West's Federal Practice Digest 4th

Despite radical changes over the last century, race remains a central organizing principle in U.S. society, a key arena of inequality, and the subject of ongoing conflict and debate. In a refreshing new introduction to the sociology of race, *Recognizing Race and Ethnicity* encourages students to think differently by challenging the notion that we are, or should even aspire to be, color-blind. In this text, Kathleen Fitzgerald considers how the continuing significance of race manifests in both significant and obscure ways by looking across all racial/ethnic groups within the socio-historical context of institutions and arenas, rather than discussing each group by group. Incorporating recent research and contemporary theoretical perspectives, she guides students to examine racial ideologies and identities as well as structural racism; at the same time, she covers topics like popular culture, sports, and interracial relationships that will keep students engaged. *Recognizing Race and Ethnicity* provides unparalleled coverage of white privilege while remaining careful to not treat "white" as the norm against which all other groups are defined. *Recognizing Race and Ethnicity* makes it clear that, in a time when race and racism are constantly evolving in response to varied social contexts, societal demands, and political climates, we all must learn to recognize race if we are to get beyond it.

West's Federal Practice Digest

Walburga von Raffler-Engel takes a novel approach to compiling information about

doctor-patient communication. She has surveyed popular literature around the world to gain a grass-roots' perception of this relationship in various cultures. Most of the contributions are by practicing physicians, illustrating reflections on doctor-patient communication from both the physician's as well as the patient's points of view. A variety of disciplines are involved in the study of this subject, such as discourse analysis, non-verbal communication, psychology, sociology, education, etc.

Speed Trap

African-American Males and the US Justice System of Marginalization provides an overview of the economic and social status of African-American males in America, which continues to deteriorate at an alarming rate. Weatherspoon posits that in every American institutional system, from birth to death, the journey of African-American males to achieve racial justice and equity in this country is ignored, marginalized, and exploited. The American justice system, in particular, has permitted and in some cases sanctioned the marginalization of African-American males as full citizens. Weatherspoon examines the idea that African-American males are disproportionately represented in every aspect of the criminal justice system, and that the marginalization of African-American males in America has a long and treacherous history that continues to negatively impact their economic, political, and social status.

Consequences of Rewards

In this guidebook, we have a powerful contribution to social science methodology in a context where methodology is contested, and is therefore political: different methodologies can produce quite different results or findings using the same evidence. The evidence in Ragin and Fiss's book is survey data. Ragin's has developed for 25 years a way to bridge the case study method and the large n statistical study. He calls it the set analytic method --making use of fuzzy sets to

bridge the divide between quantitative and qualitative methods. Paradoxically, the fuzzy set is a powerful tool because it replaces an unwieldy, "fuzzy" instrument—the variable, which establishes only the positions of cases relative to each other, with a precise one-degree of membership in a well-defined set. Now, with Intersectional Inequality, Ragin and his coauthor, Peter Fiss, show how the method works in application to a very mainstream sociological research topic. That topic, the use of IQ and school achievement tests as predictors of life chances, is advanced here by viewing cases intersectionally, i.e., in terms of the different ways they combine causally relevant conditions. The specific controversy they take up is the famous Bell Curve book of Charles Murray and Richard Herrnstein which argued that IQ is influenced by both inherited and environmental factors. Controversy has gone on for 20 years over which variable has the strongest impact on life changes: education, or test scores, or family background. The centrality, now more than ever, of education to American social and economic policy, compels close re-examination of traditional methods (and the blind spots of the so-called net-effects approach). By use of this sophisticated qualitative comparative analysis, Ragin and Fiss underscore the importance of racial differences in addressing social inequality in America today."

The National Jury Verdict Review and Analysis

The second edition of Business Ethics introduces readers to key ethical issues that arise within the world of business, providing a strong theoretical foundation as well as real world applications. This new edition has been greatly revised, and includes new sections on the financial services industry, globalization, and global economic justice. An accessible introduction for beginners, offering a combination of important established essays and new essays commissioned especially for this volume. Greatly revised - more than half of the selections are new to this edition. Newly commissioned essays address information technology, global economic justice and globalization, stakeholder theory, the corporation as an individual, and other topics. Uses diverse, authentic business cases to illustrate discussion of concepts. Cases have been updated to reflect current problems and issues. Provides students with guidance and tools to write their own case study essays. Readings are presented to progressively develop the reader's ability to read and apply ethical theory by writing case responses from different vantage points.

The Perception of Nonverbal Behavior in the Career Interview

Annual Manpower Planning Report

This novel is filled with very different police war stories. It relates the career of an officer who has tried his best to serve and protect. But, as we read his story, a very different future for our character emerges. He has been caught up in the selfish, power-abusing, Speed Trap mentality of a big-city police department that is not what it claims to be. After twenty-five years of service, he is fired for passing notes in class! Now, with no future whatsoever, he is approached about beginning on a new path of service. He becomes an era professional assassin, a career that he never imagined during his life of service. He concludes his tale about his life with a description of a secret society of wealthy people that he works for. They can afford their own justice system, and he is a key part of it

Federal supplement. [First Series.]

