Transnational Legal Processes

Sports Law and Legislation

A strain of law reaching beyond any bounded international or transnational remit to assert a global jurisdiction has recently acquired a new prominence. Intimations of Global Law detects this strain in structures of international law claiming a planetary scope independent of state consent, in new threads of global constitutional law, administrative law and human rights, and in revived notions of *ius gentium* and the global rule of law. It is also visible in the legal pursuit of functionally differentiated global public goods, general conflict rules, norms of 'legal pluralism' and new legal hybrids such as the global law of peace and humanity law. The coming of global law affects how law manifests itself in a global age and alters the shape of our legal-ethical horizons. Global law presents a diverse, unsettled and sometimes conflicted legal category, and one which challenges our very understanding of the rudiments of legal authority.

Introduction to International and European Sports Law

'Fragmentation' has become a defining, albeit controversial, metaphor of international law scholarship in the era of globalisation. Some scholars see it as a new development, others as history repeating itself; some approach it as a technical issue and some as the reflection of deeper political struggles. But there is near-consensus about the fact that the established vision of international law as a unitary whole is under threat. At the core of the fragmentation debate lies the concept of unity, but this is hardly ever rationalised and is more assumed than explained. Its meaning remains vague and intuitive. 'The Concept of Unity in Public International Law' attempts to dispel that vagueness by exploring the various possible meanings of the concept of unity in international law. However, eschewing one grand theory of unity, it identifies and compares five candidates. Intentionally pluralistic in its outlook, the book does not engage in normative arguments about whether international law is or should be unitary but seeks to show instead that the concept of unity is contested and that discourses on fragmentation are necessarily contingent. The thesis on which the book is based won the 2009 Prize for best doctoral thesis from the Association des professeurs de droit du Québec.

Transconstitutionalism

Theatre of the Rule of Law presents a sustained critique of global rule of law promotion - an expansive industry at the heart of international development, post-conflict reconstruction and security policy today. While successful in articulating and disseminating an effective global public policy, rule of law promotion has largely failed in its stated objectives of raising countries out of poverty and taming violent conflict. Furthermore, in its execution, this work deviates sharply from 'the rule of law' as commonly conceived. To explain this, Stephen Humphreys draws on the history of the rule of law as a concept, examples of legal export during colonial times, and a spectrum of contemporary interventions by development agencies and international organisations. Rule of law promotion is shown to be a kind of theatre, the staging of a morality tale about the good life, intended for edification and emulation, but blind to its own internal contradictions.

Transnational Commercial Law: International Instruments and Commentary

There is extensive and detailed academic literature on the legal development of international crimes such as war crimes and crime against humanity. However, not much attention has been paid to other serious crimes, including narcotics-related offences, human trafficking and money laundering, which do not necessarily amount to international crimes in the traditional sense. The purpose of this monograph is to fill this gap and offer a critical analysis of developments in the field of transnational organised crime under international law. The book is divided into two parts. Part I is entitled "Norms, Principles, and Concepts." It traces the history of organised crime and explores key concepts and norms relating to the practice from a multi-disciplinary perspective. It then looks at legal obligations imposed upon States as well as non-State actors in relation to transnational organised crime. Part II illustrates how these norms, principles and obligations are translated and enforced in practice. This will be done through case studies at the level of national law (Thailand, Serbia and the UK), regional law (European Union) and international law (United Nations). "A book of many parts, its thematic coherence comes from its devotion to identifying the social threat posed by organised crime and the legal steps taken at the international and national levels against that threat. Rich with example and illustration and written in a light, direct, style, it will provide a lucid guide for practitioners, policy-makers and students to the largely untraversed territory of the international legal system set up to suppress transnational organised crime." Professor Neil Bolster, University of Canterbury, New Zealand. "the international law governing organized crime is a close relative of the body of law applicable to the International Criminal Court and similar institutions. It provides a forum to address issues of more general concern, such as the scope of universal jurisdiction, immunities, statutory limitation and extradition. Tom Obokata's study, with its original and in some ways unique perspective, enriches our knowledge of the field". Professor William Schabas, Irish Centre for Human Rights. "The book is well written, its documentation is quite exhaustive, and its thesis is timely and compelling." Professor M. Cherif Bassiouni, DePaul University College of Law.

