Exploring the arts in therapy, this book investigates the concept that creativity is an essential element of psychotherapy. A process of “tending the fire” of the arts in therapy allows play and experimentation to enter the therapeutic space and enlighten the experience for both client and therapist. Through the author's own personal art-making journal, an outlining of the aspects of the theory of creativity in the therapeutic process, and the author's practical application of expressive arts therapy in various clinical settings, this text demonstrates how forms of sensory and artistic expression can help clients arrive at surprising new possibilities in therapy and life.

Over vast expanses of time, fire and humanity have interacted to expand the domain of each, transforming the earth and what it means to be human. In this concise yet wide-ranging book, Stephen J. Pyne—named by Science magazine as “the world’s leading authority on the history of fire”—explores the surprising dynamics of fire before humans, fire and human origins, aboriginal economies of hunting and foraging, agricultural and pastoral uses of fire, fire ceremonies, fire as an idea and a technology, and industrial fire. In this revised and expanded edition, Pyne looks to the future of fire as a constant, defining presence on Earth. A new chapter explores the importance of fire in the twenty-first century, with special attention to its role in the Anthropocene, or what he posits might equally be called the Pyrocene.

"We are created in rhythm, kept alive in rhythm, evolve through rhythm. Tides, breath, and blood flow in rhythm. We are born into a universe of currents, and our heart is the great conductor of the body, orchestrating our flow." The mystical foundations of all the world's spiritual paths meet in a single, sacred place: the heart of the seeker. We have reached a time when scientific understanding mirrors the teachings of the great wisdom traditions in revealing our energetic heart as the light of consciousness, the fire of love, a field of intelligence. Tending the Heart Fire, the first book by pioneering yogini Shiva Rea, is an invitation to embody our extraordinary potential at this turning point in time, to reconnect your life to the rhythms of your body and the natural world—to live in flow with the pulse of life. Weaving together wisdom from the great world traditions—including yoga, Ayurveda, Tantra, and modern science—Shiva presents an essential resource for becoming a firekeeper of the sacred heart. This diverse treasury is filled with meditations, life guidance, seasonal rituals, and daily practices, including: Insights for harmonizing with the sacred junctures of time—the daily, weekly, lunar, and solar cycles of manifestation and renewal Aligning with the seasons—how to adapt your diet, exercise, and yoga rhythms throughout the annual cycle Ways to honor the great sacred holidays, rites, and festivals Awakening of sahaja—the natural flow at the origins and source of yoga asana and sacred embodiment at the heart of yoga and Tantra Skills for tending your inner fire in every aspect of life

and healing imbalances that can support a renewable energy lifestyle A visual teaching with over a hundred full-color images, including reference charts, diagrams, illustrations, and ancient poetry for inspiration The legacy of the Heart Fire is more than eight hundred thousand years old—and in our modern world, we need more than ever to consciously reconnect to the radiant field that transcends time, space, and culture. "The direct awakening of the heart often happens when we are at a crisis point, when the armor of our heart has to crack," writes Shiva Rea. "Let us return to the power and magnificence of our hearts—as living fire, as intelligent energy and electromagnetic radiance, and as our illuminating guide toward love, creativity, and deep knowing of our true sacred nature."

what cannot be conveyed in conventional language. Why is it that creative arts therapists fail to apply this line of thinking to research? In this exciting and innovative book, Shaun McNiff, one of the field's pioneering educators and authors, breaks new ground in defining and inspiring art-based research. He illustrates how practitioner-researchers can become involved in art-based inquiries during their educational studies and throughout their careers, and shows how new types of research can be created that resonate with the artistic process. Clearly and cogently expressed, the theoretical arguments are illustrated by numerous case examples, and the final part of the book provides a wealth of ideas and thought provoking questions for research. This challenging book will prove invaluable to creative art therapy educators, students, and clinicians who wish to approach artistic inquiry as a way of conducting research. It will also find a receptive audience within the larger research community where there is a rising commitment to expanding the theory and practice of research. Integrating artistic and scientific procedures in many novel ways, this book offers fresh and productive visions of what research can be.

expert and best-selling author Peggy Bowes ("The Rosary Workout"), Vost explores the ways in which a daily devotional can feed both the soul and the body. "Tending the Temple" is written with a daily spiritual meditation upon the life of a saint whose influence then becomes the foundation for a unique exercise for that day. The winning team of Vost, Kapler, and Bowes has created a truly distinctive way to begin each day in a faith-filled way and is sure to become a favorite for every person anxious to live out his or her faith both spiritually and physically. The glossary and health terms included as references are invaluable, and show the determination of Vost, Kapler, and Bowes to help the reader combine health of body with health of spirit. As they so passionately-and with wit and candor-remind the reader: It is never too late to care for your body the way God intended! "Tending the Temple "is a great place to see how body and spirit can work together for the ultimate in fulfillment: living as God planned-whole and holy. Product Review "Since all human beings are a union of body and spirit, care of the physical and spiritual have tandem importance. "Tending the Temple "is a surprisingly practical and engaging resource for those who have as their goal the edification of the entire person. It presents an excellent opportunity to use any day of the calendar year as an opportunity to start fresh on a plan for truth-centered self improvement. Readers will be pleasantly surprised at how sensible a healthful spiritual and physical routine can fit into the context of the Church's liturgical cycle." William Golding's unforgettable classic of boyhood adventure and the savagery of humanity comes to Penguin Classics in a stunning Graphic Deluxe Edition with a new foreword by Lois Lowry As provocative today as when it was first published in 1954, Lord of the Flies continues to ignite passionate debate with its startling, brutal portrait of human nature. William Golding's compelling story about a group of very ordinary boys marooned on a coral island has been labeled a parable, an allegory, a myth, a morality tale, a parody, a political treatise, and even a vision of the apocalypse. But above all, it has earned its place as one of the indisputable classics of the twentieth century for readers of any age. This Penguin Classics Graphic Deluxe Edition features an array of special features to supplement the novel, including a foreword by Lois Lowry, an introduction by Stephen King, an essay by E. M. Forster, an essay on teaching and reading the novel and suggestions for further exploration by scholar Jennifer Buehler, and an extended note by E. L. Epstein, the publisher of the first American paperback edition of Lord of the Flies. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-

