AAA New Car and Truck Buying Guide

NEW YORK TIMES BESTSELLER Gregory Zuckerman, the bestselling author of *The Greatest Trade Ever* and *The Frackers*, answers the question investors have been asking for decades: How did Jim Simons do it? Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Jim Simons is the greatest money maker in modern financial history. No other investor--Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros--can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. *The Man Who Solved the Market* is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also

a story of what Simons's revolution means for the rest of us.

Why do we feel uncomfortable talking about class? Why is it taboo? Why do people often address class through coded terminology like trashy, classy, and snobby? How does discriminatory language, or how do conscious or unconscious derogatory attitudes, or the anticipation of such behaviors, impact those from poor and working class backgrounds when they straddle class? Through 26 narratives of individuals from poor and working class backgrounds – ranging from students, to multiple levels of administrators and faculty, both tenured and non-tenured – this book provides a vivid understanding of how people can experience and straddle class in the middle, upper, or even elitist class contexts of the academy. Through the powerful stories of individuals who hold many different identities--and naming a range of ways they identify in terms of race, ethnicity, gender, sexuality, age,

ability, and religion, among others--this book shows how social class identity and classism impact people's experience in higher education and why we should focus more attention on this dimension of identity. The book opens by setting the foundation by examining definitions of class, discussing its impact on identity, and summarizing the literature on class and what it can tell us about the complexities of class identity, its fluidity, sometimes performative nature, and the sense of dissonance it can provoke. This book brings social class identity to the forefront of our consciousness, conversations, and behaviors and compels those in the academy to recognize classism and reimagine higher education to welcome and support those from poor and working class backgrounds. Its concluding chapter proposes means for both increasing social class consciousness and social class inclusivity in the academy. It is a compelling read for everyone in the academy, not least for those from poor or working class backgrounds who will find validation and recognition and draw strength from its vivid stories.