Transnational Law and Practice

Transconstitutionalism is a concept used to describe what happens to constitutional law when it is emancipated from the state, in which can be found the origins of constitutional law. Transconstitutionalism does not exist because a multitude of new constitutions have appeared, but because other legal orders are now implicated in resolving basic constitutional problems. A transconstitutional problem entails a constitutional issue whose solution may involve national, international, supranational and transnational courts or arbitral tribunals, as well as native local legal institutions. Transconstitutionalism does not take any single legal order or type of order as a starting-point or ultima ratio. It rejects both nation-statism and internationalism, supranationalism, transnationalism and localism as privileged spaces for solving constitutional problems. The transconstitutional model avoids the dilemma of 'monism versus pluralism'. From the standpoint of transconstitutionalism, a plurality of legal orders entails a complementary and conflicting relationship between identity and alterity: constitutional identity is rearticulated on the basis of alterity. Rather than seeking a 'Herculean Constitution',

transconstitutionalism tackles the many-headed Hydra of constitutionalism, always looking for the blind spot in one legal system and reflecting it back against the many others found in the world's legal orders.

Guide to International Legal Research

Transnational Organised Crime in International Law

The second edition of International Sports Law introduces many new topics, including the human rights of athletes, the use of instant replay cameras and computers to resolve disputes during competition, corruption in the sports arena, the emerging *lex sportiva* derived from arbitral awards, ambush marketing and other commercial issues. Commentary on the international legal framework, European regional law, and doping is substantially enlarged and the book features in-depth case studies of recent dispute resolution. Published under the Transnational Publishers imprint.

Suffolk Transnational Law Review

This book contributes new theoretical insight and in-depth empirical analysis about the relationship between transnational legality, state change and the globalisation of markets. The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism: the power to institute new rules and limits for national states. This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives. While leading scholars in the field have emphasised the much-needed value of case studies, there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution. This monograph addresses this empirical gap, whilst expanding the theoretical scope of the field. Mongolia's recent transformation as a mineral-exporting country provides a rare opportunity to witness economic and legal globalisation in process. Based on careful empirical analysis of national law and policy-making, the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector, specifically by redistributing state power in relation to the market, sub-national administrations and civil society. The book investigates the role of international financial institutions, multinational corporations and non-governmental organisations in normative transmission, as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment. As the book demonstrates, however, the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation, institutionally and ideologically. The book will be of interest to scholars of international law, global governance and the political economy

of development.

Theatre of the Rule of Law

Questions of legal extraterritoriality figure prominently in scholarship on legal pluralism, transnational legal studies, international investment law, international human rights law, state responsibility under international law, and a large number of other areas. Yet many accounts of extraterritoriality make little effort to grapple with its thorny conceptual history, shifting theoretical valence, and complex political roots and ramifications. This book brings together thirteen scholars of law, history, and politics in order to reconsider the history, theory, and contemporary relevance of legal extraterritoriality. Situating questions of extraterritoriality in a set of broader investigations into state-building, imperialist rivalry, capitalist expansion, and human rights protection, it tracks the multiple meanings and functions of a distinct and far-reaching mode of legal authority. The fundamental aim of the volume is to examine the different geographical contexts in which extraterritorial regimes have developed, the political and economic pressures in response to which such regimes have grown, the highly uneven distributions of extraterritorial privilege that have resulted from these processes, and the complex theoretical quandaries to which this type of privilege has given rise. The book will be of considerable interest to scholars in law, history, political science, socio-legal studies, international relations, and legal geography.

The Legacy of Bosman

In this era of globalisation, different legal systems and structures no longer operate within their own jurisdictions. The effects of decisions, policies and political developments are having an increasingly wide-reaching impact. Nowhere is this more keenly felt than in the sphere of European Union law. This collection of essays contributes to the co-operative search for interpretative and normative grids needed in charting the contemporary legal landscape. Written by leading lawyers and legal philosophers, they examine the effects of law's de-nationalisation by placing European law in the context of transnational law and demonstrate how it forces us to rethink our basic legal concepts and propose an approach to transnational law beyond the dichotomy of national and international law.

