It's Alive!

Katherine Mortenhoe lives in a near future very similar to the present day. Only in her time, dying from anything but old age is unheard of; death has been cured. So when Katherine is diagnosed with a terminal brain disease brought on by an inability to process an ever increasing volume of sensory input, she immediately becomes a celebrity to the “pain-starved public.” But Katherine rejects her tragic role: She will not agree to be the star of a Human Destiny TV show, her last days will not be documented or broadcast. What she doesn't realize is that from the moment of diagnosis she's been watched, not only by television producers but by a new kind of program host, a man with a camera behind his unsleeping eyes. Like Margaret Atwood's MaddAddam trilogy, Kazuo Ishiguro's Never Let Me Go, and the television series Black Mirror, The Continuous Katherine Mortenhoe is a thrilling psychological drama that is as wise about human nature as it is about the nature of technology.

The Greatest Sci-Fi Movies Never Made

With just thirteen feature films in half a century, Stanley Kubrick established himself as one of the most accomplished directors in motion picture history. Kubrick created a landmark and a benchmark with every film; working in almost every genre imaginable, including film noir, war movie, SF, horror, period drama, historical epic, love story and satire - yet

transcended traditional genre boundaries with every shot. Examining every feature film, from the early shorts through to classics such as Paths of Glory, Dr Strangelove, 2001: A Space Odyssey, A Clockwork Orange, The Shining, Full Metal Jacket and finally, Eyes Wide Shut, The Complete Kubrick provides a unique insight into understanding the work of cinema's most enigmatic, iconoclastic and gifted auteur.

The Complete Kubrick

A compilation of selected review essays from Erickson's DVD Savant internet column, compiled to provide an overview of the science fiction genre.

The Martian

A collection of short stories by the author of Childhood's End and 2001: A Space Odyssey showcases the author's storytelling skills in such works as "The Sentinel," "Guardian Angel," "The Songs of Distant Earth," and "Breaking Strain." Reprint.

Films from the Future

- Fantastic Press strikes again with its second trade paperback offering, this time exploring the ultra-fanciful universe of spaceships, exotic planets, time travel, and extraterrestrials. - The "Top 100 Sci-Fi Movies" are reviewed and ranked by fantasy screenwriter/film historian Gary Gerani, who covers everything from early silent groundbreakers like A Trip to the Moon to today's widescreen, computer-generated blockbusters. With over 600 rare visuals, full-color layouts. and an introduction by one of Hollywood's greatest filmmakers, this exciting new pictorial overview is the ideal companion book to 2010's Top 100 Horror Movies.

War Movie Posters

Once upon a time, science fiction was only in the future. It was the stuff of drive-ins and cheap double-bills. Then, with the ever-increasing rush of new, society-altering technologies, science fiction pushed its way to the present, and it busted out of the genre ghetto of science fiction and barged its way into the mainstream. What used to be mere fantasy (trips to the moon? Wristwatch radios? Supercomputers capable of learning?) are now everyday reality. Whether nostalgic for the future or fast-forwarding to the present, The Sci-Fi Movie Guide: The Universe of Film from Alien to Zardoz covers the broad and widening range of science-fiction movies. From the trashy to the epic, from the classics to today's blockbusters, this

cinefile's guidebook reviews nearly 1,000 of the biggest, baddest, and brightest from every age and genre of cinematic and TV science fiction. You'll find more than just Star Wars, Star Trek, and Transformers, with reviews on many overlooked and under-appreciated gems and genres, such as • Monsters! Pacific Rim, Godzilla, The Thing, Creature from the Black Lagoon • Superheroes: Thor, Iron Man, X-Men, The Amazing Spider-man, Superman • Avant-garde masterpieces: Solaris, 2001, Brazil • and many, many more categories and movies!!

Paprika

Make Room! Make Room!

