"Numerous books that cover various phases of accident prevention have been written, although none have been written primarily to serve physicians and public health workers. This volume attempts to do so. In order to help the reader organize the material presented, chapters relating general areas of accident prevention basic to all fields of safely include the following: Chapter 1, The Magnitude of the Problem; 2, Community Organization; 3, The Epidemiology of Accidents; 4, The Family Approach; 16, The Physician's Role; 17, Public Health Programs; 18, Programs for Physicians and Medical Societies; 19, Fact Gathering; 20, Professional Education; and 20, Research. Readers primarily interested in traffic accident prevention will find Chapter 8, Traffic Safety, the central core, and references to various segments of traffic safety covered in Chapter 5, Childhood Accidents; 6, Accidents to the Aged; 9, Farm Safety; 11, Medical Aspects of Industrial Fleet

Driving; 12, School Safety; and 15, Emergency Care. Chapter 7, Home Safety, covers the basic information on this subject, but additional aspects will be found in Chapters 4, The Family Approach; 5, Childhood Accidents; and 6, Accidents to the Aged. Those concerned primarily with childhood accidents will be interested in Chapter 5. They may wish to see additional information on childhood accidents in Chapters 4, The Family Approach; 7, Home Safety; 12, School Safety; and 13, Recreational Safety. For those especially interested in Chapter 6, Accidents to the Aged, there is some additional information in Chapter 4, The Family Approach; and 7, Home Safety. Chapter 10, Industrial Safety; 14, Private Flight Safety; and 15, Emergency Care, are largely self-contained, chiefly requiring supplementation by the common denominator Chapters 1 to 4, and 16 to 21. The book is not fundamentally a detailed treatise containing large numbers of technical terms. It is largely descriptive and explanatory in nature." Religious Remembrancer

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex,

charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page. From the Trade Paperback edition.

A new approach to safety, based on systems thinking, that is more effective, less costly, and easier to use than current techniques. Engineering has experienced a technological revolution, but the basic engineering techniques applied in safety and reliability engineering, created in a simpler, analog world, have changed very little over the years. In this groundbreaking book, Nancy Leveson proposes a new approach to safety--more suited to today's complex, sociotechnical, software-intensive world--based on modern systems thinking and systems theory. Revisiting and updating ideas pioneered by 1950s aerospace engineers in their System Safety concept, and testing her new model extensively on real-world examples,

Leveson has created a new approach to safety that is more effective, less expensive, and easier to use than current techniques. Arguing that traditional models of causality are inadequate, Leveson presents a new, extended model of causation (Systems-Theoretic Accident Model and Processes, or STAMP), then shows how the new model can be used to create techniques for system safety engineering, including accident analysis, hazard analysis, system design, safety in operations, and management of safety-critical systems. She applies the new techniques to real-world events including the friendly-fire loss of a U.S. Blackhawk helicopter in the first Gulf War; the Vioxx recall; the U.S. Navy SUBSAFE program; and the bacterial contamination of a public water supply in a Canadian town. Leveson's approach is relevant even beyond safety engineering, offering techniques for "reengineering" any large sociotechnical system to improve safety and manage risk.

Adventures of Huckleberry Finn

Strange visions plague a man after he survives a near-death experience in this chilling thriller from #1 New York Times bestselling author Dean Koontz. Surviving a car accident on a snowy mountain road is miraculous for Lindsey Harrison, but even more so for her husband, Hatch, who was clinically dead for eighty minutes. After experimental procedures bring Hatch back to life, he awakens with the terrifying feeling that something is out there. But it soon becomes apparent that the evil stalking Hatch is within him—a dark force of murderous rage that hides within us all

This manual will ensure that the management of massive fatalities forms part of disaster preparedness and response plans, and that it is a fundamental aspect of humanitarian assistance to survivors and rehabilitation and reconstruction programs. The manual provides the technical information that will support the correct approach to handling dead bodies. Contents: Preparedness for mass deaths; Medicolegal work in major disasters; Health considerations in cases of mass fatalities; Sociocultural aspects; Psychological aspects; Legal aspects; Cases studies; Final recommendations; Myths and realities of management of dead bodies in disasters; and Glossary. Illustrations.

Although there are several gaps in understanding the many issues related to neurological disorders, we know enough to be able to shape effective policy responses to some of the most common. This book describes and discusses the increasing public health impact of common neurological disorders such as dementia, epilepsy, headache disorders, multiple sclerosis, neuroinfections, neurological disorders associated with malnutrition, pain associated with neurological disorders, Parkinson's disease, stroke and traumatic brain injuries. It provides information and advice on public health interventions that may reduce their occurrence and consequences, and offers health professionals and planners the opportunity to assess the burden caused by these disorders. The clear message that emerges is that unless immediate action is taken globally, the neurological burden is likely to become an increasingly serious and unmanageable.