The European Union under Transnational Law

Long established as the market leading textbook on sports law, this much-anticipated new edition offers a comprehensive and authoritative examination of the legal issues surrounding and governing sport internationally. Locating the legal regulation of sport within an explicit socio-economic context, this refocused edition is divided into four core parts: Governance & Sport; Commercial Regulation; Sports Workplace; and Safety in Sport. Recent developments covered in this

edition include: EU competition law interaction with sport under arts. 101 and 102 of the Treaty on the Functioning of the European Union; the current World Anti-Doping Agency code; analysis of the recent Court of Arbitration for Sport Jurisprudence; reforms of the transfer system in team sports; anti-discrimination provisions in sport; engagement with match fixing; a focus on the legal context of 2012 London Olympics. Essential reading for students studying sports law or sports-related courses, this textbook will also prove useful to sports law practitioners and sports administrators in need of a clear companion to the field.

International and Transnational Criminal Law

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

This comprehensive and versatile book covers both international criminal law and the application of US criminal law transnationally. It has chapters on each of the core crimes (aggression, genocide, crimes against humanity, war crimes), as well as separate chapters on the international tribunals from Nuremberg on and the ICC. Other chapters treat modes of liability, defenses, crimes against women, and alternatives to criminal prosecution in post-conflict societies. Thus the book

can be used for courses focusing entirely on international criminal law and accountability for core crimes. But it also covers US criminal law in transnational contexts, including money laundering, Foreign Corrupt Practices Act, and terrorism. In addition, it includes chapters on extradition, evidence gathering abroad, comparative criminal procedure and comparative sentencing, and US constitutional rights abroad. Introductory chapters on the nature of international criminal law, transnational jurisdiction, and the basics of public international law make the book accessible to students with no prior background. New to the 3rd Edition: Recent developments in the international tribunals, including the Habré trial in the African Extraordinary Chamber Updates on post-Morrison jurisdictional developments and the treatment of jurisdiction in the Restatement (Fourth) of the Foreign Relations Law of the United States Activation of the crime of aggression by the ICC; cyber-attacks as aggression Recent war crimes jurisprudence and the treatment of war crimes in the US Department of Defense Law of War Manual A thorough revision of the ICC chapter including the Lubanga sentencing decisions and the Comoros decision on gravity Recent ICC jurisprudence on modes of liability Latest FCPA prosecution standards New cases on immunities and extradition Professors and students will benefit from: Versatility: Can be used for courses on international criminal law, and also for courses on US criminal law applied across borders Self-contained introductory chapters on basic public international law, transnational jurisdiction, and the nature of criminal law Detailed treatment of “headline” issues including torture, terrorism, and war crimes Readable background on historical context Teaching materials include: Comprehensive teacher’s manual, including the authors’ own teaching notes Discussion problems

Dealing in Virtue

This comprehensive, three-volume set focuses on the legal and business aspects of sports in the United States and abroad. The authors have presented the subject matter from a practical and pragmatic perspective, yet with analytical precision and attention to fine points of detail. International Sports Law and Business is composed of five parts. Part I deals with the law and business of sports in the United States, with the primary emphasis on the legal aspects of professional sports. Part II deals with the internationalization of sports from various perspectives, principally North American team sports. Part III explores the law and business of sports in 18 non-U.S. jurisdictions andndash; subject matter hardly covered in other sources, if at all. Part IV treats the legal and, to some extent, business aspects of broadcasting and sports, both in the United States and in selected foreign jurisdictions. Part V focuses upon sports marketing in its various forms in the United States, as well as its international perspectives. This easy-to-read work is unmatched in that it covers subjects not addressed or only tangentially addressed in other works, presents insiders perspectives on the subject matter, and focuses extensively on international aspects of sports law and business in connection with many different subjects. Among its exhibits, International Sports Law and Business includes a World League of American Football Standard Player Contract form, a sample World League of American Football Acquisition and Operation Agreement, Statute of Court of Arbitration for Sport and Regulations. It also includes a comprehensive index. Its unique coverage and practical features make

International Sports Law and Business a critical reference for agents, attorneys, and other practitioners involved in international sports law or handling a trust where one or more of the assets is sports-related, or considering expanding an existing practice area. Those involved in the study of sports law will also appreciate this high quality work.