A dystopian thriller follows a boy and girl on the run from a town where all thoughts can be heard – and the passage to manhood embodies a horrible secret. Todd Hewitt is the only boy in a town of men. Ever since the settlers were infected with the Noise germ, Todd can hear everything the men think, and they hear everything he thinks. Todd is just a month away from becoming a man, but in the midst of the cacophony, he knows that the town is hiding something from him -- something so awful Todd is forced to flee with only his dog, whose simple, loyal voice he hears too. With hostile men from the town in pursuit, the two stumble upon a strange and eerily silent creature: a girl. Who is she? Why wasn't she killed by the germ like all the females on New World? Propelled by Todd's gritty narration, readers are in for a white-knuckle journey in which a boy on the cusp of manhood must unlearn everything he knows in order to figure out who he truly is.

Childhood's End

MODERN SCI-FI FILMS FAQ: ALL THATS LEFT TO KNOW ABOUT TIME TRAVEL ALIEN ROBOT AND OUT-O

Science Fiction Film

This is the original screenplay of Westworld as it was just two days before actual shooting began. Before this, there had been many cuts, changes, additions and deletions over a period of months. Much can be learned about actual film making

from reading this book. It is to be suggested to read the Forward by Former Story Editor Saul David and the introduction by Michael Chrichton at least twice, once before downloading and seeing the original film and then afterwards. Now it is said Westworld was ahead of its time in depicting the dangers of computers and automated systems. Now we can realize that when the role I am not sure that the author Michael Chrichton even realized what he had done here. He says that his goal was merely to provide "entertainment." We now understand that the robots in the movie are breaking down because of a virus or a bug in the system. The guests are paying and coming to Westworld to experience life as it was in the days of Pompeii before it was destroyed in the eruption of Mount Vesuvius in 79 AD, or the Medieval World of the 13th Century or the Wild West of the 1880s. Now we know the robots start breaking down or malfunctioning that they are being hit with a programming bug or by a computer virus. In this and many other respects this movie used new technology and did things that had never been done before. The Medieval Queen who is a robot convinces the knight to fight a battle to the death with the Black Knight. She tells the knight he will win the battle because the Black Knight cannot see well from his left eye. It is a trap. The left eye has been repaired by the Technicians. So, the knight thinking he is sure to win is killed in real life by the Black Knight.

We Can Remember It for You Wholesale

This collection contains 297 full-colour illustrations spread over 84 pages. This volume is 50% devoted to the films made about World War II, and the other 50% is devoted to all other wars, from ancient wars to the Gulf War. Included are films that take place during battles, as well as other aspects of war such as prisoners of war, espionage, the home front, etc.

The Invisible Man

Follows the adventures of Paul Atreides, the son of a betrayed duke given up for dead on a treacherous desert planet and adopted by its fierce, nomadic people, who help him unravel his most unexpected destiny.

The Biology of Science Fiction Cinema

"I'll be back." -- The Terminator, The Terminator (1984) To the movies, that is. And so will you with the help of Sci-Fi Movie Freak, a celebration of some of the greatest science-fiction movies of all time. Your inner geek will freak finding everything from classics like Metropolis, Forbidden Planet, and 2001: A Space Odyssey to modern movies including Avatar, Moon, and Inception, and even the entertaining "failures" like Robot Monster, Gamera the Invincible, and Battlefield Earth. Movies are divided into various chapters including Best of the Best, Further Essentials, and Lesser-Known Gems. Features more than 100 movies 250+ photos of movie stills and posters Top 10 lists of the best directors, female characters, villains and

more Free DVD included of the magnificently bad cult classic Plan 9 From Outer Space.