Fire, both inevitable and ubiquitous, plays a crucial role in North American ecosystems. But as necessary as fire is to maintaining healthy ecosystems, it threatens human lives and livelihoods in unacceptable ways. This volume explores the rich yet largely uncharted terrain at the intersection of fire policy, fire science, and fire management in order to find better ways of addressing this pressing dilemma. Written in clear language, it will help scientists, policy makers, and the general public, especially residents of fire-prone areas, better understand where we are today in regard to coping with wildfires, how we got here, and where we need to go. Drawing on abundant historical

and analytic information to shed new light on current controversies, *Living with Fire* offers a dynamic new paradigm for coping with fire that recognizes its critical environmental role. The book also tells how we can rebuild the important ecological and political processes that are necessary for finding better ways to cope with fire and with other complex policy dilemmas.

In the early twentieth century, university administrators and educators regarded bodily health as a marker of an individual's moral and mental strength and as a measure of national vitality. Beset by social anxieties about the physical and moral health of their students, they introduced compulsory health services and physical education programs in order to shape their students' character. *Tending the Student Body* examines the development of these health programs at Canadian universities and the transformation of their goals over the first half of the twentieth century from fostering moral character to promoting individualism, self-realization, and mental health. Drawing on extensive records from Canadian universities, Catherine Gidney examines the gender and class dynamics of these programs, their relationship to changes in medical and intellectual thought, and their contribution to ideas about the nature and fulfilment of the self. Her research will be of interest to historians of medicine, gender, sport, and higher education.

Sweet, Fun Romance--Set in 1971, nurse Julie Peters is ambitious and tenacious, but her plans to modernize Waterside Hospital's labor and delivery department are thwarted by old-school doctors and brown-nosing colleagues. The last thing on her mind is falling in love as she confronts her career-related demons. Still, she feels the pull of attraction to one special doctor. Dr. Michael Young turned away from a prestigious research position at Duke University to practice medicine in a smaller, less intense setting at Waterside Hospital. While nurses chase him by the dozen, he is intrigued and satisfied with building a nest-egg for when the right woman finally happens along. When Julie is faced with choices that put her job, her life's dream in peril her relationship with Michael begins to ignite. Can a Thanksgiving stay in the regal home called Bliss give her the space she needs to right her future and fall in love? Will their growing love mean Julie loses herself? Humor, love and a similar attitude toward medicine seal their love, but will it destroy their careers?

David Strohmaier's long career as a firefighter has given him intimate knowledge of wildfire and its complex role in the natural world of the American West. It has also given him rare understanding of the painful losses that are a consequence of fire. Strohmaier addresses our ambivalence about fire and the realities of loss to it—of life, human and animal, of

livelihoods, of beloved places. He also examines the process of renewal that is yet another consequence of fire, from the infusion of essential nutrients into the soil, to the sprouting of seeds that depend on fire for germination, to the renewal of species as the land restores itself. Ultimately, according to Strohmaier, living with fire is a matter of choices, of “seeing the connection between loss on a personal scale and loss on a landscape scale: in relationship with persons, and in relationship to and with the land.” We must cultivate a longer perspective, he says, accepting that loss is a part of life and that “humility and empathy and care are not only core virtues between humans but are also essential virtues in our attitudes and actions toward the earth.” *Drift Smoke* is a powerful and moving meditation on wildfire by someone who has seen it in all its terror and beauty, who has lost colleagues and beloved terrain to its ferocity, and who has also seen the miracle of new life sprouting in the ashes. The debate over the role and control of fire in the West will not soon end, but Strohmaier’s contribution to the debate will help all of us better appreciate both the complexity of the issues and the possibilities of hitherto unconsidered solutions that will allow us to inhabit a place where fire is a natural, and needed, part of life.

Imagination: Exploring Fantasy and Desire in Analytical Psychology, Sean Fitzpatrick explores how our obligation to the Other extends to our most intimate spaces. Informed by Jungian psychology and the philosophy of Emmanuel Levinas, Fitzpatrick imagines an ethical approach that can negotiate the delicate and porous boundary between inner and outer, personal and collective fantasy. Combining both theory and practice, the book examines theorists of the imagination, such as Plato, Coleridge, Sartre, and Richard Kearney, explores stories from contemporary culture, such as Jimmy Carter and New York's "Cannibal Cop", and includes encounters in the consulting room. The Ethical Imagination explores how these questions have been asked in different ways across culture and history, and Fitzpatrick examines the impact of our modern, digital world on ethics and imagination. In this original examination of the ethical status of our imagination, this book illustrates how our greatest innovations, works of art, and acts of compassion emerge from the human imagination, but so also do our horrific atrocities. Fitzpatrick compellingly demonstrates that what and how we imagine matters. Unique and innovative, this book will be of immense interest to Jungian psychotherapists, analytical psychologists, and other mental health professionals interested in the ethics, the imagination, and clinical work with fantasy. It will also be an important book for academics and students of Jungian and post-Jungian studies, philosophy, religious studies, and ethics.