Lex Sportiva: What is Sports Law?

This comprehensive collection of leading articles covers legal issues that have arisen out of international sports competition and its management. These papers trace the burgeoning field of international sports law from its origins about a half-century ago, through the course of complex challenges ranging from political boycotts of competition to doping of athletes, corruption, discrimination, players' rights and commercial influences such as broadcast rights. Within a unique institutional framework of national, international, non-governmental and inter-governmental authority, the emerging regime of public law is of fundamental importance not only to the sports industry and bar but, quite obviously, to a global public. This authoritative collection puts particular emphasis on the central role of the Olympic Movement and affiliated sports federations, the regional mechanism of the European Union and the characteristics of the European and North American sports models. The collection, along with an original introduction, will be of interest and value to students, researchers, academics and practitioners interested in international sports law.

Introduction to International and European Sports Law

Sports law has been growing with increasing rapidity over the years since the first edition of this book was published in 1999, regularly making headlines as well as leading to a developing body of law practised by specialist lawyers. This revised work, by leading practitioners in the field, with a foreword by Lord Coe, provides a coherent framework for understanding the principles of sports law in this area, as well as a deep analysis of its key features. The subject is split into various areas of practice: first, regulatory rules, which embrace the constitutional aspect of organised sport, including the disciplinary procedures of the various governing organisations; second, broadcasting and marketing resulting from the commercial exploitation, including sponsorship, of sports clubs, sporting events and players; and third, player's rights and obligations, which embraces a wide range of legal issues including club transfers and player contracts, and issues arising from employment (including discrimination law), personal injury and criminal law. Special attention is paid to the impact of EU and Human Rights law as well as to the influential jurisprudence of the Court of Arbitration for Sport. London 2012 provides an appropriate point at which to assess the current state of the law, as well as a look to the future. The target readership

extends from solicitors, barristers and legal advisers, to sports organisations and clubs, corporations involved in marketing and sponsorship, media companies, academics teaching sports law, and sports administrators. “I commend it to everyone who has to administer sport as well as to those who have to advise the administrators or argue cases in the field on whatever side. It is a gold medal book.” From the Foreword by Lord Coe KBE

International Law and Transnational Organised Crime

The Many Lives of Transnational Law

This new and creatively conceived casebook introduces the international legal order as it presents itself at the beginning of the twenty-first century. Consistently and effectively blending theory and practice, it is designed to give students the basic knowledge and understanding of transnational law that every modern lawyer should possess. This is an ideal text both for students who will take only one course in international law, and for those seeking a solid foundation for more specialized courses. It is organized around five major themes: actors, interactions among actors, substantive norms, methods of dispute resolution, and domestic effects of transnational law. Students are first shown how classical international law emerged and, most important, how it has evolved into modern transnational law. They are then invited to revisit each of the five core themes in the context of cutting-edge contemporary legal challenges. The casebook's unique approach enables students to gain both the knowledge and confidence they need to approach the increasingly complex range of transactions and disputes that reach beyond national boundaries.

General Principles of Law and International Due Process

The important theme “What is Sports Law?” was the topic of the international Conference on “The Concept of Lex Sportiva Revisited”, which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

International Sports Law

For almost a decade the European Union has been stuck in a permanent crisis. Starting with domestic constitutional crises,

followed by an imported financial crisis, it has evolved into a fully formed political crisis. This book argues that none of the crises are exclusively internal to the EU and the responses to date, which have taken inward looking approaches, are simply inadequate. Resolution can only come when the EU engages more fully with transnational law. This highly topical book offers an innovative dual focus on both transnational and EU law together. It sets out the relationship between the two frameworks by exploring practical concrete problems that transnational law has posed to the EU. These problems are explored from the perspective of four key tenets of both systems, namely the rule of law, democracy, the protection of human rights, and justice. It does this by advancing the theoretical framework of principled legal pluralism. In so doing it offers clear normative guidance as to how the relationship between EU and transnational law should be developed and fostered.