Stand on Zanzibar

What if I Am Legend had been directed by Ridley Scott, and had starred Arnold Schwarzenegger? What if James Cameron had directed Spider-Man? This groundbreaking book, now fully updated and revised, tells the story of legendary unmade films. What would Terry Gilliam's Watchmen have been like, and how did Darren Aronofsky almost end up directing the movie? Why was Nicolas Cage paid \$20 million for not playing Superman? Also covered are Steven Spielberg's Night Skies, Stanley Kubrick's Childhood's End, Philip Kaufman's Star Trek: Planet of the Titans, Kevin Smith's Six Million Dollar Man, Tim Burton's Superman Lives and James Cameron's Alien 5!

"Originally self-published as an ebook in 2011 and subsequently published in hardcover in slightly different form in the United States by Crown Publishers and as a trade paperback by Broadway Books in 2014"--Title page verso.

Rotten Movies We Love

This volume of the classic stories of Philip K. Dick offers an intriguing glimpse into the early imagination of one of science fiction's most enduring and respected names. Since his untimely death in 1982, interest in Dick's work has continued to mount and his reputation has been enhanced by a growing body of critical attention as well as many films based on his stories and novels. Featuring the story We Can Remember It for You Wholesale, which inspired the major motion picture Total Recall, this collection draws from the writer's earliest fiction, written during the years 1952-55. Also included are fascinating works such as The Adjustment Team (basis of the 2011 movie The Adjustment Bureau), Impostor (basis of the

2001 movie), and many others. "A useful acquisition for any serious SF library or collection." --Kirkus Reviews "More than anyone else in the field, Mr. Dick really puts you inside people's minds." --Wall Street Journal "The collected stories of Philip K. Dick are awe-inspiring." --Washington Post

Sculpting in Time

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film *Blade Runner* By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone

Beastgirl and Other Origin Myths

The Sci-Fi Movie Guide

Red Schuhart is a stalker, one of those young rebels who are compelled, in spite of extreme danger, to venture illegally into the Zone to collect the mysterious artifacts that the alien visitors left scattered around. His life is dominated by the place and the thriving black market in the alien products. But when he and his friend Kirill go into the Zone together to pick up a "full empty," something goes wrong. And the news he gets from his girlfriend upon his return makes it inevitable that he'll keep going back to the Zone, again and again, until he finds the answer to all his problems. First published in 1972, "Roadside Picnic" is still widely regarded as one of the greatest science fiction novels, despite the fact that it has been out of print in the United States for almost thirty years. This authoritative new translation corrects many errors and omissions and has been supplemented with a foreword by Ursula K. Le Guin and a new afterword by Boris Strugatsky explaining the strange history of the novel's publication in Russia.

Typeset in the Future

Bill Warren's *Keep Watching the Skies!* was originally published in two volumes, in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition, with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs (many rare, 35 in color), has seven useful appendices, and concludes with an enormous index. This book is also available in softcover format (ISBN 978-1-4766-6618-1).

Historical Dictionary of Science Fiction Cinema

Science Fiction Film develops a historical and cultural approach to the genre that moves beyond close readings of iconography and formal conventions. It explores how this increasingly influential genre has been constructed from disparate elements into a hybrid genre. *Science Fiction Film* goes beyond a textual exploration of these films to place them within a larger network of influences that includes studio politics and promotional discourses. The book also challenges the perceived limits of the genre - it includes a wide range of films, from canonical SF, such as *Le voyage dans la lune*, *Star Wars* and *Blade Runner*, to films that stretch and reshape the definition of the genre. This expansion of generic focus offers an innovative approach for students and fans of science fiction alike.

Sci-Fi Chronicles

Spanning nine decades and branded by the most trusted authority on film, *Turner Classic Movies: Must-See Sci-Fi* showcases 50 of the most shocking, weird, wonderful, and mind-bending movies ever made. From *A Trip to the Moon* (1902) to *Arrival* (2016), science fiction cinema has produced a body of classics with a broader range of styles, stories, and subject matter than perhaps any other film genre. They are movies that embed themselves in the depths of the mind, coloring our view of day-to-day reality and probably fueling a few dreams (and nightmares) along the way. In *Turner Classic Movies: Must-See Sci-Fi*, fifty unforgettable films are profiled, including beloved favorites like *The Day the Earth Stood Still* (1951) and *Fantastic Voyage* (1966), groundbreaking shockers like *Planet of the Apes* (1968) and *Alien* (1979), and lesser-known landmarks like *Things to Come* (1936) and *Solaris* (1972). Illustrated by astounding color and black-and-white images, the book presents the best of this mind-bending genre, detailing through insightful commentary and behind-the-scenes stories why each film remains essential viewing. A perfect gift for any film buff or sci-fi fanatic!