This dissertation focuses on how status and rewards jointly impact the creation, perpetuation and erosion of social inequality. Rewards are objects or positions that come to have differential levels of prestige when they are affiliated with groups of varying status, such as certain types of educational degrees, technologies, awards, and the like. Expectations about who we are and what we should be able to achieve are formed based on a combination of both our characteristics and displayed status markers. The first study experimentally tests whether rewards have the power to create entirely new status characteristics and bases of inequality. The second study is an examination of how assessments of competence and trustworthiness systematically bias the distribution of rewards and, thereby, the perpetuation of inequality, by examining how lenders perceive loan applicants and make funding decisions in experimentally created lending markets. The third study explores whether rewards have the power to neutralize status-based inequality when low status individuals are rewarded with markers of a much higher honorific value than members of high status groups.

Public Affairs Quarterly

Affirmative action is one of the central issues of American politics today, and admission to colleges and universities has been at the center of the debate. While this issue has been discussed for years, there is very little real data on the impact of affirmative action programs on admissions to institutions of higher learning.

Susan Welch and John Gruhl in this groundbreaking study look at the impact on admissions of policies developed in the wake of the United States Supreme Court's landmark 1978 Bakke decision. In Bakke, the Court legitimized the use of race as one of several factors that could be considered in admissions decisions, while forbidding the use of quotas. Opponents of affirmative action claim that because of the Bakke decision thousands of less-qualified minorities have been granted admission in preference to more qualified white students; proponents claim that without the affirmative action policies articulated in Bakke, minorities would not have made the gains they have made in higher education. Based on a survey of admissions officers for law and medical schools and national enrollment data, the authors give us the first analysis of the real impact of the Bakke decision and affirmative action programs on enrollments in medical and law schools. Admission to medical schools and law schools is much sought after and is highly competitive. In examining admissions patterns to these schools the authors are able to identify the effects of affirmative action programs and the Bakke decision in what may be the most challenging case. This book will appeal to scholars of race and gender in political science, sociology and education as well as those interested in the study of affirmative action policies. Susan Welch is Dean of the College of Liberal Arts and Professor of Political Science, Pennsylvania State University. John Gruhl is Professor of Political Science, University of Nebraska-Lincoln.

West's federal supplement. Second series

Trey Parker and Matt Stone's long-running Comedy Central hit cartoon South Park has been equally cheered and reviled for its edgy humor, potted satire of current events and celebrities, and all-around obnoxiousness. But is there more to Kyle, the lonely Jew, Timmy and the Crips, Cartman's bitchiness, Chef's inappropriate advice, and Kenny's continued violent deaths than meets the eye? This collection of essays affirms that possibility. Individual chapters take a sometimes witty, often provocative look at "Is South Park a Libertarian Manifesto?", "That's So Gay!", and "Why Is Cartman Such an Asshole?". The writers apply classical philosophical analysis to this two-dimensional dystopia, whether in Paul Draper's "Why Good Things Happen to Bad People — The Problem of Evil in South Park" or Randall Auxier's "Finding South Park on the Map: Officer Barbrady, Mayor McDaniel, and Chef in Plato's Republic." South Park and Philosophy presents new and thoughtful approaches to understanding this surprisingly meaningful show.

African-American Males and the U.S. Justice System of Marginalization: A National Tragedy

Fair Employment Practice Cases

This highly respected, best-selling text offers students an enjoyable, extraordinarily

well-written introduction to the psychology of women. Appropriate for students from a wide variety of backgrounds, this comprehensive book captures women's own experiences through direct quotations and an emphasis on empirical research. Known for her balance of scholarship and readability, as well as for her inclusion of women from diverse backgrounds, Margaret Matlin continues to lead the way for the Psychology of Women course. Matlin has meticulously updated this edition to reflect the most current research, and continues to exhibit a genuine interest in and understanding of the students for whom the book is written. Her text includes a chapter on old age, and discussions of topics such as welfare issues, pregnancy and women's retirement, which are central in many women's lives, but not consistently covered in other texts.

Philosophical Issues in Law

What drives Asian American youth to pursue excellence in higher education so relentlessly? This volume investigates the motivations, abilities, and achievements of the so called educational "model minority" from native born, fourth generation Japanese Americans to newly arrived Southeast Asian refugees. The educational

performance of Asian Americans is one of today's fastest growing minority groups enrolled in higher education programs. This unique resource integrates empirical data from national testing programs, longitudinal studies and academic and extracurricular records along with the higher educational and career aspirations reported by Asian American students. It is the definitive guide for social scientists and educators by informing them of the reliability and validity of standard admissions tests for assessing the potential of Asian Americans students and their subgroups for success in higher education and careers.
