Intervention in Human Services

Principals navigate the dynamic complexities and subtleties of their schools every day. They promote, facilitate, and lead efforts to achieve both tangible and intangible results throughout the school community. They fulfill a role that includes counseling, budgeting, inspiring, teaching, learning, disciplining, evaluating, celebrating, consoling, and a million other critical functions. As the principalship has evolved and grown, so have the expectations of it. With that in mind, ASCD developed the Principal Leadership Development Framework (PLDF). The PLDF establishes a clear and concise definition of leadership and includes clear targets that support the ongoing growth and development of leaders. Using the Framework, principals will learn to capitalize on their leadership roles: * Principal as Visionary * Principal as Instructional Leader * Principal as Engager * Principal as Learner and Collaborator The PLDF also offers 17 criteria of effective practice that allow leaders to focus on behaviors that have the greatest direct effect on the culture and status of learning and teaching. Coupled with the PLDF are tools for self-reflection that help principals identify and strengthen their reflective habits. Whether you want to develop your own capacities or support the development of a group of principals, assistant principals, or aspiring principals, The Principal Influence can help channel your efforts in ways that promote successful teaching and student learning.

Guide to Four-Year Colleges 1988

This text identifies and describes more than 1860 of the leading corporate foundation donors.

Study Guide

Provides the foundation for casework practice in Child Protective Services (CPS). Describes the basic stages of the CPS process and the steps necessary to accomplish successfully each stage: intake, initial assessment/investigation, family assessment, case planning, service provision, and evaluation of family progress and case closure. Designed primarily for CPS caseworkers, supervisors, and administrators. Glossary. Bibliography.

Peterson's Guide to Graduate Programs in the Physical Sciences and Mathematics 1991

If we are to build an inclusive institutional culture within the increasingly pluralist societies of 21st century Europe, focusing solely on the development of skills and knowledge is not enough. There have to be changes in the way in which administrative authorities and the organisations providing services to the public view their role and in the action they take. While it is essential for migrants to learn the language of their host country, understanding the codes of conduct, standards, allegiances, rules and exceptions is perhaps an even greater challenge. This clearer understanding of the institutional fabric is an inevitable part of what is termed "integration" and also applies to minorities. Since this process does not occur unassisted, this guide puts forward a number of proposals to help acquire the institutional skills which are vital for understanding, dialogue, guidance, negotiation and conflict resolution, to name but a few. These are all aspects inherent in interaction processes and essential for respecting diversity. This guide is an indispensable tool for public and private operators, social workers, mediators and all other stakeholders aware of the need to incorporate these aspects into their exchanges, particularly when rights and human dignity are at stake. This will help nurture confidence in public institutions and avoid the development of fear or any other barrier which could lead to unequal access - or indeed no access - to social, health-care or other services. Through this work, the Council of Europe reminds us that in pluralist societies the most effective guarantee of successful integration and harmonious co-existence is social justice.

Peterson's Guide to Graduate Programs in Business, Education, Health, Information Studies, Law and Social Work 1997

Peterson's Guide to Graduate Programs in the Biological and Agricultural Sciences 1991

Lovejoy's College Guide 1998

The job market continues to change. Highly skilled and specialized workers are in demand. Traditional education cannot meet all the needs to create specialty skill workers. Certification provides up-to-date training and development while promoting individual or professional skills and knowledge in a focused manner. Certification as a way of continuing professional education can also be more cost effective.