Transnational Law

This comprehensive, annotated bibliography covers the field of sports law and legislation in terms of national and international legal issues. The 1,367 entries emphasize recent books, articles, and other important works in legal scholarship published in recent years but also point to some earlier materials of particular historical significance. The bibliography and its annotations are easily accessible through the division of the volume into 35 chapters on various sports, topics of major importance, and issues that are key in sports law and legislation today.

Transnational Law of Sports

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of “sport specificity” (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football (“soccer”) is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Entertainment and Sports Law Bibliography

In December 1995, the Court of Justice of the European Union delivered its judgment in its most famous case to date: the Bosman case. Twenty years later, this book explores in detail how this landmark judgment legally and politically transformed the relationship between the European Union and sport. Written by leading academics in the field, the ten contributions in this book reflect on how Bosman fundamentally shaped the application of EU law to sport and its transformative effects on sports governance. The book's innovative perspectives on the Bosman ruling makes it important reading for scholars, practitioners and policy-makers concerned with EU law and Sports law. With a foreword by Prof. Dr. Carl Otto Lenz, Advocate General at the Court of Justice in the Bosman-case. Dr. Antoine Duval is Senior Researcher for International and European Sports Law at the T.M.C. Asser Instituut in The Hague. He holds a Ph.D. on the interaction between Lex Sportiva and EU Law from the European University Institute in Florence, where he was the conveyor of the Transnational Law Working Group. Prof. dr. Ben Van Rompuy is a senior researcher at the T.M.C. Asser Instituut, where he heads the ASSER International Sports Law Centre, and is Visiting Professor of Competition Policy at the Free University of Brussels (VUB). He holds a Ph.D. in law from the VUB and held visiting scholar positions at Georgetown University and New York University. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Ben Van Rompuy, Dr. Antoine Duval and Marco van der Harst LL.M.

The International Distribution Agreement

With the ever-increasing interconnection between markets, businesses and individuals from all over the globe, professionals are asked to develop a greater interest in the international implications of contracts. This book focuses attention on the distribution agreement, one of the most widely used contractual schemes in the practice of international exchanges, providing a analysis and information on the issues that should be considered by the practitioner when drafting, interpreting or executing an international agreement. Issues relating to the choice of the governing law, the competent court, the validity or invalidity of some clauses, the impact that the language of the contract may have, as well as the different meaning and scope of application of some principles, such as good faith and le estoppel, are analyzed from a transnational perspective, highlighting how the same issue can be regulated differently depending on the regulatory framework that governs it. In this second edition, the distribution relationship has been evaluated mainly across the legal systems of the European Union, the United States and Latin America, while not missing references to other regulatory frameworks, which are highlighted in correspondence with particular issues.

Sport and International Relations

Since the end of the Cold War, states have become increasingly engaged in the suppression of transnational organised crime. The existence of the UN Convention against Transnational Organised Crime and its Protocols demonstrates the

necessity to comprehend this subject in a systematic way. Synthesizing the various sources of law that form this area of growing academic and practical importance, *International Law and Transnational Organised Crime* provides readers with a thorough understanding of the key concepts and legal instruments in international law governing transnational organised crime. The volume analyses transnational organised crime in consideration of the most relevant subareas of international law, such as international human rights and the law of armed conflict. Written by internationally recognized scholars in international and criminal law as well as respected high-level practitioners, this book is a useful tool for lawyers, public agents, and academics seeking straightforward and comprehensive access to a complex and significant topic.

