The concept of Crime Prevention Through Environmental Design (CPTED) has undergone dramatic changes over the last several decades since C. Ray Jeffery coined the term in the early 1970s, and Tim Crowe wrote the first CPTED applications book. The second edition of 21st Century Security and CPTED includes the latest theory, knowledge, and practice of CPTED as it relates to the current security threats facing the modern world: theft, violent crime, terrorism, gang activity, and school and workplace violence. This significantly expanded edition includes the latest coverage of proper lighting, building design—both the interior and exterior—physical security barriers, the usage of fencing, bollards, natural surveillance, landscaping, and landscape design. Such design concepts and security elements can be applied to address a wide variety of threats including crime prevention, blast mitigation, and CBRNE threat protection. Authored by one of the U.S.'s renowned security experts—and a premiere architect and criminologist—the book is the most comprehensive examination of CPTED and CPTED principles available. This edition includes a complete update of all chapters in addition to five new chapters, over 700 figure illustrations and photos, numerous tables and checklists, and a 20-page color plate section. This latest edition: Features five new chapters including green and sustainable buildings, infrastructure protection, and premises liability Presents step-by-step guidelines and real-world applications of CPTED concepts, principles and processes—from risk assessment to construction and post-occupancy evaluation Outlines national building security codes and standards Examines architectural surety from the perspective of risk analysis and premises liability Demonstrates CPTED implementation in high-security environments, such as hospitals, parks, ATMs, schools, and public and private sector buildings A practical resource for architects, urban planners and designers, security managers, law enforcement, CPTED practitioners, building and property managers, homeland security professionals, and students, 21st Century Security and CPTED, Second Edition continues to serve as the most complete and up-to-date reference available on next-generation CPTED practices today.

With a Preface by noted satellite scientist Dr. Ahmad Ghais, theSecond Edition reflects the expanded user base for this technologyby updating information on historic, current, and plannedcommercial and military satellite systems and by expanding sectionsthat explain the technology for non-technical professionals. The book begins with an introduction to satellite communicationsand goes on to provide an overview of the technologies involved inmobile satellite communications, providing basic introductions toRF Issues, power Issues, link issues and system issues. Itdescribes early commercial mobile satellite communications systems,such as Marisat and Marecs and their military counterparts. The book then discusses the full range of Inmarsat and othercurrent and planned geostationary, low earth orbiting and hybridmobile satellite systems from over a dozen countries andcompanies. It is an essential guide for anyone seeking acomprehensive understanding of this industry and militarytool. • Revised edition will serve both technical andnon-technical professionals who rely every day on mobile satellitecommunications • Describes and explains historic, current, and plannedcivil, commercial, and military mobile satellite communicationsystems. • First Edition charts and tables updated and expandedwith current material for today's mobile satellite technology

This handbook provides ready access to all of the major concepts, techniques, problems, and solutions in the emerging field of pseudorandom pattern testing. Until now, the literature in this area has been widely scattered, and published work, written by professionals in several disciplines, has treated notation and mathematics in ways that vary from source to source. This book opens with a clear description of the shortcomings of conventional testing as applied to complex digital circuits, revewing by comparison the principles of design for testability of more advanced digital technology. Offers in-depth discussions of test sequence generation and response data compression, including pseudorandom sequence generators; the mathematics of shift-register sequences and their potential for built-in testing. Also details random and memory testing and the problems of assessing the efficiency of such tests, and the limitations and practical concerns of built-in testing.

For the first time a book has been written on the technological and scientific knowledge, acquired during, buiding , operation and even dismantling of the Superphenix plant. This reactor remains today the most powerful sodium fast breeder reactor operated in the world.(1200 MWe). The last fast breeder reactor operated in the world is BN 800 in Russia that reached his nominal power (800 MWe) in 2016. Joel Guidez began his career in the field of sodium-cooled fast reactors after leaving Ecole Centrale-Paris, in 1973. He has held various positions

at Cadarache, Phenix and Superphenix, including as the head of the thermal hydraulic laboratory conducting tests for Phenix, Superphenix and the EFR European Fast Reactor project. He was also head of the OSIRIS research reactor, located at SACLAY, and of the HFR European Commission reactor, located in the Netherlands and spent two years as nuclear attaché at the French embassy in Berlin. His 2012 book "Phenix: the experience feedback" was translated into English and republished in 2013, and this new book on Superphenix is in the same spirit of thematic analysis of a reactor experience feedback. Gérard Prêle graduated from the Ecole Centrale-Lyon and entered EDF and the field of sodium-cooled fast reactors in 1983. In 1985 he joined Superphenix, where he was a duty engineer and was later in charge of safety. He has held various positions at Superphenix and Phenix and was a fast neutron reactor (SFR) engineer at the EDF Centre Lyonnais d'Ingénierie (CLI). He worked as Safety Security Environment and Radiation Protection Mission head in Superphenix at the beginning of dismantling and then in the field of PWR for two years. Since 2006 he has been involved in the Gen IV and the SFR/Astrid projects. Today, as an SFR/system and operations expert, one of his major roles is assisting the CEA in the preliminary design of the ASTRID reactor.

The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global,

regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

The goal of this publication is to provide the latest information on ageing, obsolescence and performance monitoring of those items of I & C equipment that are classified as safety equipment and/or safety related equipment, are operated in harsh environments in NPPs, and are important in plant life extension not only for normal operation but also, and more importantly, for post-accident service. In achieving this goal, this publication identifies the key I & C components of interest that are expected to function well throughout the life of a plant including the extended life.

