This book addresses cult and religion in the city of Corinth from the 4th to 7th centuries of our era. The work incorporates and synthesizes all available evidence, literary, archaeological and other. The interaction and conflict between Christian and non-Christian activity is placed into its urban context and seen as simultaneously existing and overlapping cultural activity. Late antique religion is

defined as cult-based rather than doctrinally-based, and thus this volume focuses not on what people believed, but rather what they did. An emphasis on cult activity reveals a variety of types of interaction between groups, ranging from confrontational events at dilapidated polytheist cult sites, to full polysemous and shared cult activity at the so-called "Fountain of the Lamps." Non-Christian traditions are shown to have been recognized and viable through the sixth century. The tentative conclusion is drawn that a clear definition of "pagan" and "Christian" begins at an urban level with the Christian re-monumentalization of Corinth with basilicas. The disappearance of "pagan" cult is best attributed to the development of a new city socially and physically based in Christianity, rather than any purely "religious" development.

Discovering the Mysteries of Ancient America

The artistry and splendor of ancient Egyptian jewelry in fifty masterpieces Jewelry was worn by ancient Egyptians at every level of society and, like their modern descendants, they prized it for its aesthetic value, as a way to adorn and beautify the body. It was also a conspicuous signifier of wealth, status, and power. But jewelry in ancient Egypt served another fundamental purpose: its wearers saw it as a means to absorb positive magical and divine powers--to protect the living, and

the dead, from the malignant forces of the unseen. The types of metals or stones used by craftsmen were magically important, as were the colors of the materials, and the exact positioning of all the elements in a design. *Ancient Egyptian Jewelry: 50 Masterpieces of Art and Design* draws on the exquisite collections in the archaeological museums of Cairo to tell the story of three thousand years of jewelry-making, from simple amulets to complex ritual jewelry to the spells that protected the king in life and assisted his journey to the Otherworld in death. Gold, silver, carnelian, turquoise, and lapis lazuli were just some of the precious materials used in many of the pieces, and this stunningly illustrated book beautifully showcases the colors and exceptional artistry and accomplishment that make ancient Egyptian jewelry so dazzling to this day.

This poetry collection by the acclaimed author of *Citizen* presents an “inexhaustibly complex, varied, and . . . grimly inventive” meditation on maternity (Verse). In Claudia Rankine’s *Plot*, an expectant mother, Liv, and her husband, Erland, find themselves propelled into one of our most basic plots: boy loves girl, girl gets pregnant. Liv’s respect for life, however, makes her reluctant to bring a new life into the world. The couple’s electrifying journey is charted through dreams, conversations, and reflections. This stunning, avant-garde performance enacts what it means to be human, and to invest in humanity. “Plot moves as in a picaresque novel, in which the body schemes and frightens, accompanied by Claudia Rankine’s instinct for poetic surprise.” —Barbara Guest, poet and author of *Herself Defined*

By exploring the processes of collecting, which challenge the bounds of normally acceptable practice, this book debates the practice of collecting 'difficult' objects, from a historical and contemporary perspective; and discusses the acquisition of objects related to war and genocide, and those purchased from the internet, as well as considering human remains, mass produced objects and illicitly traded

antiquities. The aim is to apply a critical approach to the rigidity of museums in maintaining essentially nineteenth-century ideas of collecting; and to move towards identifying priorities for collection policies in museums, which are inclusive of acquiring 'difficult' objects. Much of the book engages with the question of the limits to the practice of collecting as a means to think through the implementation of new strategies.

North American Indian Jewelry and Adornment

The Great American Turquoise Rush was the period of the largest concerted effort to mine, process and market turquoise in the history of the United States. It started when traditional markets for the clear sky blue Persian turquoise closed and the east coast jewelers, who controlled the jewelry trade in the United States, were forced from necessity to reappraise the quality of turquoise from the southwest. The efforts to control this new market were begun in New Mexico but would expand into other states. This is the true story of that time, largely forgotten or remembered only from oral tradition.

With more than 13,000 years of human habitation, New Mexico offers a wealth of historic sites located on vast tracts of land well off the beaten path. As author Robert Julyan observes, not much history has been made from a speeding car, and locations that have to be reached on foot are almost always less altered by parking lots, visitor centers, roadways, or traffic noise. Written for both outdoor enthusiasts and vicarious travelers, *Hiking to History* describes the historical significance behind these publically accessible sites and includes GPS coordinates to enable readers to find each place. Ranging from the state's principal Civil War battlefield at Glorieta to the dirt road where a broken wagon wheel led two young artists to settle in Taos in 1898, the scenes provide an up-close experience of the state's remarkable past.

In the ancient world there were three medicine kingdoms: animal, vegetable, and mineral. Following her previous acclaimed volumes on animal (The Illustrated Bestiary) and vegetable (The Illustrated Herbiary), Maia Toll fulfills the call for mineral with The Illustrated Crystallary, exploring the mystical qualities of 36 fascinating crystals and minerals, including gold, silver, copper, amethyst, hematite, mica, smokey quartz, emerald, ruby, and more. Combining bits of ancient wisdom with her own insights, Toll explores the aspects and energy of each stone and, through rituals and reflections, the life guidance it might offer contemporary readers. Obsidian's shiny surface and sharp edges reflect the shadowy corners of the self and serve as the tool for cutting them loose. The sky-like color of earthly turquoise provides balance between opposing forces. The stunning illustrations of Kate O'Hara magnify the symbolism of each crystal throughout the book, and are also featured on 36 oracle cards included in an envelope bound in the back of the book.