Vanderbilt Journal of Transnational Law

Despite taking a wide variety of forms, sport is universal. Circumstances and events generating legal issues in sport are similarly universal, but sport operates under many legal systems worldwide. Fragmentation and inconsistency in legal outcomes often result. This innovative collection of essays by leading scholars of sports law addresses a gap in the literature. It advances understanding of how different legal systems respond to common issues and offers insights into the developing international system of sports law. Researchers will find this book of inescapable assistance and interest. Hayden Opie, Melbourne Law School, Australia Nafziger and Ross have provided an enormously useful collection of incisive and integrating essays that cover the gamut of important issues in the emerging field of international sport law. Andrew Zimbalist, Smith College, US This Handbook presents a comprehensive collection of essays by leading scholars and practitioners in the burgeoning field of international sports law. The authors address significant legal issues on two gradually converging tracks: the mainstream institutional framework of the law, primarily the International Olympic Committee, international sports federations, regional and national sports authority, and the Court of Arbitration for Sport; and the commercial sports industry. Topics include the institutional structure; fundamental issues, legal principles and decisions within those institutions; mediation, arbitration and litigation of disputes; doping, gambling and the expanding use of technology in competition; athlete eligibility requirements; discrimination; and protection of athletes. The book also covers a broad range of commercial issues related to competition law and labor markets; media, image, and intellectual property rights; event sponsorships; and players' agents. Comparative analyses of young sports models and practices in North America, Europe and elsewhere supplement the general theme of international sports law. This major collection of essays on some of the most controversial, cutting-edge issues in international sports law, will be a captivating read for academics and students of sports law, sports management, international law and comparative law, as well as practicing lawyers and players agents. Senior executives and other professionals in the sports industry will also find much to interest them in this well-documented Handbook.

The Extraterritoriality of Law

With examples from England, the United States, Sweden, Egypt, Hong Kong, and many other countries, Dezalay and Garth explore how international developments in turn transform domestic methods for handling disputes. Finally, they analyze the changing prospects for international business dispute resolution given the growing presence of international market and regulatory institutions such as the EEC, NAFTA, and the World Trade Organization.

Article 38 of the Statute of the International Court of Justice defines "international law" to include not only "custom" and "convention" between States but also "the general principles of law recognized by civilized nations" within their municipal legal systems. In 1953, Bin Cheng wrote his seminal book on general principles, identifying core legal principles common to various domestic legal systems across the globe. This monograph summarizes and analyzes the general principles of law and norms of international due process, with a particular focus on developments since Cheng's writing. The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists, advocates, and scholars. The information contained in this book holds considerable importance given the growth of inter-state intercourse resulting in the increased use of general principles over the past 60 years. General principles can serve as rules of decision, whether in interpreting a treaty or contract, determining causation, or ascertaining unjust enrichment. They also include a core set of procedural requirements that should be followed in any adjudicative system, such as the right to impartiality and the prohibition on fraud. Although the general principles are, by definition, basic and even rudimentary, they hold vital importance for the rule of law in international relations. They are meant not to define a rule of law, but rather the rule of law.

Handbook on International Sports Law

This book takes a close look at the Court of Arbitration for Sport (CAS), challenging existing claims and answering previously

unanswered questions, by considering all of its publicly available decisions, both in its entirety as a body of jurisprudence and on a case-by-case level. It also investigates the actors involved in adjudication before the CAS, both the parties that bring disputes before the CAS and the arbitrators that resolve them, and in so doing establish precedents that govern sports generally. While the book relies upon and includes more traditional legal theory and analysis, it combines this with an empirical analysis of a large portion of the CAS's decisions. Hereby it relies upon and relates to the theory of the development of a transnational legal order in sports, the *lex sportiva*. The publication is targeted at and will benefit those professionally working in or interested in the fields of sports law, arbitration law, transnational law, or empirical legal studies. Johan Lindholm is a Professor of Law at Umeå University in Sweden.

Sports Law

This book provides an accessible introduction to selected new issues in transnational law, and connects them to existing theoretical debates on transnational business regulation. More specifically, (i) it introduces the argument about the evolving character of contemporary international business regulation; (ii) it provides an overview of some of the main fields of law that are currently important for firms that operate across borders; and (iii) it sets out an interpretive framework for making sense of disparate developments occurring across a number of jurisdictions, among which are the form of regulation and style of enforcement, issues of legal certainty, and behavioural aspects of regulation. The selected topics are indicative of some key issues confronting businesses looking to operate across national borders, as well as policy makers seeking to introduce and enforce meaningful regulatory standards in an increasingly global society. Topics include: consumer law; product liability; warranty law and obsolescence; collective redress; alternative dispute resolution; corporate wrongdoing; corporate governance; and e-commerce. This timely work offers a novel perspective on transnational business law and examines a range of legal issues that preoccupy companies operating transnationally. This book is intended not only for law students looking for an introduction, overview or commentary on the contemporary state of international business law, but also for anyone looking for an introduction to the regulation of business in a global, inter-connected economy.