This volume focuses on new trends in monitoring biodiversity in the Asia-Pacific region, one of the most rapidly changing areas in the world. It provides reviews of the challenges in studying the spatial variability of biodiversity across various ecosystems. This book also describes newly developed concepts and methods for biodiversity observation including ubiquitous genotyping, systematic conservation, monitoring of the functions and services of ecosystems and biodiversity informatics. These contributions will lead to establishing integrative observations and assessments of biodiversity, essential for reporting the current status and for the effective conservation and sustainable use of biodiversity. This work will interest biodiversity researchers not only in the Asia-Pacific region but also across the entire globe.

Introduction to Private Equity, Debt and Real Assets

Fully revised and updated to reflect changes in the private equity sector Building on and refining the content of previous editions, Introduction to Private Equity, Debt and Real Assets, Third Edition adopts the same logical, systematic, factual and long-term perspective on private markets (private equity, private debt and private real assets) combining academic rigour with extensive practical

experience. The content has been fully revised to reflect developments and innovations in private markets, exploring new strategies, changes in structuring and the drive of new regulations. New sections have been added, covering fund raising and fund analysis, portfolio construction and risk measurement, as well as liquidity and start-up analysis. In addition, private debt and private real assets are given greater focus, with two new chapters analysing the current state of these evolving sectors. • Reflects the dramatic changes that have affected the private market industry, which is evolving rapidly, internationalizing and maturing fast • Provides a clear, synthetic and critical perspective of the industry from a professional who has worked at many levels within the industry • Approaches the private markets sector top-down, to provide a sense of its evolution and how the current situation has been built • Details the interrelations between investors, funds, fund managers and entrepreneurs This book provides a balanced perspective on the corporate governance challenges affecting the industry and draws perspectives on the evolution of the sector.

National Fire Alarm Code Handbook

This book highlights research-based case studies in order to analyze the wealth created in the world's largest mergers and acquisitions (M&A). This book encourages cross fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger's success. The book should be useful for finance professionals, corporate planners, strategists, and managers.

System-Level Synthesis deals with the concurrent design of electronic applications, including both hardware and software. The issue has become the bottleneck in the design of electronic systems, including both hardware and software, in several major industrial fields, including telecommunications, automotive and aerospace engineering. The major difficulty with the subject is that it demands contributions from several research fields, including system specification, system architecture,

hardware design, and software design. Most existing book cover well only a few aspects of system-level synthesis. The present volume presents a comprehensive discussion of all the aspects of system-level synthesis. Each topic is covered by a contribution written by an international authority on the subject.

40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

Blueprint for Action

An insightful view on how to use the power of complexity theory to manage projects more successfully Current management practices require adherence to rigid, global responses unsuitable for addressing the changing needs of most projects. Complexity Theory and Project Management shifts this paradigm to create opportunities for expanding the decision-making process in ways that promote flexibility—and increase effectiveness. It informs readers on the managerial challenges of juggling project requirements, and offers them a clear roadmap on how to revise perspectives and reassess priorities to excel despite having an unpredictable workflow. One of the first books covering the subject of complexity theory for project management, this useful guide: Explains the relationship of complexity theory to virtual project management Supplies techniques, tips, and suggestions for building effective and successful teams in the virtual environment Presents current information about best practices and relevant proactive tools Makes a strong case for including complexity theory in PMI®'s PMBOK® Guide Complexity Theory and Project Management gives a firsthand view on the future of complexity theory as a driving force in the management field, and allows project managers to get a head start in applying its principles immediately to produce more favorable outcomes. This volume features papers written in honor of Mauro Bussani, and celebrates the work and contributions of this renowned scholar of comparative law. The content reflects the various theoretical and practical areas in which he has already left a lasting mark. The essays explore the theory and practice of comparative law in different areas and contexts, and highlight innovative approaches to a large variety of hot-topic private and public law subjects. The authors include young scholars, lawyers, legal consultants, human rights activists, and practitioners, all of whom Professor Bussani has trained, supervised, and supported throughout their careers. The contributions emphasize the many ways in which Professor Bussani's teaching and scientific output have enriched, revolutionized, and challenged both theory and practice. They cover e.g. the law of secured transactions, Western law and legal pluralism, fashion law, contract law in China and in the Arab World, contract and tort in the West, scientific evidence, risk regulation, global finance, human rights indicators, anti-discrimination laws, democracy and climate change law.

Blueprint for Action provides a framework for understanding the dynamics of organizational change in early care and education settings. It helps administrators move beyond a "quick fix" notion of center improvement by serving as a guide for organizational analysis and action. The book details a comprehensive method for assessing program strengths and areas in need of improvement. The heart of this approach is an individualized model of supervision and staff development. Woven throughout the text are numerous vignettes connecting the concepts to real-life situations experienced by early childhood administrators. The book includes 26 assessment tools and 12 worksheets that directors can adapt for use in their own programs.

This book is devoted to the dynamic development of retailing. The focus is on various strategy concepts adopted by retailing companies and their implementation in practice. This is not a traditional textbook or collection of case studies; it aims to demonstrate the complex and manifold questions of retail management in the form of twenty lessons, where each lesson provides a thematic overview of key issues and illustrates them via a comprehensive case study. The examples are all internationally known retail companies, to facilitate an understanding of what is involved in strategic retail management and illustrate best practices. In the third edition, all chapters were revised and updated. Two new chapters were added to treat topics like corporate social responsibility as well as marketing communication. All case studies were replaced by new ones to reflect the most recent developments. Well-known retail companies from different countries, like Tesco, Zalando, Hugo Boss, Carrefour, Amazon, Otto Group, are now used to illustrate particular aspects of retail management.
