By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Author Ned Mohan has been a leader in EES education and research for decades. His three-book series on Power Electronics focuses on three essential topics in the power sequence based on applications relevant to this age of sustainable energy such as wind turbines and hybrid electric vehicles. The three topics include power electronics, power systems and electric machines. Key features in the first Edition build on Mohan's successful MNPERE texts; his systems approach which puts dry technical detail in the context of applications; and substantial pedagogical support

including PPT's, video clips, animations, clicker questions and a lab manual. It follows a top-down systems-level approach to power electronics to highlight interrelationships between these sub-fields. It's intended to cover fundamental and practical design. This book also follows a building-block approach to power electronics that allows an in-depth discussion of several important topics that are usually left. Topics are carefully sequenced to maintain continuity and interest.

An engaging, highly moving young adult biography of Lucy Maud Montgomery, the beloved author of Anne of Green Gables, the Emily series, and many more treasured stories. This year, 2002, marks the 60th anniversary of Lucy Maud Montgomery's death. Maud Montgomery was not yet two years old when she saw her mother for the last time. The journey from that day to the day Maud signed "Lucy Maud Montgomery" at the end of her first published story was long and often painful. In this compelling portrait of one of Canada's best-loved writers for young people, another beloved, award-winning young-adult author, Janet Lunn, vividly brings to life the spirit that was Lucy Maud Montgomery. Lunn shows us Montgomery's strict and lonely upbringing in rural Prince Edward Island, her eventual marriage to a man she did not love but who was deemed an ideal match, and her hard-won successes after many years of self-doubt and rejection. Throughout her life, Maud never stopped writing her journals and stories. L.M. Montgomery is undoubtedly Canada's most famous author. Today, sixty years after her death her books have been translated into nearly every language, and dozens of plays, musical plays, films and made-for-television series of her works have been produced. In 1975, a Canadian Anne of Green Gables postage stamp was issued, and in Japan, where her stories are hugely popular, there are two Anne theme parks. At the end of 1999, when lists of the last century's favourite writers were being compiled, the name Lucy Maud Montgomery led all others.

Carefully separating the essential from the ornamental, Essentials of Control Techniques and Theory presents the nuts and bolts for designing a successful controller. It discusses the theory required to support the art of designing a working controller as well as the various aspects to convince a client, employer, or examiner of your expertise. A Compelling Account of the Basics of Control Theory Control solutions for practicing engineers Using the author's own Javascript On-Line Learning Interactive Environment for Simulation (Jollies), the text relies on

computer-based graphical analysis methods, such as Nyquist, Nichols, root locus, and phase-plane, to illustrate how useful computer simulation can be for analyzing both linear and nonlinear systems. It explains step-by-step the design and modeling of various control systems, including discrete time systems and an inverted pendulum. Along with offering many web-based simulations, the book shows how mathematics, such as vectors, matrices, and the differential equations that govern state variables, can help us understand the concepts that underpin the controller's effects. From frequency domain analysis to time-domain state-space representation, this book covers many aspects of classical and modern control theory. It presents important methods for designing and analyzing linear systems and controllers.

Graphic Violence provides an innovative introduction to the relationship between violence and visual media, discussing how media consumers and producers can think critically about and interact with violent visual content. It comprehensively surveys predominant theories of media violence and the research supporting and challenging them, addressing issues ranging from social learning, to representations of war and terrorism, to gender and hyper-masculinity. Each chapter features original artwork presenting a story in the style of a graphic novel to demonstrate the concepts at hand. Truly unique in its approach to the subject and medium, this volume is an excellent resource for undergraduate students of communication and media theory as well as anyone interested in understanding the causes and effects of violence in media.

The No Outsiders programme promotes an ethos of inclusion and tolerance, and aims to prepare children for life in modern Britain. Expanding the scheme published in the 2015 book, No Outsiders in Our Schools, this book is designed to further support educators as they make the No Outsiders ethos part of their school culture at a time when messages of fear and division are rife. Written by a practising teacher whose work to promote equality has been globally celebrated, this book provides lesson plans for use in classes from EYFS to Year 6. Key features of the resource include: • plans for delivering the No Outsiders message through assemblies and classes, allowing for a flexible approach • recommendations for picture books that can be used to support messages of diversity and inclusion • a scheme of work designed to meet the requirements of the Equalities Act (2010) and support teachers as they prepare to implement the new Relationships Education curriculum (2020). It is the responsibility of primary schools to promote equality and diversity. This is a vital resource for all teachers and trainee teachers as they prepare children for a life where diversity is embraced and there is no fear of difference.