Dune

Science fiction films of the 1930s and 1940s were often set in dark laboratories that had strange looking glass containers

with bubbling fluids and mad scientists conducting glandular and hormonal experiments. In the 1950s, films were more focused on radiation induced mutations. The 1960s and 1970s brought more sophisticated biological sciences to the movies and focused on such relatively new concepts as immunology, cyrobiology, and biochemistry. In the 1980s and 1990s, the focus of science fiction films has been DNA. This work of film criticism relates 71 science fiction films to the biological sciences. The author covers cell biology, pharmacology, endocrinology, hematology, and entomology, to name just a few topics. An analysis of each film includes a brief plot synopsis, the author's favorite quotations, the biological principles involved, the accuracy of the laboratory, and correct and incorrect biological information. In his analyses, the author sets out what would be required to achieve in real life the results seen in the movies and whether these experiments or events could actually happen.

Keep Watching the Skies!

The brilliant 1969 Hugo Award-winning novel from John Brunner, *Stand on Zanzibar*, now included with a foreword by Bruce Sterling Norman Niblock House is a rising executive at General Technics, one of a few all-powerful corporations. His work is leading General Technics to the forefront of global domination, both in the marketplace and politically---it's about to take over a country in Africa. Donald Hogan is his roommate, a seemingly sheepish bookworm. But Hogan is a spy, and he's about to discover a breakthrough in genetic engineering that will change the world and kill him. These two men's lives weave through one of science fiction's most praised novels. Written in a way that echoes John Dos Passos' *U.S.A. Trilogy*, *Stand on Zanzibar* is a cross-section of a world overpopulated by the billions. Where society is squeezed into hive-living madness by god-like mega computers, mass-marketed psychedelic drugs, and mundane uses of genetic engineering. Though written in 1968, it speaks of now, and is frighteningly prescient and intensely powerful. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Sci-Fi Movie Freak

A quest for a priceless element—and revenge—fuels this far-future interstellar adventure that “reads like *Moby-Dick* at a strobe-light show” (*Time*). In 3172, the universe is divided between three political units: the stars and worlds of Draco, with Earth as its power center; the Pleiades Federation, on whose capital world, New Ark, lives the incredibly wealthy Von Ray family, descended from well-heeled merchants whose ancestors made their fortune as pirates; and the Outer Colonies, where, in their underwater mines, tiny quantities of the fabulously valuable Illyrion have been discovered. Lorq Von Ray was a playboy and young space-yacht-racing captain who, at a party at Earth's Paris, clashed with Draco's Prince Red. This sets Lorq on a demonic quest, through which he hopes to find vengeance. When a star goes nova and implodes, in the seething stellar wreckage for a few days—even hours—lie tons of Illyrion, the element that makes interstellar travel possible. To help

him secure the priceless fuel, Lorq recruits a gypsy musician, a would-be novelist, and some other ragtag misfits. But an even more dangerous fuel than Illyrion is revenge . . . This ebook features an illustrated biography of Samuel R. Delany including rare images from his early career.

Modern Sci-Fi Films FAQ

A U.S. release of a signature work by the award-winning Japanese writer traces a brilliant psychotherapist's surreal battle in the realms of human subconscious when a psychiatric technology is stolen and used to invade dreams and induce insanity. Original. 15,000 first printing.

