## **The Art of Ancient Greece and Rome, from the Rise of Greece to the Fall of Rome**

This new and richly illustrated overview of Greek painting combines a fresh scholarly approach to visual arts with the most complete survey to date of the painted monuments of classical antiquity. The Art of Painting in Ancient Greece covers a wide chronological and geographical span, from the Bronze Age murals of Knossos, Santorini and Mycenae to the opulent villas of the Roman Empire, from Anatolia and Egypt in the East to Campania and Etruria in the West. Surveying the techniques, materials, and works produced, as well as ancient literary accounts, the book engages in five main lines of inquiry: Why did the Greeks cover the walls of their sanctuaries, agoras, palaces, homes, and even their tombs with painted images? What topics, real or imaginary, did they choose to depict? How were those images created? What were the techniques employed and the materials used? Who painted those images? And how does the spectacular phenomenon of Greek monumental painting compare with other branches of Greek art, from mosaics and vase painting to sculpture?

This book charts a significant aspect of European heritage: cemeteries. Cemeteries are nowadays considered as formal cultural sites and open-air museums attracting a great number of visitors; while cemetery records, memorial monuments, epitaph inscriptions and symbols provide useful data, attracting the interest of an increasing number of scholars from various disciplines and backgrounds. This collective volume consists of selected papers, presented at the ASCE (Association of Significant Cemeteries in Europe) Conference: “Ancient Greek Art and European Funerary Art” organized by the Harokopio University of Athens-Greece on October 5-7 2017, aiming to highlight various cultural aspects of cemeteries. The authors present funerary art and its classical origin, investigate theoretical and historical approaches, plan cultural and educational routes, design technological applications concerning the use of cemeteries as cultural sites, and propose multiple ways for promoting cemetery heritage and public engagement; while the majority of the papers is based on field and archival research and is accompanied by original images. The multicultural character of death heritage is highlighted through the variety of case-studies presented in this volume, introducing different perspectives and interpretations on art, history, heritage and cultural tourism, laying the groundwork for the public discussion on our common heritage as appeared in cemeteries, appealing to both the wider public and the academic community.

This informal history traces battle tactics and military strategy from the time of the city-states' phalanxes of spearmen to the far-reaching combined operations of specialized land and sea forces in the Hellenistic Age. The author first describes the attitude of the Greek city-state toward war, and shows the military conventions and strategies associated with it. He then recounts how the art of war gradually evolved into new forms through the contributions of such men as the great commander Epaminondas, Philip of Macedon, his son Alexander the Great, and others. He also discusses the interdependence of land and sea power, describes the first use of cavalry, and tells of the ingenious Greek devices of siegecraft, including the "fifth column." ## **Art of the Classical World in the Metropolitan Museum of Art**

The proem to Herodotus's history of the Greek-Persian wars relates the long-standing conflict between Europe and Asia from the points of view of the Greeks' chief antagonists, the Persians and Phoenicians. However humorous or fantastical these accounts may be, their stories, as voiced by a Greek, reveal a great deal about the perceived differences between Greeks and others. The conflict is framed in political, not absolute, terms correlative to historical events, not in terms of innate qualities of the participants. It is this perspective that informs the argument of *The Art of Contact: Comparative Approaches to Greek and Phoenician Art*. Becky Martin reconsiders works of art produced by, or thought to be produced by, Greeks and Phoenicians during the first millennium B.C., when they were in prolonged contact with one another. Although primordial narratives that emphasize an essential quality of Greek and Phoenician identities have been critiqued for decades, Martin contends that the study of ancient history has not yet effectively challenged the idea of the inevitability of the political and cultural triumph of Greece. She aims to show how the methods used to study ancient history shape perceptions of it and argues that art is especially positioned to revise conventional accountings of the history of Greek-Phoenician interaction. Examining Athenian and Tyrian coins, kouros statues and mosaics, as well as the familiar Alexander Sarcophagus and the sculpture known as the "Slipper Slapper," Martin questions what constituted "Greek" and "Phoenician" art and, by extension, Greek and

Phoenician identity. Explicating the relationship between theory, method, and interpretation, *The Art of Contact* destabilizes categories such as orientalism and Hellenism and offers fresh perspectives on Greek and Phoenician art history.

The 18th century's Neoclassicist movement, with its white marble sculptures inspired by the art of the ancient world, has helped Greek art to remain vivid in our memories even today. But the reality of ancient art was entirely different, as surfaces were in fact much more brut. As author Michael Siebler points out, recent findings have revealed that the seemingly perfect bodies of statues and sculptures were very often painted in flamboyant colors and ornaments. Thus ancient Greek art combined a high level of classical identity with an equal amount of sensuality. Despite being viewed in a new light, the beauty of the works of art persists.
