of fibroblasts and reticuloendothelial cells in the synthesis and metabolism of cortisol and cholesterol and control of aortal lipid metabolism and lipid movement by hormones and vitamins. The manuscript also examines the influence of estrogens on lipids and atherosclerosis in experimental animals and the effect of adrenals, pituitary, liver, and mucopolysaccharides on blood lipids. The selection is a dependable reference for readers interested in the relationship of hormones and atherosclerosis.