Roadside Picnic

Kirk Hammett is the lead guitarist of Metallica, one of the most successful and beloved bands in rock history. But even before Hammett assumed the heavy metal mantle, he was a geek for the imaginative universe of horror. From the age of six, the guitarist gathered toys, ephemera, and memorabilia from his favourite films. This generously illustrated book highlights the finest examples of Hammett's personal collection of horror and sci-fi movie posters--an astonishing trove that spans the history of the genre.

Do Androids Dream of Electric Sheep?

If you want to know your Degoba from your Delos or your Ming from your Morlock, if you can't decide whether to eat Soylent Green or in Mos Eisley's Cantina, or if you simply want to try to comprehend 2001:A Space Odyssey, 101 Sci-Fi Movies You Must See Before You Die is for you. Visionary and imaginative - science fiction allows all other genres to leap, quite literally, into another dimension. From the classic low-budget, space exploration Flash Gordon tales of the Saturday matinee serials to the slick, CGI-realized world of The Matrix, science fiction films have long been pushing the boundaries of the visually and dramatically fantastic. Take a classic cop chase, and set it on Mars. Think of a haunted house story, then add the Nostromo. Take the boy-meets-girl classic, then make them mutants. Turn the known world on its head, play with the laws of physics, and all the while hold your audience spellbound. With insight from critics, film historians, academics, and experts in the field, 101 Sci-Fi Movies You Must See Before You Die offers a breadth of knowledge, insight, and passion to a century of close encounters, black holes, time-travel, dodgy outfits, distant planets, impossible quests, nuclear war, futuristic technology, inexplicable forces, spaceships, extraordinary monsters, subterranean societies, and fluorescent drinks - get a dog and don't list your name in the phone book.

The Knife of Never Letting Go

In the Retro Hugo Award-nominated novel that inspired the Syfy miniseries, alien invaders bring peace to Earth—at a grave price: “A first-rate tour de force” (The New York Times). In the near future, enormous silver spaceships appear without warning over mankind’s largest cities. They belong to the Overlords, an alien race far superior to humanity in technological development. Their purpose is to dominate Earth. Their demands, however, are surprisingly benevolent: end war, poverty, and cruelty. Their presence, rather than signaling the end of humanity, ushers in a golden age . . . or so it seems. Without conflict, human culture and progress stagnate. As the years pass, it becomes clear that the Overlords have a hidden agenda for the evolution of the human race that may not be as benevolent as it seems. “Frighteningly logical, believable, and grimly prophetic . . . Clarke is a master.” —Los Angeles Times

Tales from Development Hell

In *Typeset in the Future*, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into *2001: A Space Odyssey*, *Star Trek: The Motion Picture*, *Alien*, *Blade Runner*, *Total Recall*, *WALL·E*, and *Moon*, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (*Star Trek*), Paul Verhoeven (*Total Recall*), and Ralph Eggleston and Craig Foster (Pixar). *Typeset in the Future* is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds—and how they have come to represent “THE FUTURE” in popular culture.

Nova

Hook. Wet Hot American Summer. Valley of the Dolls. There are some movies that defy traditional critical assessment -- films that are panned by reviewers, but that go on to become beloved classics and cult phenoms anyway. Ever been crushed to learn your favorite movie -- or a new one you're dying to see -- has been given the big green splat from Rotten Tomatoes' infamous Tomatometer? The site's editors stand by their critics and scores, but they also feel your pain: Fresh films shouldn't get all the glory! In *Rotten Movies We Love*, the RT team celebrates 101 Rotten movies that can't be missed, including: Box office behemoths that bombed with critics: *Space Jam*, *Maleficent*, *Bad Boys* Sci-fi treasures so bad they're awesome: *Cherry 2000*, *Zardoz*, *Masters of the Universe* Rare Rottens from Fresh directors: *The Life Aquatic with Steve Zissou*, *Marie Antoinette*, *Legend*, *Willow* Deeply beloved cult classics: *The Last Dragon*, *Empire Records*, *The Craft*, *MacGruber* Underrated gems ahead of their time: *The Strangers*, *Event Horizon*, *Practical Magic*, *The Cable Guy* Sequels

worth a second look: Home Alone 2, Rocky IV, Jurassic Park III, Return to Oz Featuring 16 essays from some of the world's most well-known film critics -- Leonard Maltin, Terri White, Amy Nicholson, David Fear, K. Austin Collins, and more -- and punctuated with black-and-white film stills and punchy graphics, it's a fun romp through the quirkier corners of film history, sure to delight any cinephile or pop-culture fanatic.

The Andromeda Strain

A stark, unbridled vision of planet Earth on the brink of collapse, and the inspiration behind the classic sci-fi film, *Soylent Green*. At the close of the twentieth century, a planet overwhelmed by rampant overpopulation teeters on the edge of self-destruction. In New York City alone, 35 million people are squeezed into its packed boroughs, scrambling like rats for the world's dwindling resources. The only food available is a product called Soylent. And while the government tries to maintain order, the rich get richer and the poor stay underfoot. Finding a killer in this broken world is one hell of a job. But that's exactly what detective Andy Rusch has been assigned to do. If he can stay alive long enough, he might just solve the biggest case he's ever been on—unless humanity finally fulfills its promise and destroys itself first.

Annihilation

The Southern Reach Trilogy begins with this Nebula Award-winning novel that "reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world" (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. In *Annihilation*, the first volume of Jeff VanderMeer's Southern Reach trilogy, we join the twelfth expedition. The group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain, record all observations of their surroundings and of one another, and, above all, avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them and the secrets the expedition members are keeping from one another that change everything.

Sci-Fi Savant

A compulsively readable journey into the area of film-making where all writers, directors and stars fear to tread:

Development Hell, the place where scripts are written, actors hired and sets designed but the films rarely actually get made! Whatever happened to Batman versus Superman? Why have there been so many scripts written over the years for Steven Spielberg and George Lucas's still in development Indiana Jones 4? Why was Lara Croft's journey to the big screen so tortuous, and what prevented Paul Verhoeven from filming what he calls "one of the greatest scripts ever written"? Why did Ridley Scott's Crisis in the Hot Zone collapse days away from filming, and were the Beatles really set to star in Lord of the Rings? All these lost projects, and more, are covered in this major new book, which features many exclusive new interviews with the writers and directors involved.

The Sentinel

Hard Science Fiction Films that Predict the Future “As the breakneck advance of technology takes us into a world that is both exciting and menacing, sci-fi films give us an inkling of what is to come, and what we should avoid.” —Seth Shostak, senior astronomer at the SETI Institute, and host of Big Picture Science #1 Best Seller in Nanotechnology and Computers & Technology Dr. Andrew Maynard, physicist and leading expert on socially responsible development of emerging and converging technologies, examines science fiction movies and brings them to life. Advances in science and technology are radically changing our world. Films from the Future is an essential guide to navigating a future dominated by complex and powerful new technologies. The jump from room-filling processors to pocket-size super computers is just the beginning. Artificial intelligence, gene manipulation, cloning, and inter-planet travel are all ideas that seemed like fairy tales but a few years ago. And now their possibility is very much here. But are we ready to handle these advances? As Maynard explains, “Viewed in the right way?and with a good dose of critical thinking?science fiction movies can help us think about and prepare for the social consequences of technologies we don’t yet have, but that are coming faster than we imagine.” Films from the Future looks at twelve movies that take readers on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Gain a broader understanding of the complex relationship between science and society. The movies include old and new, and the familiar and unfamiliar, to provide a unique, entertaining, and ultimately transformative take on the power and responsibilities of emerging technologies. If you have read books such as The Book of Why, The Science of Interstellar, or The Future of Humanity, you will love Films from the Future.
